PREFACE	vii

Chapter 1. Evaluation of Fracture Tests and Specimen Preparation

W. J. Hall

I. Introduction	2
II. Some Test Methods and Typical Data	4
III. Welding Procedures, Residual Stress, and Flaws	30
IV. Selection of Test Specimen and Instrumentation	31
V. Interpretation of Results	34
VI. Recommended Research	39
VII. Summary	41
References	43

Chapter 2. Plane Strain Fracture Toughness

John E. Srawley

I. Introduction: Concept of K_{Ic}	45
II. Procedure for Determination of K_{Ic}	48
III. Some Experimental Results	54
IV. Summary and Recommended Research	57
Appendix A: Details of K_{Ic} Test Practice with Bend Specimens	58
Appendix B: Stress-Intensity Factors and Load-Displacement Slope Factors for Various Specimens	63
Symbols	67
References	67

Chapter 3. Temperature Effects on Fracture

W. E. Witzell and N. R. Adsit

I. Introduction	70
II. Temperature Dependence	70
III. Early Fracture Criteria	73
IV. Qualitative Evaluations	75
V. Some Noteworthy Results	90

VI. Recommended Research	105
VII. Summary	106
Symbols	110
References	110
Chapter 4. Fracture and Carrying Capacity of Notched Columns	
<i>H. Liebowitz</i>	
I. Introduction	114
II. Test Equipment and Procedure for Testing of Columns	116
III. Test Equipment for Photoelastic Investigation of Stress-Concentration Factors	120
IV. Theoretical Considerations	123
V. Discussion of Results for Critical Load	128
VI. Fracture of Columns	140
VII. Discussion of Fracture Results	145
VIII. Some Stress-Concentration Factors	152
IX. Discussion of Stress-Concentration Results	155
X. Recommended Research	159
XI. Summary	160
Appendix A. Unnotched Beam Column Loaded Concentrically	161
Appendix B. Unnotched Beam Column Loaded Eccentrically	164
Appendix C. Stress-Intensity Factors for Beam Columns Having Deep Cracks	166
Symbols	168
References	169
Chapter 5. Prestressed Brittle Structures	
<i>Ralph L. Barnett and Paul C. Hermann</i>	
I. Introduction	174
II. Prestressed and Segmented Beams	178
III. Prestressed Monolithic Beams	209
IV. Segmented Columns	221
V. Prestressed Plates	235
VI. Recommended Research	243
VII. Summary	246
Appendix A. Segmented Beams with Arbitrary Cross Sections and Multiple Tendons	249
Appendix B. Eccentrically Loaded Segmented Beam Columns	261
Symbols	268
References	273
Chapter 6. Design of Attachments and Connections with Brittle Materials	
<i>Wilfred H. Dukes and Frank M. Anthony</i>	
I. Introduction	276
II. Design Considerations	278

III. Representative Attachment Configurations	287
IV. Analytical Procedures	299
V. Experimental Results	322
VI. Recommended Research	329
VII. Summary and Conclusions	331
Symbols	333
References	334
Chapter 7. Effects of Residual Stress on Brittle Fracture	
<i>A. A. Wells</i>	
I. Introduction	338
II. Welding Residual Stresses	342
III. Residual Stress Effects on Brittle Fracture in Welded Structures	346
IV. Analysis of Residual Stress Effects in Notched and Welded Wide Plates by Fracture Mechanics	351
V. Separation of Residual Stress and Metallurgical Damage Effects at Crack Initiation	356
VI. Function and Conduct of Stress Relief Treatments	358
VII. Recommended Research	365
VIII. Summary	366
Symbols	369
References	369
Chapter 8. Brittle Fracture in Weldments	
<i>W. H. Munse</i>	
I. Introduction	372
II. Phenomenological Aspects of Brittle Fracture in Weldments	376
III. Materials and Weldments	392
IV. Embrittlement in Weldments	405
V. Fabrication of Weldments	408
VI. Loading and Environment	425
VII. Designing against Brittle Fracture	429
VIII. Recommended Research	431
IX. Summary	432
References	433
AUTHOR INDEX	439
SUBJECT INDEX	444
