|-------------------------------------------------------------|-----|
| PART 1—PURE AND COMMERCIAL ALUMINUM                         | 1   |
| Chapter 1-1 Composition                                     | 3   |
| 1-2 Structure                                               | 11  |
| 1-3 Thermal Properties                                      | 56  |
| 1-4 Mechanical Properties                                   | 68  |
| 1-5 Electrical, Magnetic Properties                         | 96  |
| 1-6 Radiation                                               | 107 |
| 1-7 Chemical Properties                                     | 120 |
| 1-8 Technological Properties                                | 173 |
| PART 2—BINARY ALLOYS                                        | 211 |
| PART 3—TERNARY, QUATERNARY, ETC., ALLOYS                    | 417 |
| PART 4—COMMERCIAL ALLOYS                                    | 691 |
| Chapter 4-1 Aluminum—Copper Alloys                          | 693 |
| 4-2 Aluminum—Silicon, Aluminum—Magnesium Silicide Alloys    | 759 |
| 4-3 Aluminum—Magnesium, Aluminum—Manganese Alloys           | 806 |
| 4-4 Aluminum—Zinc Alloys                                    | 842 |
| 4-5 Miscellaneous Alloys                                    | 883 |
| APPENDIXES                                                  |     |
| Appendix 1 Metric Units and their Conversion to Other Units | 907 |
| 2 Temperature Conversion                                    | 910 |
| 3 Conversion from Atomic to Weight Per Cent                 | 913 |
| 4 Abbreviations Used in the References                      | 917 |
| 5 Additional References                                     | 918 |
| INDEX                                                       | 961 |
