

# CONTENTS

<b>INTRODUCTION TO ACOUSTIC EMISSION TECHNOLOGY</b> .....	1	<b>PART 3: INTRODUCTION TO THE EFFECTS OF BACKGROUND NOISE IN ACOUSTIC EMISSION TESTS</b> .....	23
<b>PART 1: HISTORY OF ACOUSTIC EMISSION RESEARCH</b> .....	2	Effects of Hydraulic and Mechanical Noise ..	23
Early Uses of Acoustic Emission .....	2	Hydraulic Noise .....	23
Acoustic Emission in Metalworking .....	2	Mechanical Noise .....	23
<b>PART 2: DETECTING AND RECORDING ACOUSTIC EMISSION</b> .....	4	Noise Associated with Welding .....	24
Kaiser's Study of Acoustic Emission Sources ..	4	Noise from Solid State Bonding .....	25
Acoustic Emission Research in the United States .....	4	Electromagnetic Interference .....	25
<b>PART 3: ORGANIZING THE ACOUSTIC EMISSION COMMUNITY</b> .....	7	Miscellaneous Noise .....	26
The Acoustic Emission Working Group .....	7	Conclusions .....	26
European and Japanese Working Groups ..	7	<b>PART 4: INTRODUCTION TO ACOUSTIC EMISSION SIGNAL CHARACTERIZATION</b> ..	27
Results of the Acoustic Emission Working Groups .....	7	The Purpose of Signal Characterization .....	27
<b>SECTION 1: FUNDAMENTALS OF ACOUSTIC EMISSION TESTING</b> .....	11	Interpreting the Data .....	27
<b>PART 1: INTRODUCTION TO ACOUSTIC EMISSION TECHNOLOGY</b> .....	12	Characteristics of Discrete Acoustic Emission .....	27
The Acoustic Emission Phenomenon .....	12	Waveform Parameter Descriptions .....	28
Acoustic Emission Nondestructive Testing ..	12	Acoustic Emission Event Energy .....	29
Application of Acoustic Emission Tests .....	13	Acoustic Emission Signal Amplitude .....	29
Successful Applications .....	14	Limitations of the Simple Waveform Parameters .....	29
Acoustic Emission Testing Equipment .....	14	Advanced Characterization Methods .....	29
Microcomputers in Acoustic Emission Test Systems .....	15	Knowledge Representation Method .....	30
Characteristics of Acoustic Emission Techniques .....	16	Feature Analysis and Selection .....	30
Acoustic Emission Test Sensitivity .....	16	Pattern Recognition Training and Testing ..	31
Interpretation of Test Data .....	17	Signal Classification .....	31
The Kaiser Effect .....	17	Signal Treatment and Classification System ..	31
Overview of Acoustic Emission Methodology .....	18	Guidelines for Source Characterization .....	32
<b>PART 2: INTRODUCTION TO ACOUSTIC EMISSION INSTRUMENTATION</b> .....	20	Comparison of the Classifier Techniques ..	33
Choosing an Acoustic Emission Testing System .....	20	<b>PART 5: INTRODUCTION TO TERMS, STANDARDS AND PROCEDURES FOR ACOUSTIC EMISSION TESTING</b> .....	34
Expanding the Basic Acoustic Emission Testing System .....	20	Terminology of Acoustic Emission Method ..	34
Computers in Acoustic Emission Systems ..	21	Development of Acoustic Emission Terminology .....	34
System Calibration .....	21	Glossary for Acoustic Emission Testing .....	34
Pressure Vessel Applications .....	21	Procedures for Acoustic Emission Testing ..	36
Spot Weld Monitoring Applications .....	22	Personnel Qualification .....	36
The Value of Acoustic Emission Instrumentation .....	22	Standards for Acoustic Emission Testing .....	36
		<b>PART 6: ACOUSTIC EMISSION EXAMINATION PROCEDURES</b> .....	39
		Objectives of the Acoustic Emission Testing Procedure .....	39
		Technical Characteristics Furnished by the Transducer Manufacturer .....	39
