

TABLE OF CONTENTS

Plenary Paper: Keeping the Dream Going Joseph K. Lees (<i>DuPont, Wilmington, DE, USA</i>)	3
1. KEYNOTE LECTURES	
Tribology of Polymer Composites K. Friedrich (<i>University of Kaiserslautern, Kaiserslautern, Germany</i>)	11
Strengthening and Deformation Mechanisms of Discontinuous Metal Matrix Composites R.J. Arsenault (<i>University of Maryland, College Park, Maryland, USA</i>)	19
Future Trends in Advanced Fibers and Composite Materials A.K. Dhingra and T.P. Doherty (<i>DuPont, Wilmington, DE. USA</i>)	29
Recent Work of Superplastic Composites K. Higashi* and M. Mabuchi** (* <i>University of Osaka, Osaka, Japan</i>) (** <i>Government Industrial Research Institute, Nagoya, Japan</i>)	35
Recent Advances In Bonded Composite Repair Technology For Metallic Aircraft Components A. A. Baker and R. J. Chester (<i>DSTO Aeronautical Research Laboratory, Melbourne, Australia</i>)	45
Compressive Strength of Composites: How to Measure it and How to Improve it M. R. Piggott (<i>University of Toronto, Toronto, Ontario, Canada</i>)	51
Development of Metalloceramic Friction Materials for Aircraft Brake C.G. Krishnadas Nair, D. Dutta and G. Mohan (<i>Hindustan Aeronautics Limited, Bangalore, India</i>)	61
Optimisation of Toughness and Strength in Properties in Fibre Composites Jang-Kyo Kim and Yiu-Wing Mai (<i>University of Sydney, Sydney, Australia</i>)	69
Three-Dimensional Analysis of Laminated Composite Plates A. E. Bogdanovich (<i>Latvian Academy of Sciences, Riga, Latvia</i>)	79

2. APPLICATIONS DEVELOPMENT

<p>Marine Applications for Advanced Composite Materials L.H. Hihara*, R. Bregman** and P.K. Takahashi** * <i>University of Hawaii at Manoa, Honolulu, Hawaii, USA</i> **<i>Hawaii Natural Energy Institute, University of Hawaii at Manoa, Honolulu, Hawaii, USA</i></p>	95
<p>America's Cup Yacht Structural Design: Finite Element Analysis and Laminate Optimisation John G. Hamilton* and Jocelyn M. Patterson** * <i>Lockheed Space Systems, Sunnyvale, CA, USA</i> **<i>Stanford University, Palo, Alto, CA, USA</i></p>	101
<p>Advanced Strategic Interceptor Composite Structures Douglas H. Ennis* and C. E. Patty Jr.** *<i>U.S. Army Strategic Command, Huntsville, Alabama 35807, USA</i> **<i>Teledyne Brown Engineering, Huntsville, Alabama 35807, USA</i></p>	109
<p>Design of a Hybrid Composite Roof Bar Paul J. Falzon and Madabhushi N. Janardhana <i>Royal Melbourne Institute of Technology, Melbourne, Australia</i></p>	115
<p>Flexural and Impact Properties of Sandwich Panels Used in Surfboard Construction J. A. Manning, A.G. Crosby and B. Bandyopedlyay <i>University of New South Wales, Kensington, NSW, Australia</i></p>	123
<p>Effect of Tow Size on the Thread Strength of 3-D Braided Graphite/Epoxy Composite P. Chen, J. Li, R. Reid and El-Shiekh <i>North Carolina State University, Raleigh, NC, USA</i></p>	129
<p>Testing Fracture and Shear Properties of Relevance to Tungsten Alloy Penetrator Performance R.L. Woodward <i>DSTO Materials Research Laboratory, Ascot Vale, Victoria, Australia</i></p>	135
<p>Development of High Density Ceramic Composites for Ballistic Applications Nevin L. Rupert*, Matthew S. Burkins*, William.A. Gooch*, M.J. Walz, N.F. Levoy and E.P. Waschilla** *<i>U.S. Army Ballistic Research Laboratory, Aberdeen Proving Ground, Maryland, USA</i> **<i>Nuclear Metals Incorporated, Concord, Massachusetts, USA</i></p>	141
<p>On the Test of Carbon/Carbon Composite Turbine Blade A. Okura, N. Tanatsugu, Y. Naruo, M. Tachibana, M. Yamashita, T. Nakagawa and T. Ueda <i>Institute of Space and Astronautical Science, Sagamihara-shi, Kanagawa-kén, Japan</i></p>	147
<p>Development of Ultra Thin Dimensionally Stable Composites for the Superconducting Super Collider (SSC) Elementary Particle Detections Timothy C. Thompson*, William O. Miller* and John H. Gleske** *<i>Los Alamos National Laboratory, Los Alamos, NM, USA</i> **<i>Sandia National Laboratory, Albuquerque, NM, USA</i></p>	155

