

Table of Contents

| | |
|--------------------|---|
| Foreword | v |
|--------------------|---|

EFFECT OF HYDROGEN ON MECHANICAL AND PHYSICAL BEHAVIOR

| | |
|---|----|
| Effect of H on Structure and Bonding | 3 |
| <i>W.D. Wilson and S.C. Keeton</i> | |
| Importance of Stress State on Hydrogen Embrittlement | 25 |
| <i>M.R. Louthan, Jr., R.P. McNitt, and R.D. Sisson</i> | |
| Quantitative Metallography and Fractography in Hydrogen Embrittlement Studies | 43 |
| <i>Anthony W. Thompson and I.M. Bernstein</i> | |
| Tritium Autoradiography | 61 |
| <i>George R. Caskey, Jr.</i> | |
| Interaction of Hydrogen with Dislocations | 77 |
| <i>R. Kircheim</i> | |

HYDROGEN TRANSPORT

| | |
|--|-----|
| The Use of the Electrochemical Permeation Technique to Study Hydrogen Transport and Trapping in Iron | 89 |
| <i>I.M. Bernstein and Anthony W. Thompson</i> | |
| Gaseous Permeation Technique for Studying Hydrogen Permeation in Metals at Low Temperatures | 105 |
| <i>Ruey-Way Lin and Herbert H. Johnson</i> | |
| Hydrogen Permeation in Iron at Low Temperatures | 119 |
| <i>Michael Surkein and Robert Heidersbach</i> | |

CHARACTERIZATION OF HYDROGEN ON OR NEAR SURFACES

| | |
|--|-----|
| Hydrogen on Metal Surfaces | 135 |
| <i>T.E. Fisher</i> | |
| Application of High Resolution Secondary Ion Mass Spectrometer Techniques (Ion Probe) to Studies of Hydrogen in Metals | 149 |
| <i>H.K. Birnbaum, H. Fukushima, and J. Baker</i> | |
| The Chemisorption-Induced Resistance Change and Its Application to Determinating H ₂ /Fe Chemisorption Kinetics | 155 |
| <i>M.R. Shanabarger</i> | |

| | |
|---|-----|
| High Performance Time-of-Flight Atom-Probe for Hydrogen Characterization in Metals | 171 |
| <i>T. Sakurai and H.W. Pickering</i> | |
| The Application of Magnetization and Work Function Techniques to Study the Reactions of H ₂ on Metals | 183 |
| <i>R.W. Pasco and P.J. Ficalora</i> | |
| A Surface Acoustic Wave Technique for the Study of H Entry | 189 |
| <i>N.F. Fiore, E. Lunarska, and A. Zielinski</i> | |

HYDROGEN DISTRIBUTION MEASUREMENT BY NUCLEAR REACTION ANALYSIS

| | |
|---|-----|
| Nuclear Reaction Analysis for Hydrogen | 201 |
| <i>W.A. Lanford</i> | |
| Applications of Nuclear Reaction Analysis for Determining Hydrogen and Deuterium Distribution in Metals | 211 |
| <i>Carl J. Altstetter</i> | |
| Evaluation of Stress-Induced Hydrogen and Deuterium Redistribution in Titanium Alloys Using Nuclear Reaction Analysis | 233 |
| <i>R.L. Schulte and P.N. Adler</i> | |
| Subject Index | 245 |
| Author Index | 251 |
