

C O N T E N T S

Preface	
1. SINTERING - THEORETICAL CONSIDERATION	1
Discussion on the definition of the term "sintering" (H.H. Hausner).....	3
A contribution to investigating the consolidation process based on the electronic structure of solids (D.Č. Stefanović and M.M. Ristić).....	8
Simulation of diffusion controlled sphere-sphere sintering (R.M. German)	18
The variation of the mechanism dependent exponent with coordination number and neck size in the sintering kinetics of powders (Z.A. Munir, P.K. Higgins and R.M. German).....	26
New contribution to understanding the first phase of sintering (D. Dužević and M.M. Ristić).....	35
The role of gas in the behaviour of a closed porosity body (S.S. Kiparisov and YU.V. Levinskij).....	41
Rate controlled sintering: Principles and practice (H. Palmour III, M.L. Huckabee and T.M. Hare).....	46
Theoretical aspects of sintering glass powders (L. Zagar)...	57
2. SINTERING OF METAL POWDERS.....	65
Sintering of loosely packed metal powder (K. Akechi and Z. Hara).....	67
Mass transfer and homogenizing at electric-discharge sintering of powder mixture (A.I. Raitchenko, I.M. Fedordchenko, G.L. Burenkov and A.F. Khrienko).....	76
Low temperature sintering of aluminium powder bodies (O.V. Roman, J.V. Kumar, P.A. Vityaz, G.R. Fridman and T.A. Smirnova).....	82
Orientation of pore structure in loose and pressed carbonyl iron and its influence on shrinkage anisotropy (M. Mitkov, H.E. Exner and G. Petzow).....	90
Relations between mechanical, physical and microstructural characteristics of porous nickel (R. Cytermann, P. Maire and P. Gilles).....	99

Certain features of sintering the two-component powder alloys (I.M. Fedorchenko and I.I. Ivanova).....	110
Properties and degree of non-homogeneity of sintered Cu-Ni (A. Radon, J. Frydrych and S. Stolarz).....	121
Investigations of structural changes in $W(ZrO_2.La_2O_3)$ and $Mo(ZrO_2.La_2O_3)$ systems during the process of reduction and sintering (O.V. Roman, G.N. Dubrovskaya, M.N. Korotkina and P.A. Vityaz)	130
Some problems of the sintering of rolled made from powder materials (Z.D. Khocholava, G.SH. Khvedelidze, A.A. Saganelidze)	137
3. SINTERING OF OXIDES AND OXIDES SYSTEMS.....	143
A contribution to study of recovery process of disperse CdO (M.M. Ristić and S.M. Stojilković).....	145
Influence of the structure, pressing, atmosphere and doping on the sintering of spherical particles of titanium dioxide (M. Astier, G. Brula, F. Lecomte, J.P. Reymond and P. Vergnon).....	150
Comparison between sintering phenomena of compacted and non-compacted UO_2 powders (C. Frigeri, P. Gondi and C. Patuelli).....	160
Sintering of Al_2O_3 derived from alumina gels (LJ. Nikolić, J.E. Bailey and M.M. Ristić).....	168
Sintering of mullite (P. Reynen and M. Faizullah).....	178
Diffusional changes of ceramic bodies composition and structure during the second step of sintering process. (A. Szymański and W.K. Włosinski).....	196
X-ray diffraction and microprobe studies of homogenization in mixed-oxide nuclear fuel pellets (A. Brown).....	205
Sintering of $Li_xNi_{1-x}O$ solid solutions (Lj. Djuričić, M. Polovina and M. Stevanović).....	216
Composites production by chemical treatments (G. Asti, G. Caironi, P. Cavallotti and R. Roberti).....	223
The $Zn_{1-x}Ni_xFe_2O_4$ ferrite porosity changes in depending on preparation and heat treatment way (A. Kwiatkowski).....	233
4. ACTIVATED AND LIQUID PHASE SINTERING.....	243
A note about so-called "activated" sintering (G.C. Kuczynski)	245
An enhanced diffusion model of refractory metal activated sintering (R.M. German).....	257

Activated sintering of nonmetallic nitride-base materials (G.S. Samsonov, T.V. Dubovik and A.I. Itsenko).....	267
Liquid phase sintering of the model system W-Ni (W.J. Huppmann, H. Riegger and G. Petzow).....	272
Metallic powder-liquid metal reaction study : correlation between the hardness evolution and the different states of the Ag ₃ Sn-Hg system sintering (G. Le Quang, D. Tréheux, J. Blanc-Benon and P. Guiraldenq).....	279
Sintering of Al ₂ O ₃ in presence of liquid phase (S. Pejovnik, D. Kolar, W.J. Huppmann and G. Petzow).....	285
5. NEW TYPES OF SINTERED MATERIALS.....	293
Emerging areas in hot pressing (M.R. Notis and R.M. Spriggs)	295
Vacuum hot-pressing of germanium and silicon-germanium alloys (D.M. Rowe and R.W. Bunce).....	307
Sintering and grain growth in titanium carbide (J.L. Chermant, M. Coster and B.L. Mordike).....	319
Hardness optimized refractory compounds (H. Holleck and F. Thümmeler).....	329
Preparation and properties of sintered materials in the systems Si-Al-C and Si-Ti-C (J. Schoennahl, B. Willer and M. Daire).....	338
A study of iron based pseudo-ternary powder mixtures developed by the introduction of the carbides VC, WC, TIC (H.P. Aksas, R. Leveque and A. Kobylanski).....	346
Hard metals based on non-stoichiometric carbide and carbonitride phases (M. Komac, M. Drofenik, T. Kosmač and H. Holleck).....	360
A new improved surface treatment for superalloy sintering (D. Billard and J.P. Trottier).....	367
Reaction sintering of SiO ₂ -AlN mixture forming β-Si ₃ N ₄ solid solution (S. Bošković, J.L. Gauckler, G. Petzow and T.Y. Tien)	374