Infrared Characteristics of Oxide Composites	163
S. Kohara and Y. Tomita <i>The Science University of Tokyo, Noda, Chiba, Japan</i>	
Magnetic-Marker System Using Finite Composite Materials	169
Masakazu Mayama <i>The Hokkaido Institute of Technology, Teine-ku, Sapporo, Japan</i>	
Development of Polymer-Ferro-Cements with Steel and Carbon Fibers	173
A. Shirai* and Y. Ohama**, * <i>Tokyo Kasei Gakuin University, Machida, Tokyo, Japan</i> ** <i>Nihon University, Koriyama, Fukushima-ken, Japan</i>	
Mechanical Properties of Aged RPM Piping	181
S.W. Hopkins, D. Duffner, P.R. Johnston, F.J. McGarry and W. Jewett <i>Failure Analysis Associates Inc., Menlo Park, California, USA</i>	
Strain Corrosion Cracking in RPM Sewer Piping	187
S.W. Hopkins, H.F. Wachob, F.J. McGarry, D. Duffner and P.R. Johnston <i>Failure Analysis Associates Inc., Menlo Park, California, USA</i>	
Cutting Performance of Alumina Based Ceramic Tools When Machining High Strength Steel	193
X. S. Li*, I. M. Low*, J. G. Wager**, D. S. Perera*** and B. H. O' Connor* * <i>Department of Applied Physics, Curtin University of Technology, Perth 6001, Australia</i> ** <i>Department of Mechanical Engineering, University of Western Australia, Nedlands 6009, Australia</i> *** <i>ANSTO, PMB 1, Menai 2234, Australia</i>	

3. DESIGN AND ANALYSIS

Design and Optimisation of Load Introduction Areas for Polymer Matrix Composites with the Help of Finite Element Analysis	203
W. Michaeli and D. Jürss <i>Aachen University of Technology, Aachen, Germany</i>	
A Finite Element Presentation of an Optimum Design for Composite Multilayered Cylindrical Pressure Vessels with Creep Relaxation	209
Faysal A. Kolkailah <i>California Polytechnic State University, San Luis Obispo, CA, USA</i>	
A Comparison of Analytical and Experimental Results for Composite Material I-Beams	215
James N. Craddock and S.C. Yen <i>Southern Illinois University, Carbondale, Illinois, USA</i>	
Finite Element Analysis of Terminating Plies in Advanced Fibre Composite Panels	223
C.D. Maydom*, A.C. Garg* and M.L. Scott** * <i>Aerospace Technologies of Australia Pty. Ltd. (ASTA), Victoria Australia</i> ** <i>Royal Melbourne Institute of Technology, Victoria, Australia</i>	