		Coupling and Mounting of Piezoelectric Transducers .....	39
		Simplified Characterization and Verification of Piezoelectric Transducers .....	40
		Verification Precautions .....	41

<b>SECTION 2: MACROSCOPIC ORIGINS OF ACOUSTIC EMISSION</b> .....	45	Grain Size Effects of Microscopic Dislocation Sources .....	74
<b>PART 1: FUNDAMENTALS OF ACOUSTIC EMISSION'S MACROSCOPIC ORIGINS</b> .....	46	Precipitation Effects .....	75
Unique Aspects of Acoustic Emission Testing .....	46	<b>PART 4: MICROSCOPIC FRACTURE SOURCES</b> .....	77
Acoustic Emission Instrumentation .....	46	Detectability of Microscopic Fracture Sources .....	77
<b>PART 2: DEFORMATION SOURCES OF ACOUSTIC EMISSION</b> .....	47	Cleavage Microfracture .....	79
Plastic Deformation Sources .....	47	Intergranular Microfracture .....	79
Factors Contributing to Acoustic Emission ..	47	Particle Microfracture .....	79
The Kaiser Effect and Deformation .....	48	Microvoid Coalescence .....	81
<b>PART 3: FRACTURE AND CRACK GROWTH AS ACOUSTIC EMISSION SOURCES</b> .....	49	Environmental Factors .....	82
Crack Growth Sources .....	49	Amplification Factors .....	82
Fracture as an Acoustic Emission Source ..	51	<b>PART 5: MICROSCOPIC PHASE CHANGES</b> ...	84
Criteria for Fracture .....	52	Solid State Phase Transformations .....	84
<b>PART 4: ACOUSTIC EMISSION FROM FATIGUE</b> .....	55	Detectability of Martensitic Transformations .	84
Techniques for Monitoring Fatigue Cracking .....	55	Liquid-Solid Transformations .....	87
Acoustic Emission Count Rate .....	55	<b>SECTION 4: WAVE PROPAGATION</b> .....	91
Relation Between Count Rate and Crack Growth .....	56	<b>PART 1: WAVES IN INFINITE MEDIA</b> .....	92
Monitoring Low Cycle Fatigue .....	56	Equations of Motion .....	92
<b>PART 5: CORROSION AND STRESS CORROSION CRACKING</b> .....	58	General Solution of Motion Equations .....	92
Acoustic Emission from Corrosion .....	58	Plane Wave Solutions .....	93
Relation Between Count Rate and Corrosion .....	58	Simple Harmonic Waves .....	93
Stress Corrosion Cracking .....	58	<b>PART 2: SURFACE WAVES</b> .....	95
Monitoring Hydrogen Embrittlement and Adverse Test Environments .....	59	<b>PART 3: REFLECTION OF WAVES AT INTERFACES</b> .....	97
Conclusions .....	59	Transverse Waves Incident on a Free Surface .....	97
<b>SECTION 3: MICROSCOPIC ORIGINS OF ACOUSTIC EMISSION</b> .....	63	Incident Longitudinal Wave .....	99
<b>PART 1: FUNDAMENTALS OF ACOUSTIC EMISSION GENERATION</b> .....	64	Energy Partition at a Free Surface .....	99
Origination of Elastic Waves .....	64	Reflection and Transmission at an Interface Between Two Solids .....	101
Detecting Acoustic Emission .....	64	<b>PART 4: ATTENUATION OF WAVES</b> .....	103
The Need for Studying Microscopic Origins .	64	Geometric Attenuation .....	103
<b>PART 2: MICROMECHANICAL MODELING</b> ..	66	Attenuation from Dispersion .....	103
Formulation of the Model .....	66	Attenuation from Scattering and Diffraction .	104
Sensor Spectral Sensitivity .....	68	Attenuation due to Energy Loss Mechanisms .....	105
Detectability Criteria .....	69	Attenuation in Actual Structures .....	106
Source Directivity .....	70	<b>PART 5: IDEALIZED WAVE SOURCES</b> .....	108
<b>PART 3: MICROSCOPIC DISLOCATION SOURCES</b> .....	71	Concentrated Force .....	108
