| | |
|--|-----|
| Preface | v |
| Contents | vii |
| 1. L. Hollan, J. P. Hallais and J. C. Brice <i>The preparation of gallium arsenide</i> | 1 |
| 2. R. Cadoret <i>Application of the theory of rate processes in the CVD of GaAs</i> | 219 |
| 3. A. A. Chernov and V. V. Sipyagin <i>Peculiarities in crystal growth from aqueous solutions connected with their structures</i> | 279 |
| 4. H. K. Cammenga <i>Evaporation mechanisms of liquids</i> | 335 |
| 5. A. Baronnet <i>Polytypism in micas: a survey with emphasis on the crystal growth aspect</i> | 447 |
| Subject index | 549 |
| Materials index | 555 |
| Cumulative index – volumes 1–5 | 559 |
| Cumulative subject index – volumes 1–5 | 563 |
| Cumulative materials index – volumes 1–5 | 603 |