The Effect of Layup and Geometry on Localised Stresses in GRP Pressure Vessels	231
A.S. Tooth, W. M. Banks and C. P. Seah <i>University of Strathclyde, Glasgow, Scotland, UK</i>	
The Effects of Manufacturing Methods on the Buckling and Postbuckling Strength of Thin Skinned Carbon Fibre Composite Panels	239
B.G. Falzon and G.P. Steven <i>University of Sydney, Sydney, Australia</i>	
Postbuckling Behaviour of Graphite/Epoxy Laminated Cylindrical Panels under Axial Compression	247
C.S. Hong and J.H. Kweon <i>Korea Advanced Institute of Science and Technology, Kusong-dong, Yusung-ku, Daejeon, Korea</i>	
Some Theoretical and Numerical Approaches to Describing the Physio-Mechanical Properties of Polymer Composites	253
Y.G. Yanovsky and I.F. Obarztov <i>Institute of Applied Mechanics of Russia Academy of Sciences, Moscow, Russia</i>	
Development of a Theory for Optimising Sandwich Composites	259
J. R. Lingard <i>DSTO Materials Research Laboratory, Ascot Vale, Victoria, Australia</i>	
Modelling of Composite Materials and Multilayered Structures	267
Maurice Touratier <i>Laboratoire de Mecanique des Structures, ENSAM, Paris, France</i>	
Using Finite Element Analysis to Verify Micromechanical Models	275
James N. Craddock <i>Southern Illinois University, Carbondale, Illinois, USA</i>	
Saint Venant End Effects in Three Dimensional Cosserat Elastic Solids	281
S. Nakamura* and R.S. Lakes** <i>*The Yokohama Rubber Co., Oiwake, Hiratsuka, Kanagawa, Japan</i> <i>**University of Iowa, Iowa City, Iowa, USA</i>	
Particle Geometry Effects on a Stationary Crack	289
P. Lipetzky and S. Schmauder <i>Max-Planck Institute, Stuttgart, Germany</i>	
Vibration and Damping Characteristics of Composite Laminates Using Shear Deformable Finite Element	295
K.N. Koo and I. Lee <i>Korea Advanced Institute of Science and Technology, Kusung-dong, Yusung-ku, Taejeon, Korea</i>	
A Simple Method of Obtaining "Exact" Values of the Natural Frequencies of Vibration for some Composite Laminated Structures for Civil Construction	301
D.H. Kim <i>Korea Composites, Gugi-dong, Chongro, Seoul, Korea</i>	

Thermal Effect on the Linear and Non-Linear Analysis of Cross-Ply Laminated Plates	307
Sen Yung Lee and Jeng Jog Ou <i>National Cheng Kung University, Tainan, Taiwan</i>	
Stress Field in Postbuckled Stiffeners Loaded in Compressor	315
N. Uda*, L. Parnas** and E.A. Armanios <i>*Dept. of Aeronautics & Astronauts, Kyushi University, Fukuoka, Japan</i> <i>Georgia Institute of Technology, Atlanta, GA, USA</i>	
Application of Superposition Method to the Thermal Stress Problem in Composites	323
N. Chandra and Z.-Y. Xie <i>Florida A&M University, Tallahassee, Florida, USA</i>	

4. INTERLAMINAR STRESSES

A New Method for Interlaminar Stress Analysis in Symmetric Laminates Containing a Circular Hole	331
Chien-Chang Lin and Chu-Cheng Ko <i>Institute of Applied Mathematics, National Chung-Hsing University, Taichung, Taiwan, ROC</i>	
On the Prediction of Delamination Initiation	335
Paul A. Lagace and N.V. Bhat <i>Massachusetts Institute of Technology, Cambridge, MA, USA</i>	
Approximate Free-Edge Stresses in an Orthotropic Laminated Composite Under Uniaxial Inplane Loading	343
James M. Whitney <i>University of Dayton, Dayton, Ohio, USA</i>	
On Stitching as a Method for Improving the Delamination Resistance of CFRPs	351
Kimberley Dransfield, Caroline Baillie and Yiu-Wing Mai <i>Centre for Advanced Materials Technology, University of Sydney, Sydney, Australia</i>	
Nonlinear Fracture Mechanics Modelling of Mode 1 and Mixed - Mode Edge Delamination in Carbon Epoxy Composites	359
J.C.J. Schellekens and R. de Brost <i>Delft University of Technology, Delft, Netherlands</i>	
Flexural Vibration of Delaminated Composite Sandwich Beams	367
Chyanbin Hwu and Jian Shiun Hu <i>National Cheng Kung University Tainan, Taiwan</i>	
Compression Failure Behaviour of CFRP Strips Containing Delaminations	373
G. Steinmetz and F.J. Arendts <i>University of Stuttgart, Stuttgart, Germany</i>	
Realization of Properties of Inclusions in Composites: Effect of Interface and Particle Aggregation	381
Y.A. Dzenis <i>University of Texas, Arlington, Texas</i>	

