

TABLE OF CONTENTS

PREFACE	vii
M.PARRINELLO / Molecular Dynamics at constant external stress: studies of crystal structure transformations	1
A. PERINI / Monte Carlo studies of interface free energies in nucleation theory	3
P.W. TASKER / Surfaces and interfaces in ionic materials	21
G. JACUCCI / Machine calculations in solid state diffusion	41
G. DE LORENZI / Molecular Dynamics studies of surface diffusion	43
G. CICCOTTI / Diffusion in grain boundaries	67
W.G. HOOVER / Dynamic compaction of powders	69
W.G. HOOVER / Flow and plasticity via nonequilibrium molecular dynamics	87
J.E. SINCLAIR / Atomistic equilibrium models of crack tip behaviour	107
M. RONCHETTI / Defects in amorphous solids: A possible approach	129
W.G. HOOVER / Simulation of brittle fracture via molecular dynamics	145

J.E. SINCLAIR / Fracture studies using linear elastic solutions for continuously distributed dislocations	159
G. MARTIN and P. Valentin / Basic aspects of microstructural evolution under high temperature irradiation	183
A. PERINI / Numerical solution of the master equation for cluster population in the classical nucleation theory	209
M.W. FINNIS / Radiation damage and creep using rate theory	225
D.W. HEERMANN / Computer simulations of first order phase transformations. Part I: metastability	245
D.W. HEERMANN / Computer simulations of first order phase transformations. Part II: Spinodal decomposition	257
A. MIOTELLO / Heat and particle fluxes during laser and electron beams irradiation of metals	269
M.W. FINNIS / Applications of molecular dynamics to the simulation of sputtering	289
