

CONTENTS

| | |
|--|-----|
| Preface | v |
| Contents | ix |
| 1. G. Huber <i>Miniature neodymium lasers</i> | 1 |
| 2. L.H. Brixner, J.D. Bierlein and V. Johnson <i>Eu²⁺ fluorescence and its application in medical X-ray intensifying screens</i> | 47 |
| 3. S.J. Schneider, H.P.R. Frederikse, T. Negas and G. Rudins <i>Materials for open cycle MHD generators</i> | 89 |
| 4. S. Vepřek <i>Applications of low pressure plasmas in materials science: especially chemical vapour deposition</i> | 151 |
| 5. J.C. Brice <i>Phase diagrams of electronic materials</i> | 237 |
| 6. N. Eustathopoulos and J.-C. Joud <i>Interfacial tension and adsorption of metallic systems</i> | 281 |
| 7. M. Bienfait <i>Two-dimensional phase transitions of simple molecules adsorbed on graphite</i> | 361 |
| 8. R. Boistelle <i>Defect structures and growth mechanisms of long-chain normal alkanes</i> | 413 |
| 9. A.M. Lejus and R. Collongues <i>Lanthanide oxides, structural anisotropy, physical and mechanical properties</i> | 481 |
| Subject index | 579 |
| Materials index | 587 |
| Cumulative index – volumes 1–4 | 593 |