Interface Stresses in Laminated Cylindrical Shells 389
J. T. S Wang and C.C. Lin
National Chung-Hsing University, Taichung, Taiwan, ROC

Crack Tip Elements for Interface Cracks in Composite Materials 395
C.H. Liu and J.D. Tsai
Tamkang University, Tamsui Taipei County, Taiwan, ROC

Stacking Sequence Effect on Fatigue Delamination Behavior of Orthotropic Graphite Epoxy Laminates 399
T. Kevin O'Brien
U.S. Army Aerostructures Directorate, NASA Langley Research Center, Hampton, Virginia, USA

5. PROCESSING

Advanced Textile Structural Composites - Status and Outcome 409
F. J. Arendts*, K. Drechsler** and J. Brandt**,
**University of Stuttgart, Stuttgart, Germany,*
***Deutsche Aerospace, Ottobrunn, Germany*

The interface and Its Effect on the Properties of Composites 417
Yee Fook Cheong and W. C. Lam
Nanyang Technological University, Nanyang Crescent, Singapore

Effect of Chemical Treatment of Aramid Fibers on Thier Adhesion Performance with Polyester Resin 423
M.G. Stevens and A.H. Massoudi
University of Technology, Sydney, Australia

Influence of Fibre Surface Treatment on the Transverse Properties of Carbon Fiber Reinforced Composites 427
J.M.M. de Kok, E.J. Van Klinken and A.A.J.M. Peijs
Eindhoven University of Technology, Eindhoven, The Netherlands

Preadhesion Surface Laser Treatments of Composite Polymer and Metal Adherends 433
H. Dodiuk*, A. Buchman*, M. Rotel** and J. Tachai**
**RAFAEL, Haifa, Israel,*
***Israel Institute of Metals, Technion - **Israel Institute of Technology, Haifa, Israel*

Pultruded Fiber Reinforced PU/PMMA IPNS Composites: Processability and Mechanical Properties 441
C. H. Chen and C.C.M. Ma,
National Tsing Hua University, Taiwan, ROC

Simulation of the Geodesic and Non Geodesic Trajectories of the Filament Winding 449
Jose A.O. Simoes, A.T. Marques and Paul M.S.T. de Castro
University of Porto, Porto, Portugal

Surface Preparation of Adhesively Bonded Joints	455
I. Hogg and M.N. Janardhana <i>RMIT, Melbourne, Australia</i>	
Laboratory-Scale Unidirectional Tape Prepregger	463
R.S.P. Coutts <i>CSIRO, Division of Forest Products, Victoria, Australia</i>	
Curing Process - Dynamic Viscoelasticity Relationship for Polyurethane-Modified Epoxy	467
K. C. Cheng and Wen-Yen Chiu <i>National Taiwan University, Taipei, Taiwan, ROC</i>	
Electron Curing - A New Technology for Polymer Matrix Composites	471
D.R. Kerluke, C.B. Saunders and A.J. Stirling <i>AECL Accelerators, Ontario, Canada</i>	
Processing and Characterisation of Ceramic Superconductor/ Polymer Composites	477
R.G. Kander and S. L. Nanboodri <i>Virginia Polytechnic Institute & State University, Blacksburg, Va, USA</i>	
Fiber-Slip Model for the Prediction of Spring-In Composite Laminated Bends	485
C.G. Kim <i>Korea Advanced Institute of Science and Technology, Taejon, Korea</i>	
Aluminum/Lithium Alloy - CCFRP Hybrid Laminates: Fabrication and Properties	491
G. Fleischmidt*, R.S.P. Coutts* and M. N. Janardhana** * <i>CSIRO, Clayton, Victoria, Australia</i> ** <i>Royal Melbourne Institute of Technology, Melbourne, Victoria, Australia</i>	
The Cure Process and Temperature Profiles	495
R.B. Heslehurst <i>Dept. of Aerospace & Mechanical Engineering, Australian Defence Force Academy, Canberra, Australia</i>	

