

CONTENTS

<i>Preface</i>	v
Plenary Paper: Impact damage in composites—development, consequences and prevention	3.1
G. DOREY (<i>Royal Aircraft Establishment, Farnborough, UK</i>)	
Impact	
Criticality of impact damage in composite sandwich structures	3.27
T. GOTTESMAN, M. BASS, A. SAMUEL (<i>Israel Aircraft Industries, Israel</i>)	
Effects of specimen dimensions on the specific energy absorption of fibre composite tubes	3.36
A. H. FAIRFULL, D. HULL (<i>University of Cambridge, UK</i>)	
The impact properties of metal-composite laminates	3.46
P. J. HOGG, A. AHMADNIA (<i>Queen Mary College, London, UK</i>)	
Energy absorption in composite materials for crashworthy structures	3.57
G. L. FARLEY (<i>NASA Langley Research Center, USAARTA-AVSCOM, Hampton, VA, USA</i>)	
Correlation of plastics and GFRP impact strengths obtained by conventional pendulum type and linear probe type impact testing machines	3.67
T. HAYASHI (<i>Japan High Polymer Centre, Tokyo, Japan</i>), S. ARAI (<i>Toray Industry Inc., Nagoya City, Japan</i>)	
Studies of transverse impact damage in composite materials using a Hopkinson type pressure-bar technique	3.76
R. K. Y. LI, J. HARDING (<i>University of Oxford, UK</i>)	

Through-the-thickness tensile impact fracture of thermosetting and thermoplastic polymer composite plates	3.86
N. TAKEDA, H. KOMATSU, K. TAKAHASHI (<i>Kyushu University, Fukuoka, Japan</i>)	
Correlation of impact and delamination resistance in interleaved laminates	3.96
J. E. MASTERS (<i>American Cyanamid Co., Stamford, CT, USA</i>)	
Impact behaviour of composite laminates	3.108
J. F. LICEAGA, J. J. IMAZ SAN MIGUEL (<i>INASMET, San Sebastian, Spain</i>)	

Damage Mechanisms

Analysis of damage initiation in composite materials	3.117
XUE YUAN-DE (<i>Tongji University, Shanghai, PR China</i>)	
Computer simulation of the transverse cracking process in glass fibre composites	3.123
P. A. SHEARD (<i>Koninklijke/Shell-Laboratorium, Amsterdam, The Netherlands</i>), F. R. JONES (<i>University of Sheffield, UK</i>)	
The effects of shear resistance at fiber ends on the damage propagation	3.136
Y. TAKAO (<i>Kyushu University, Fukuoka, Japan</i>)	
Damage growth in composite laminates with interleaves	3.146
A. K. KAW, J. G. GOREE (<i>Clemson University, Clemson, SC, USA</i>)	
Observations on transverse ply crack growth in a $(0/90_2)_s$ CFRP laminate under monotonic and cyclic loading	3.156
L. BONIFACE, P. A. SMITH, S. L. OGIN, M. G. BADER (<i>University of Surrey, Guildford, UK</i>)	
On the modulus of KFRP laminates in static and fatigue loading	3.166
H. L. GANCZAKOWSKI, P. A. SMITH, P. W. R. BEAUMONT (<i>University of Cambridge, UK</i>)	
Microscopic inner materials damage due to two level fatigue in composites	3.176
A. KOBAYASHI, N. OHTANI, K. B. CHOI (<i>Institute of Interdisciplinary Research, University of Tokyo, Japan</i>)	

Fiber fracture in composite laminates 3.185
R. D. JAMISON (*US Naval Academy, Annapolis, MD, USA*)

Fracture

Fracture mechanics of unidirectional composites containing an elliptical hole 3.200
J. A. NAIRN (*University of Utah, Salt Lake City, UT, USA*)

Matrix cracking in fibre-reinforced and laminated composites 3.210
A. KELLY (*University of Surrey, Guildford, UK*), L. N. MCCARTNEY (*National Physical Laboratory, Teddington, UK*)

Influence of elastic anisotropy on the fracture toughness of CFRP composites 3.223
H. KASANO, K. HATANO, H. MATSUMOTO (*Tokyo Institute of Technology, Tokyo, Japan*), I. NAKAHARA (*Scientific and Technological College, Tokyo, Japan*)

Large displacement effects in the DCB test for interlaminar fracture in Modes I and II 3.233
J. G. WILLIAMS (*Imperial College, London, UK*)

FEM analysis of mixed mode fracture in the Iosipescu shear test . . . 3.243
M. KUMOSA, D. HULL (*University of Cambridge, UK*)

Interlaminar fracture of composite materials 3.254
S. HASHEMI, A. J. KINLOCH, J. G. WILLIAMS (*Imperial College, London, UK*)

The characterization of Mode I and Mode II delamination failures in fabric-reinforced laminates 3.265
G. MAROM, I. ROMAN, H. HAREL, M. ROSENSAFT (*Hebrew University School of Applied Science and Technology, Jerusalem, Israel*), S. KENIG, M. MOSHOV (*Ministry of Defence, Haifa, Israel*)

Interlaminar fracture due to tearing (Mode III) 3.274
S. L. DONALDSON (*AFWAL/MLBM, Wright-Patterson AFB, OH, USA*)

