

Table of Contents

Distribution, Consumption, Pricing, and Outlook of the Lithium Industry <i>H. R. Grady</i>	1
Lithium Reactivity and Containment <i>W. A. Averill, D. L. Olson, D. K. Matlock, and G. R. Edwards</i>	9
Aluminum-Lithium Dispersion Alloys <i>Ricardo O. Bach</i>	29
Overview of D.C. Casting <i>C. M. Adam</i>	37
Casting Problems Specific to Aluminum-Lithium Alloys <i>A. P. Divecha and S. D. Karmarkar</i>	49
Al-Li-X Alloys: An Overview <i>T. H. Sanders, Jr.</i>	63
A Perspective on the Development of Aluminum-Lithium Alloys <i>Edward S. Balmuth and Richard Schmidt</i>	69
Microstructural Characteristics of Al-Li Alloys <i>D. B. Williams</i>	89
Relationship Between Microstructure and Mechanical Properties of Aluminum-Lithium-Magnesium Alloys <i>K. Dinsdale, S. J. Harris, and B. Noble</i>	101
Alloying Additions and Property Modification in Aluminum-Lithium - X Systems <i>F. W. Gayle</i>	119
Grain Boundary Segregation and Intergranular Failure <i>C. L. White</i>	141
Structure and Properties of Rapidly Solidified 2000 Series Al-Li Alloys <i>N. J. Grant, S. Kang, and W. Wang</i>	171
Microstructure and Deformation of Rapidly Solidified Al-3Li Alloys Containing Incoherent Dispersoids <i>K. K. Sankaran, S. M. L. Sastry, and J. E. O'Neal</i>	189
Structure and Properties of Splat Quenched 2024-Aluminum Alloy Containing Lithium Additions <i>K. K. Sankaran and N. J. Grant</i>	205
Toughness and Ductility of Aluminum-Lithium Alloys Prepared by Powder Metallurgy and Ingot Metallurgy <i>Donald Webster</i>	228

The Design and Mechanical Properties of Rapidly Solidified Al-Li-X Alloys <i>I. G. Palmer, R. E. Lewis, and D. D. Crooks</i>	241
A Comparison of Microstructure and Tensile Properties of P/M and I/M Al-Li-X Alloys <i>A. Gysler, R. Crooks, and E. A. Starke, Jr.</i>	263
The Effect of Microstructure and Moisture on the Low Cycle Fatigue and Fatigue Crack Propagation of Two Al-Li-X Alloys <i>E. J. Coyne, Jr., T. H. Sanders, Jr., and E. A. Starke, Jr.</i>	293
Microstructure, Deformation, and Corrosion-Fatigue Behavior of a Rapidly Solidified Al-Li-Cu-Mn Alloy <i>P. S. Pao, K. K. Sankaran, and J. E. O'Neal</i>	307
High Temperature Oxidation Studies of Al-3wt%Li, Al-4.2wt%Mg, and Al-3wt%Li-2wt%Mg Alloys <i>D. J. Field, E. P. Butler, and G. M. Scamans</i>	325
The Influence of Microstructure on the Corrosion of Al-Li, Al-Li-Mn, Al-Li-Mg and Al-Li-Cu Alloys in 3.5% NaCl Solution <i>P. Niskanen, T. H. Sanders, Jr., M. Marek, and J. G. Rinker</i>	347
