LIST OF CONTRIBUTORS	ix
PREFACE	xi

Chapter 1. Introduction

J. M. Poate and James W. Mayer

I. Directed Energy Processing of Semiconductors	1
II. Energy Deposition and Heat Flow	4
III. Interfaces and Surfaces	7
IV. Epitaxy and Alloying	12
V. Surface Crystallization and Alloying—Perspectives	13
List of Symbols	14

Chapter 2. Crystallization Processes

Frans Spaepen and David Turnbull

I. Introduction	15
II. Concepts of Crystal Growth	17
III. Concepts of Nucleation	23
IV. Phase Transformations of Elemental Silicon	26
V. Nonequilibrium Impurity Incorporation during Crystal Growth	34
List of Symbols	39
References	41

Chapter 3. Fundamentals of Energy Deposition

Martin F. von Allmen

I. Introduction	43
II. Laser Beams	45

III. Electron Beams	63
IV. Heating by Laser and Electron Beams	69
V. Conclusions	72
References	73

Chapter 4. Heat Flow Calculations

Pietro Baeri and Salvatore Ugo Campisano

I. Introduction	75
II. The Mathematical Problem	77
III. The Role of the Absorption Coefficient	80
IV. Amorphous Silicon	84
V. Liquid-Solid Interface Velocity	89
VI. Other Semiconductors	93
VII. Impurity Redistribution	95
VIII. Continuum Lasers	101
Appendix A. Heat Transport	103
Appendix B. Mass Transport	106
List of Symbols	107
References	108

Chapter 5. Supersaturated Alloys, Solute Trapping, and Zone Refining

C. W. White, B. R. Appleton, and S. R. Wilson

I. Introduction	112
II. Experimental Approach	113
III. Model Calculations for Dopant Redistribution	113
IV. Results	117
V. Conclusions	144
References	145

Chapter 6. Microstructure and Topography

A. G. Cullis

I. Introduction	147
II. Annealing of Ion-Implanted Semiconductors	148
III. Annealing of Metal Films on Semiconductors	180
IV. Annealing of Other Semiconductors Layers	184
References	196

Chapter 7. Epitaxy by Pulsed Annealing of Ion-Implanted Silicon

Gaetano Foti and Emanuele Rimini

I. Introduction	203
II. Phase Transitions Induced by Laser or Electron Beam Pulses	206

CONTENTS	<i>vii</i>
-----------------	------------

III. Coupling of the Incident Beam with the Matrix	217
IV. Defects in Pulsed Annealing of Disordered Layers	222
V. Amorphous-to-Liquid Transition: Undercooling Effects	240
References	243

Chapter 8. Epitaxy of Deposited Si

J. M. Poate and J. C. Bean

I. Introduction	247
II. Homoepitaxy	249
III. Heteroepitaxy	264
IV. Lateral Si Epitaxy on Amorphous Substrates	266
V. Explosive Crystallization	276
References	278

Chapter 9. Surface Properties of Laser-Annealed Semiconductors

D. M. Zehner and C. W. White

I. Introduction	282
II. Experimental Approach	283
III. Preparation of Atomically Clean Surfaces	285
IV. Surface Structure of Laser-Annealed, Single-Crystal Semiconductor Surfaces	293
V. Surface Characterization of Ion-Implanted, Laser-Annealed Silicon	312
VI. Conclusions	322
References	323

Chapter 10. Solid Phase Regrowth

J. F. Gibbons and T. W. Sigmon

I. Solid Phase Regrowth and Diffusion Processes	325
II. Temperature Distributions and Solid Phase Reaction Rates Induced by a Scanning cw Laser	339
III. Experimental Analysis of cw Beam-Processed Semiconductor Materials	355
IV. Dopant Incorporation and Metastable Phases	368
V. Future Directions	378
References	379

Chapter 11. Compound Semiconductors

J. S. Williams

I. Introduction	383
II. Ion-Implanted Layers: Solid Phase Regrowth	385

III. Ion-Implanted Layers: Liquid Phase Regrowth	402
IV. GaAs Contacts and Deposited Layers	423
V. Other Compound Semiconductors	431
VI. Summary and Conclusions	432
References	435

Chapter 12. Silicides and Metastable Phases

Martin F. von Allmen and S. S. Lau

I. Introduction	439
II. Solid State Reactions—Silicide Formation	440
III. Melting, Mixing, and Quenching	444
IV. Experimental Results	459
References	476

Chapter 13. Factors Influencing Applications

C. Hill

I. Introduction	479
II. Modes of Beam Processing	481
III. Changes in Materials Parameters	483
IV. Control of the Heat Treatment Process	486
V. Processing Single-Phase Structures	506
VI. Processing Multiphase Structures	522
VII. Processing Large Areas	542
References	552