6. MECHANICAL BEHAVIOUR

Effect of Constituent Property Evolution on Durability and Damage Tolerance of Material Systems	505
K. Reifsnider <i>Virginia Polytechnic Institute & State University, Blacksburg, VA, USA</i>	
Long Term Behaviour of Polymer Based Composite Systems Under Complex Loading	511
A.H. Cardon, D. Van Hemelrijck, C.C. Hiel and Y. Qin <i>University of Brussels, Brussels, Belgium</i>	
Fatigue Life Predictions for Carbon Fibre Reinforced Composite Materials Subjected to Reversed Cycle Loading	513
T. Adam, N. Gathercole, B. Harris and H. Reiter <i>University of Bath, Bath, U.K.</i>	

Short-Term and Long-Term Behaviour of Glass-Fibre Matrix Composite Materials under Monoaxial and Biaxial Loading as a Function of the Interface Quality	517
P. Krawczak and J. Pabiot <i>Ecole des Mines de Douai, Douai Cedex, France</i>	
Effect of Hot/Wet Environments on the Fatigue Behaviour of Composites to Metal Mechanically Fastened Joints	525
S.C. Galea* and D.S. Saunders** <i>*Aeronautical Research Laboratory, Fishermens Bend, Victoria, Australia, **Defence Science and Technology Organisation, Ascot Vale, Victoria, Australia</i>	
Behaviour of Cellular Foam Core Materials in GRP Sandwich Under Fatigue	533
O. Aamlid, A.T. Echtermeyer, D. McGeorge and L. Buene <i>Det Norske Veritas Research AS, Hovik, Norway</i>	
The Effect of $\pm 45^\circ$ Fraction Volume to the Strength and the Failure Mode of Riveted Joint in Aramid/Epoxy Composite Materials	541
PengundjungenTarigan and Baskoro Wirawan <i>The Indonesian Aircraft Industries Ltd., PT.IPTN, Bandung, Indonesia</i>	
Static and Dynamic Performance of Notched LDF/PEKK Composites	547
H.A. Whitworth*, S.G. Llorente** and Robert Croman*** <i>*Howard University, Washington, DC, USA **Boeing, Seattle, Washington, USA ***DuPont, Wilmington, DE, USA</i>	
Effects of Various Glass and Aramid Reinforcements on Static and Fatigue Properties of Composites	553
Adreas T. Echtermeyer, D. McGeorge and L. Buene <i>Det Norske-Veritas Research, Hovik, Norway</i>	
Static and Fatigue Fracture Characteristics of Rubber Modified Epoxy Adhesives	561
Y. Hosaka*, K. Miyazaki*, T. Fujii*, H. Okubo**, K. Nejigaki** and K. Kurosawa <i>*Doshisha University, Kamigyoku, Kyoto, Japan **Research and Development Center, JSR, Yokkaichi, Mie, Japan</i>	
Comparative Study of Flexural Fatigue Properties of Epoxy and PEEK Composites and Materials	569
J.P. Trotignon and J. Verdu, <i>ENSAM, Paris, France</i>	
Fatigue Behaviour of Mineral Filled Polyamide 66	573
J.P. Trotignon, L. Demdorem and J. Verdu, <i>ENSAM, Paris, France</i>	
Deterministic and Probabilistic Prediction of the Distribution of Inter-Fibreube loaded Failure Test Data of Prestrained CFRP Tubes Composed of Thin Layers and Loaded by Radial Pressure	579
R.G. Cuntze <i>MAN Technologie AG, München, D.</i>	

