

CONTENTS

Preface	page v
Sir Nevill Mott	xi
Publications of Professor N. F. Mott	xiii
1 Point defects, by J. D. ESHELBY	1
1.1 <i>Introduction</i>	1
1.2 <i>Types of defect. Their formation by thermal activation, irradiation and plastic deformation</i>	1
1.3 <i>The mobility of point defects</i>	8
1.4 <i>The physical properties of defects</i>	15
1.4.1 <i>Theory</i>	15
1.4.2 <i>Experimental measurement</i>	26
1.5 <i>Interaction energies of point defects</i>	33
2 Crystal Dislocations, by F. C. FRANK and J. W. STEEDS	43
2.1 <i>Introduction</i>	43
2.2 <i>One-dimensional models</i>	47
2.3 <i>Peierls–Nabarro model</i>	50
2.4 <i>Edge dislocation in a cylinder</i>	53
2.5 <i>More general dislocation lines</i>	57
2.6 <i>Straight dislocations in anisotropic elasticity</i>	59
2.7 <i>Flexible nature of dislocations</i>	65
2.8 <i>Entropy of a dislocation line</i>	67
2.9 <i>Burgers vector</i>	68
2.10 <i>Motion of dislocations</i>	70
2.11 <i>Interaction between dislocations and point defects</i>	70
2.12 <i>Interaction of parallel dislocations</i>	73
2.13 <i>Extended dislocations</i>	75
2.14 <i>Cross-slip</i>	77
2.15 <i>Adding of dislocations</i>	77
2.16 <i>Dislocation locks</i>	77
2.17 <i>Intercrystalline boundaries</i>	79
2.18 <i>Forces on dislocations</i>	83
2.19 <i>The force for glide motion</i>	83
2.20 <i>Forces for climb motion</i>	84
2.21 <i>Pile-up equilibrium</i>	84
2.22 <i>The origin of dislocations</i>	85

2.23	<i>Formation of kink bands</i>	page 85
2.24	<i>Adsorption and precipitation at dislocations</i>	86
2.25	<i>Interaction of electrons with dislocations</i>	86
2.26	<i>The work hardening curve</i>	86
2.27	<i>Jogs in dislocations</i>	86
2.28	<i>Jog dragging</i>	89
2.29	<i>Spiral processes</i>	93
3	Observations of defects in metals by electron microscopy, by M. J. WHELAN	98
3.1	<i>Introduction</i>	98
3.2	<i>Experimental techniques</i>	98
3.2.1	<i>Preparation of thin specimens for transmission electron microscopy</i>	98
3.2.2	<i>Electron microscopy</i>	101
3.3	<i>Interpretation of image contrast effects</i>	106
3.3.1	<i>Mechanism of contrast in crystalline materials</i>	106
3.3.2	<i>Kinematical treatment of contrast effects</i>	108
3.3.3	<i>Dynamical theory of contrast effects</i>	119
3.4	<i>Observations of defects in various metals</i>	126
3.4.1	<i>Polycrystalline metals</i>	126
3.4.2	<i>Quenched and irradiated metals</i>	135
3.5	<i>Quantitative information obtained by electron microscopy</i>	143
3.5.1	<i>Geometrical information</i>	143
3.5.2	<i>Measurement of stacking fault energy</i>	144
3.5.3	<i>Determination of Burgers vectors and the nature of faults and inclusions</i>	146
3.5.4	<i>The electrical resistivity of defects</i>	150
3.6	<i>Conclusion</i>	151
4	Solution and precipitation hardening, by F. R. N. NABARRO	152
4.1	<i>Introduction</i>	152
4.2	<i>Types of lattice defect</i>	152
4.3	<i>The interaction of dislocations and defects</i>	154
4.3.1	<i>Long-range interactions</i>	154
4.3.2	<i>Short-range interactions</i>	156
4.3.3	<i>Interactions with lattice order</i>	159
4.4	<i>Fixed and mobile defects</i>	160
4.4.1	<i>Dislocation locking</i>	161
4.4.2	<i>The drag produced by mobile defects</i>	163

CONTENTS

ix

4.5	<i>The mean force on a dislocation</i>	page 164
4.5.1	<i>Diffuse forces</i>	165
4.5.2	<i>Localised forces</i>	168
4.5.3	<i>Processions of dislocations</i>	172
4.6	<i>The flow stress at absolute zero</i>	174
4.6.1	<i>Solid solutions</i>	174
4.6.2	<i>Coherent precipitates</i>	177
4.6.3	<i>Incoherent precipitates</i>	179
4.6.4	<i>Short-range and long-range order</i>	180
4.7	<i>The temperature dependence of the flow stress</i>	182
4.8	<i>The stress-strain curve</i>	185
5	Work hardening, by P. B. HIRSCH	189
5.1	<i>Introduction</i>	189
5.2	<i>Nature of stress-strain curves</i>	190
5.3	<i>Slip line observations</i>	194
5.4	<i>Dislocation distributions</i>	197
5.5	<i>The flow stress</i>	210
5.6	<i>Work hardening theories</i>	215
5.6.1	<i>Stage I</i>	215
5.6.2	<i>Stage II</i>	230
6	Fracture, by A. H. COTTRELL	247
6.1	<i>Atomic forces and the strength of solids</i>	247
6.2	<i>Dislocations, cracks and faults</i>	249
6.3	<i>Classical cracks</i>	253
6.4	<i>Griffith cracks</i>	253
6.5	<i>Fracture at higher stresses: Notch sensitivity</i>	256
6.6	<i>Tensile fracture</i>	256
6.7	<i>Ideally brittle tensile fracture</i>	258
6.8	<i>Intrinsic brittleness and ductility</i>	260
6.9	<i>Magnitude of the Griffith stress</i>	263
6.10	<i>Ductile failure</i>	264
6.11	<i>Promotion of brittle fracture by plastic deformation</i>	269
6.12	<i>Thermal fractures</i>	273
6.13	<i>Chemical effects in fracture</i>	276
6.14	<i>Metal fatigue</i>	278
6.15	<i>Conclusion</i>	280
	Author index and bibliography	281
	Subject index	298