The effect of temperature on the interlaminar fracture of tough composites	3.284
P. DAVIES, F. X. DE CHARENTENAY (<i>Université de Technologie de Compiègne, France</i>)	
Rate and temperature effects on Mode II interlaminar fracture toughness in composite materials	3.295
T. J. CHAPMAN, A. J. SMILEY, R. B. PIPES (<i>University of Delaware, Newark, DE, USA</i>)	
Hygrothermal influence of the interlaminar fracture energy of graphite/bismaleimide modified epoxy composite (IM6/5245C)	3.305
S. BÉLAND, C. ROY (<i>University of Sherbrooke, Quebec, Canada</i>), J. P. KOMOROWSKI (<i>National Aeronautical Establishment, NRC, Ontario, Canada</i>)	
On the applicability of fracture mechanics to short fibre composites	3.317
M. J. CARLING, J. G. WILLIAMS (<i>Imperial College, London, UK</i>)	
Fracture toughness and failure maps for short fibre/polymer matrix composites	3.327
K. FRIEDRICH (<i>Technical University of Hamburg, FR Germany</i>), J. KARGER-KOCSIS (<i>Taurus Rubber Works, Budapest, Hungary</i>)	
Crack diffusion coefficient: a candidate fracture toughness parameter for short fiber composites	3.337
M. A. MULL, A. CHUDNOVSKY, A. MOET (<i>Case Western Reserve University, Cleveland, OH, USA</i>)	
Fracture toughness in Mode I: a comparison exercise of various test methods	3.346
D. GUÉDRA (<i>Avions Marcel Dassault, France</i>), D. LANG (<i>Aérospatiale Central Laboratory, France</i>), J. ROUCHON (<i>CEA, Toulouse, France</i>), C. MARAIS, P. SIGETY (<i>ONERA, Châtillon, France</i>)	
A residual stress-free Mode I edge delamination specimen	3.358
J. M. WHITNEY, M. KNIGHT (<i>AFWAL/MLBM, Wright-Patterson AFB, OH, USA</i>)	
Non-linearity in edge delamination of advanced composite under compression loading	3.368
H. CHAOUK, G. P. STEVEN (<i>University of Sydney, Australia</i>)	

Correspondence between stress fields and damage zones ahead of crack tip of composites under Mode I and Mode II delamination	3.378
C. CORLETO, W. BRADLEY (<i>Texas A & M University, College Station, TX, USA</i>), M. HENRIKSEN (<i>Colorado School of Mines, Golden, CO, USA</i>)	
Crack advancement in a carbon fibre–epoxy composite observed by dynamic scanning electron microscopy	3.388
M. T. KORTSCHOT, P. W. R. BEAUMONT, W. C. NIXON, B. C. BRETON (<i>University of Cambridge, UK</i>)	
Failure mechanisms in continuous fibre reinforced PEEK	3.397
P. J. HINE, B. BREW, R. A. DUCKETT, I. M. WARD (<i>University of Leeds, UK</i>)	
Experimental investigations on the fracture toughness of glass cloth/epoxy and graphite fiber/epoxy laminates	3.405
JIN-MIN ZHANG, BING-XIAN YANG (<i>Beijing Institute of Aeronautics and Astronautics, Beijing, PR China</i>)	
Fracture analysis of mixed-mode failure processes in a 3D-fibre/matrix composite cylinder	3.417
F.-G. BUCHHOLZ, N. SCHULTE-FRANKENFELD, B. MEINERS (<i>University of Paderborn, FR Germany</i>)	
Mixed-mode crack propagation in hoop wound composite cylinders tested in torsion	3.429
J. A. BARNES, M. KUMOSA, D. HULL (<i>University of Cambridge, UK</i>)	
Fatigue crack propagation studies on composite model systems	3.439
J. KREY, K. FRIEDRICH (<i>Technical University of Hamburg, FR Germany</i>), K.-H. SCHWALBE (<i>GKSS Research Centre, Geesthacht, FR Germany</i>)	
Plasticity of polymeric matrices and failure mechanisms of composite materials	3.448
A. A. BERLIN, S. L. BAZHENOV, V. A. TOPOLKARAEV (<i>Institute of Chemical Physics, Moscow, USSR</i>)	
Failure mechanisms in filled epoxy resins	3.460
W. J. CANTWELL, A. C. ROULIN-MOLONEY (<i>Swiss Federal Institute of Technology, Lausanne, Switzerland</i>)	

Stress analysis and stress intensity factor solution for delamination of orthotropic composite laminate under anti-plane shear forces . . . 3.470
 ZHANG XING, CHEN YI-GE (*Beijing Institute of Aeronautics and Astronautics, Beijing, PR China*)

Anisotropic plastic zone size factor of composite laminate . . . 3.480
 FANGCHUN XIAO, ANLIN YAO (*Southwestern Petroleum Institute, Nanchong, PR China*)

Late Submissions

Absorbed energy, damage and residual strength after impact of glass fibre epoxy composites 3.485
 I. VERPOEST, J. MARIEN, J. DEVOS, M. WEVERS (*Katholieke Universiteit Leuven, Belgium*)

Understanding Charpy impact testing of composite materials . . . 3.494
 G. D. SIMS (*National Physical Laboratory, Teddington, UK*)

On cross-ply cracking in graphite, glass and aramid fibre-reinforced epoxy laminates 3.508
 P. W. M. PETERS, H. MEUSEMANN (*DFVLR, Cologne, FR Germany*)