Detectability of Microscopic Dislocation Sources .....	71	Double Force without Moment .....	110
Single Crystal Deformation .....	73	Center of Compression .....	110
		<b>PART 6: SOURCES ACTING IN OR ON A HALF-SPACE</b> .....	112
		Concentrated Force Acting Normal To and On the Surface .....	112
		Concentrated Force Below the Surface of the Half-Space .....	114
		<b>PART 7: SOURCES ACTING IN OR ON PLATES</b> .....	115
		<b>PART 8: DIFFUSE WAVE FIELDS</b> .....	117

Diffuse Wave Field Equations . . . . .	117	Special Array Configurations . . . . .	148
Diffuse Field Solution for Impulsive Sources . . . . .	118	Error in Discrete Source Location . . . . .	148
		Source Location in Three Dimensions . . . . .	152
		Conclusions . . . . .	153
<b>SECTION 5: ACOUSTIC EMISSION SENSORS AND THEIR CALIBRATION . . . . .</b>		<b>SECTION 7: ACOUSTIC EMISSION APPLICATIONS IN THE PETROLEUM AND CHEMICAL INDUSTRIES . . . . .</b>	
PART 1: ACOUSTIC EMISSION SENSORS . . . . .	122	PART 1: OVERVIEW OF ACOUSTIC EMISSION TESTING IN THE PETROLEUM AND CHEMICAL INDUSTRIES . . . . .	156
Definition of Acoustic Emission Sensors . . . . .	122	Pressure Vessel Materials and Common Causes of Failure . . . . .	156
Types of Sensors . . . . .	122	Uses of Acoustic Emission Tests of Pressure Vessels . . . . .	157
Typical Acoustic Emission Sensor Design . . . . .	123	PART 2: INDUSTRIAL GAS TRAILER TUBE APPLICATIONS . . . . .	161
Characteristic Sensor Dimensions . . . . .	123	Recertification of Gas Trailer Tubing . . . . .	161
Couplants and Bonds . . . . .	124	Test Procedure for Trailer Tubing Tests . . . . .	162
Temperature Effects on Acoustic Emission Sensors . . . . .	124	Advantages of Acoustic Emission Testing of Trailer Tubes . . . . .	163
Special Acoustic Emission Sensors and Sensor Mounts . . . . .	125	PART 3: ACOUSTIC EMISSION TESTS OF METAL PIPING . . . . .	166
PART 2: PRIMARY SENSOR CALIBRATION . . . . .	126	Acoustic Emission Testing of Gas Pipelines . . . . .	166
Terminology of Sensor Calibration . . . . .	126	PART 4: ACOUSTIC EMISSION TESTING OF METAL PRESSURE VESSELS . . . . .	167
Basic Principles of Sensor Calibration . . . . .	126	Code for Testing Pressure Vessels . . . . .	167
Step-Force Calibration . . . . .	128	Acoustic Emission Testing of Blowout Preventers . . . . .	168
Reciprocity Calibration . . . . .	130	Cast Steel Gate Valves . . . . .	168
PART 3: SECONDARY CALIBRATION AND SENSOR TESTS . . . . .	131	Testing Pressure Vessels to Evaluation Standards . . . . .	170
Purpose of Secondary Calibration . . . . .	131	Acoustic Emission Testing of Ammonia Spheres . . . . .	170
Development of Secondary Calibration Procedures . . . . .	131	Summary of Industrial Acoustic Emission Test Procedures of Tanks and Vessels . . . . .	172
		Testing of Hydroformer Reactor Vessels . . . . .	173
		Fluid Catalytic Cracking Unit . . . . .	183
<b>SECTION 6: ACOUSTIC EMISSION SOURCE LOCATION . . . . .</b>	135	PART 5: ACOUSTIC EMISSION TESTING OF METAL STORAGE TANKS . . . . .	187
PART 1: FUNDAMENTALS OF ACOUSTIC EMISSION SOURCE LOCATION . . . . .	136	Tests of Flat Bottom Anhydrous Ammonia Storage Tanks . . . . .	187
Comparison of Acoustic Emission to Other Nondestructive Tests . . . . .	136	Tests of Horizontal Tanks . . . . .	188
Remote Sensors for Source Location . . . . .	136	Tests of Butane Storage Spheres . . . . .	188