Prediction of Residual Strength of Impact Damaged Aerospace Composite Structures	587
A. Garg <i>Aerospace Technologies of Australia Ply Ltd, Port Melbourne, Victoria, Australia</i>	
Impact Tolerance of 3-D Reinforced Graphite Epoxy Panels	591
S. Voss, A. Fahmy and H. West <i>North Carolina State University, Raleigh, NC, USA</i>	
Effect of Moisture Absorption on the Impact Behaviour of Unidirectional Carbon Fiber Reinforced Nylon 6 Composite	597
Chi-Wen Lin, <i>China Steel Corporation, Hslao Kang, Kaohslung, Taiwan</i>	
Creep of High Temperature Composites	603
K. Sadananda* and C.R. Feng <i>*Naval Research Lab, Washington, DC, USA</i>	
Low Velocity Impact Resistance of Graphite/BMI	611
E. Demuts <i>Flight Dynamics Directorate, Wright Laboratory, USAF, USA</i>	
Low Velocity Impact of Inclined CSM Composite Plates	617
I.H. Marshall, W.S. Arnold and S. Madjidi <i>Department of Mechanical and Manufacturing Engineering, Paisley College, Paisley, UK</i>	
Tensile and Impact Behaviour of Natural Fibre-Reinforced Composite Materials	623
Benjamin C. Tobias <i>Victoria University of Technology, Melbourne, Victoria, Australia</i>	
Tensile and Fracture Toughness Properties of Alumina Trihydrate Filled Epoxy Resins	629
Geoffrey Pritchard and Robin Wainwright <i>Kingston University, Surrey, UK</i>	
Degradation Phenomena of Fracture Toughness of SMC Immersed in Acid Condition	637
Satoshi Somiya and T. Morshita <i>Keio University, Kohokuku, Yokohama, Japan</i>	
An Evaluation of Mechanical and Adhesion Properties of Advanced Fibrous Composite Materials	643
M.N. Janardhana, D.K. Sood and H.G. Yeo <i>RMIT, Latrobe St., Melbourne, Victoria, Australia</i>	
Influence of Hole Size in Static Strength and Fatigue of CFRP Composite Materials	651
M. C. Yip and T. B. Peng <i>Natinal Tsing Hua University, Hsinchu, Taiwan, R. O. C.</i>	

