

Contents

Introduction.....	1
Chapter 1. The Glass Transition.....	5
Chapter 2. Equilibrium Thermodynamics of Viscous Liquids and Glasses.....	29
Chapter 3. Relaxation in the Transformation Range.....	37
Chapter 4. Elementary Theory of Relaxation and Viscoelasticity ...	63
Chapter 5. Relaxations at Temperatures Above the Transformation Region.....	75
Chapter 6. Delayed Elasticity.....	79
Chapter 7. Relaxation Below the Glass-Transition Temperature....	83
Chapter 8. Fictive Temperature and Calculation of Relaxation in the Transformation Range.....	99
Chapter 9. Molecular Dynamics Simulations of Liquids and Glasses—Methodology.....	109
Chapter 10. Molecular Dynamics Simulations of BeF ₂ and SiO ₂	115
Chapter 11. Theory of Network Glasses and Liquids.....	131
Chapter 12. Computer Simulations of Alkali Silicates and Alkali Fluoroberyllates.....	143
Chapter 13. Computer Simulations of CaF ₂ and Implications for the Behavior of Viscous Fluids and Glasses.....	155
Chapter 14. Qualitative Description of Structure and Diffusion Mechanism of Viscous Fluids and Glasses.....	179
Chapter 15. Theory of Relaxation of Viscous Liquids.....	185
Acknowledgments.....	203
Bibliography.....	205
Index.....	217