PART 2: LOCATING SOURCES OF CONTINUOUS ACOUSTIC EMISSION . . . . .	137	PART 6: ACOUSTIC EMISSION TESTING FOR LEAK DETECTION . . . . .	194
Characteristics of Continuous Acoustic Emission Testing . . . . .	137	Metal Pipeline Hydrostatic Testing . . . . .	194
The Value of Attenuation . . . . .	137	Plastic Pipeline Pneumatic Testing . . . . .	197
Zone Location Method . . . . .	137	Offshore Crude Oil Pipeline Testing . . . . .	198
Signal Amplitude Measurement Method . . . . .	138	Tests of Steam Condensate Lines . . . . .	200
The Use of Timing Techniques . . . . .	140	Acoustic Emission Tests of Flat Bottom Tanks . . . . .	201
Cross Correlation Approach . . . . .	141		
Coherence Techniques . . . . .	142		
Summary . . . . .	144		
PART 3: LOCATING DISCRETE SOURCES OF ACOUSTIC EMISSION . . . . .	145		
Linear Location of Acoustic Emission Sources . . . . .	145		
Location of Sources in Two Dimensions . . . . .	146		
Restricting the Active Zone . . . . .	147		

<b>PART 7: ACOUSTIC EMISSION TESTS OF FIBER REINFORCED PLASTIC VESSELS . . .</b>	<b>203</b>	<b>PART 4: ACOUSTIC EMISSION FROM ZIRCONIUM ALLOYS DURING MECHANICAL AND FRACTURE TESTING . . . . .</b>	<b>260</b>
Testing Procedures for Pressure, Storage and Vacuum Vessels . . . . .	203	Zirconium Alloys . . . . .	260
Applications in the Chemical Industries . . . . .	203	Plastic Deformation . . . . .	260
Composite Pipe Testing Applications . . . . .	205	Fatigue . . . . .	261
Zone Location in Fiber Reinforced Plastics . . . . .	205	Cracking of Surface Oxide . . . . .	261
Felicity Effect in Fiber Reinforced Plastics . . . . .	208	Stress Corrosion Cracking . . . . .	263
Acceptance of Acoustic Emission Techniques for Testing of Fiber Reinforced Plastics . . . . .	209	Delayed Hydride Cracking . . . . .	263
<b>PART 8: MACHINERY CONDITION MONITORING . . . . .</b>	<b>213</b>	<b>PART 5: BUCKET TRUCK AND LIFT INSPECTION . . . . .</b>	<b>267</b>
Incipient Failure Detection . . . . .	213	Acoustic Emission Inspection Development . . . . .	267
Applications of Acoustic Emission in Machinery Monitoring . . . . .	214	Instrumentation for Bucket Truck Inspection . . . . .	268
Machinery Monitoring Case Histories . . . . .	215	Test Procedure for Bucket Truck Inspection . . . . .	268
Decision-Making as Part of Incipient Failure Detection . . . . .	219	Typical Test Data . . . . .	270
<b>PART 9: ADVANTAGES OF ACOUSTIC EMISSION TESTING IN THE PETROCHEMICAL INDUSTRIES . . . . .</b>	<b>220</b>	Acceptance Criteria . . . . .	271
Potential Cost Saving from the Use of Acoustic Emission Techniques . . . . .	220	<b>SECTION 9: ACOUSTIC EMISSION APPLICATIONS IN WELDING . . . . .</b>	<b>275</b>
Outline of Benefits for the Petrochemical Industries . . . . .	220	<b>PART 1: RESISTANCE SPOT WELD TESTING . . . . .</b>	<b>276</b>
<b>SECTION 8: ACOUSTIC EMISSION APPLICATIONS IN THE NUCLEAR AND UTILITIES INDUSTRIES . . . . .</b>	<b>225</b>	Resistance Spot Welding . . . . .	276
<b>PART 1: CONTINUOUS IN-SERVICE ACOUSTIC EMISSION MONITORING OF NUCLEAR POWER PLANTS . . . . .</b>	<b>226</b>	Principles of Acoustic Emission Weld Monitoring . . . . .	276
Instrumentation . . . . .	227	Weld Quality Parameters that Produce Acoustic Emission . . . . .	277
Detection and Location of Discontinuities . . . . .	228	Acoustic Emission Instrumentation for Resistance Spot Welding . . . . .	279