7. ENABLING TECHNOLOGIES

- Intelligent Composites and Structures - A Review** 661
Bor Z. Jang
Auburn University, Auburn, AL, USA
- Intelligent Material Systems and Structure - The Interface** 669
O. Dickman, M. Kowalska and S. Savage
National Defence Research Establishment, Sundbyberg, Sweden
- Advanced Aerospace Composite Material Structural Design Using Artificial Intelligent Technology** 675
S.H.Sun*, W.C. Hwang**, and J.L. Chen*
*National Cheng Kung University, Tainan, Taiwan
**Chung Shan Institute of Science and Technology, Lung-Tan, Taiwan, ROC
- Application of Holographic Interferometry in the Detection of Flaws in Composite Plates** 683
T.E. Tay, H.M. Shang and M. Lwin
National University of Singapore, Kent Ridge, Singapore
- Portable Holographic Interferometry Testing System: Application to Crack Patching Quality Control** 687
R.B. Heslehurst, J.P. Baird, H.M. Williamson and R. Clark
University of New South Wales Australian Defence Force Academy, Canberra, ACT
- Applications of Speckle Shearing Interferometry to Strain Measurements of Composites** 693
T.Y. Chen and I.L. Fan
National Cheng Kung University, Tainan, Taiwan, ROC
- Ultrasonic Non-Destructive Evaluation of Foreign Objects in Composite Laminates** 699
David K. Hsu and Michael S. Hughes
Iowa State University, Ames, Iowa, USA
- Detection and Analysis of Defects in Composite Materials** 707
R. Frankle, S. Warmboldt, P. Woytowitz, R. Menich and P. Johnston
Failure Analysis Associates, Inc., Menlo Park, CA, USA
- Fracture Analysis of Composite Materials by Using Photoelastic Technique** 713
S.Q. Zhang, J. Wang, J.B. Zu and H. Sun
Singapore Institute of Standards and Industrial Research, Singapore
- A Comparison of Two Stage Fibre Interfaces Tests** 715
C.A. Baillie, J.K. Kim and Y.W. Mai
University of Sydney, Australia
- Effect of Machining on the Performance of Carbon/Epoxy 3-D Woven Composites** 723
Mansour Mohamed*, Cheryl Carlson*, Pu Gu* and Robert Sadler**
*North Carolina State University, Raleigh, NC, USA
**State University, Greensboro, NC, USA

Bonded Repair of a Plate with Inclined Central Crack Under Biaxial Loading	729
Ching-Hwei Chue and Jang-Shing Tsai <i>National Cheng-Kung University, Tainan, Taiwan</i>	
A Simplified Method for Evaluating the Orientation Distribution of Short Fibers	735
H. Hirai <i>Government Industrial Research Institute of Kyushu, Shuku-machi, Tosu, Saga, Japan</i>	
Wear Behaviour of Composite Laminates with Hard Superfacial Layers	743
I. Crivelli-Visconti, A. Langella and P. Capuano <i>Pizzale Tecchio, Naples, Italy</i>	
Improvement in the Surface Quality of Structural Components Produced by the RTM-Process	749
W. Michaeli and J. Dyckhoff <i>Institute of Plastics Processing at Aachen University of Technology, Aachen, Germany</i>	
Hybridization as a Concept for Damage Management in Advanced Composites	755
A.A.J.M. Peijs, R.W. Venderbosch and J.M.M. de Kok <i>Eindhoven University of Technology, Eindhoven, The Netherlands</i>	
Strategic Initiative to Support Research in Advanced Materials by Irish Government & EC	763
M.S.J. Hashmi and A. Kennedy	

8. FIBERS AND RESINS DEVELOPMENTS

On Hollow Carbon Fiber - Reinforced Composite Materials	771
B.S. Rhee, H.B. Shim and J.I. Lee <i>Chungnam, National University, Deajon, Korea</i>	
Plasma Surface Treatment on Carbon Fibres by Nitrogenated Compounds	779
C. Lefebvre and J. Verbist <i>Facultes Universitaires Notre Dame de La Paix, Namur, Belgium</i>	
Properties of Advanced Fibers for Reinforcing Metal and Ceramic Matrix Composites	785
John Porter <i>Rockwell International Corporation Science Center, Thousand Oaks, CA, USA</i>	
Reduction Growth of Whiskers of Several Metals and Alloys	791
Kiyoshi Kishi, Mitsuhiro Tamura and A. Suzuki <i>Science University of Tokyo, Kagurazaka, Shinjuku-ku, Tokyo, Japan</i>	
Torsional Fatigue of Aramid Fibres	797
S. Kawbata* and M. Sera** <i>*Kyoto University, Kyoto, Japan</i> <i>**Idemitsu Kosan Co., Japan</i>	

