List of Contributors . . . . .	v
Preface . . . . .	vii
Foreword . . . . .	ix

## Part I. Solid State

1. Thermal Properties . . . . .	3
R. BERMAN	
2. Colour Centres and Optical Properties . . . . .	23
C. D. CLARK, E. W. J. MITCHELL and B. J. PARSONS	
3. Electrical Properties . . . . .	79
A. T. COLLINS and E. C. LIGHTOWLERS	
4. Nuclear Properties in Physical and Geochemical Studies of Natural Diamond . . . . .	107
J. P. F. SELLSCHOP	
5. Cathodoluminescence . . . . .	165
G. DAVIES	

## Part II. Theoretical

6. Recent Developments in the Theory of Diamond . . . . .	185
A. M. STONEHAM	

## Part III. Surface

7. Adsorbability of Diamond Surfaces . . . . .	211
J. M. THOMAS	
8. Optical Studies of Diamonds and their Surfaces: A Review of the Late Professor Tolansky's Work . . . . .	245
A. MORETON MOORE	

## Part IV. Mechanical

9. Strength and Fracture . . . . .	281
J. E. FIELD	
10. Adhesion and Friction . . . . .	325
D. TABOR	

11. Abrasion and Wear . . . . .	351
J. WILKS and E. WILKS	
12. Indentation Hardness . . . . .	383
C. A. BROOKES	
13. Changes Produced by High Temperature Treatment of Diamond	403
T. EVANS	
14. Internal Structure . . . . .	425
A. R. LANG	
<b>Part V. Growth</b>	
15. Physics of Diamond Growth . . . . .	473
G. MUNCKE	
16. Technology of Diamond Growth . . . . .	501
R. J. WEDLAKE	
<b>Part VI. Geology</b>	
17. New Aspects of Diamond Geology . . . . .	539
J. B. DAWSON	
18. Inclusions in Diamond . . . . .	555
J. W. HARRIS and J. J. GURNEY	
<b>Part VII. Industrial</b>	
19. Industrial Uses of Diamond . . . . .	595
D. M. BUSCH	
20. Non-Abrasive Industrial use of Diamond . . . . .	619
R. J. CAVENEY	
Tables of Properties . . . . .	641
Subject Index . . . . .	655