Compressive Strength of Carbon Fibers	803
Yoshihiro Sawada, Kazuhiro Fujita and Yoichiro Nakachiro <i>Government Industrial Research Institute of Osaka, Ikeda, Osaka, Japan</i>	
New High Temperature Matrix Resin Systems for Use in Advanced Composites	809
R. Eibel, G. Hawthorne, J. Hodgkin, M. Jackson and T. Morton <i>CSIRO, Division of Chemicals and Polymers, Clayton, Victoria, Australia</i>	
New Epoxy Resin Systems for Aerospace Composites	815
R. Eibel, G. Hawthorne, J. Hodgkin, M. Jackson, J. Loder and T. Morton <i>CSIRO, Clayton, Australia.</i>	
Test Rate and Temperature Dependence of Thermoplastic Modified Epoxy Systems	821
D. Ding and C.Y. Tseng, <i>Feng Chia University, Taichung, ROC</i>	
The Influence of Network Density and Material Critical Thickness on the Ultimate Toughness of Polymers	829
M.C.M van der Sanden, H.E.H. Meijer, and J.J. Crevecoeur <i>Centre for Polymers and Composites, Eindhoven University of Technology, Eindhoven, The Netherlands</i>	
Polymer Blends Based on Epoxy Resin and Polyphenylene Ether Resin as a Matrix Material for High-Performance Composites	837
R.W. Venderbosch, J.G.L. Nelissen, A.A.J. Peijs, J. Bussink, H.E.H. Meijer and P.J. Lemstra <i>Centre for Polymers and Composites, Eindhoven University of Technology, Eindhoven, The Netherlands</i>	
Influence of Carboxyl - Terminated Butadiene Acrylonitrile Copolymer (CTBN) in Carbon/Epoxy Composites on the Property Changes in Medium High Temperatures	843
Jae Rock Lee and Joon Hyung Kim <i>Korea Research Institute of Chemical Technology, Daedeog Danji, Korea</i>	
Self Reinforcing Polymer Composites	849
S. Kenig <i>Israel Plastics & Rubber Centre, Haifa, Israel</i>	
Structure - Mechanical Property Relationship in Thermotropic Liquid Crystalline Polymer and its Fibre Reinforced Composite	855
Robert K.Y. Li*, S. Lu*, C.L. Choy*** and C. McCall** <i>*Department of Applied Science, City Polytechnic of Hong Kong, Hong Kong</i> <i>**Department of Manufacturing Engineering, Hong Kong Polytechnic</i> <i>***Department of Applied Physics, Hong Kong Polytechnic</i>	
Sliding Wear Resistance of Epoxy Polymers Against Stainless Steel	861
G.M. Spinks, L. Simovski, and M. Samandi <i>University of Wollongong, Wollongong, Australia</i>	

9. Thermoplastic Composites

- Diaphragm Forming of Continuous-Fibre Reinforced Thermoplastics Suitable for Medium-Scale Production** 869
W. Michaeli and M. Jehrke
Institute of Plastics Processing (IKV), Aachen, Germany
- Forming the Fibre Reinforced Thermoplastic Sheets** 875
D. Bhattacharyya, C.R. Burt and T.A. Martin
Department of Mechanical Engineering, University of Auckland, New Zealand
- High Performance Thermoplastic Composites Fabricated by Filament Winding** 883
883
Bernd Lauke*, Andreas Schone* and Klaus Friedrich**
* *Institute of Polymer Research, Dresden, Germany*
***Institute for Composite Materials, Kaiserslautern, Germany*
- Consolidation Behaviour of Powder Impregnated Fiber Bundles in Manufacturing of Thermoplastic Composites** 891
L. Ye* and K. Friedrich**
**The University of Sydney, Australia*
** *University of Kaiserslautern, Germany*
- Non-Isothermal Process Simulation or Compression Molding with Glass Fibre Reinforced Thermoplastic Materials** 897
W. Michaeli, and M. Heber
Aachen University of Technology, Aachen, Germany
- Quick, Stable, Safe and Economical Preheating of Glass Mat Reinforced Thermoplastics in a Contact Heating Oven** 903
Walter Michaeli and J. Starke
Aachen University of Technology, Aachen, Germany
- Long Fiber Thermoplastics Materials for Non-Injection Molding Process** 909
