

CONTENTS

<i>Preface</i>	v
Plenary Paper: Life prediction analysis: directions and divagations . K. L. REIFSNIDER (<i>Virginia Polytechnic Institute, Blacksburg, VA, USA</i>)	4.1
Fatigue	
Fatigue damage modelling of composite materials from bending tests F. SIDOROFF, B. SUBAGIO (<i>Ecole Centrale de Lyon, Ecully, France</i>)	4.32
Indirect quantification of damage growth during three-point bend fatigue of GFRP specimens M. DOROSH, A. POURSAITIP (<i>University of British Columbia, Vancouver, Canada</i>)	4.40
An investigation of the tensile fatigue behaviour of improved carbon fibre composite materials P. T. CURTIS (<i>Royal Aircraft Establishment, Farnborough, UK</i>)	4.54
Fatigue damage response of CFRP with toughened matrices and improved fibres CH. BARON, K. SCHULTE (<i>DFVLR, Cologne, FR Germany</i>)	4.65
Flex fatigue of AS-4 graphite reinforced thermoplastics R. B. CROMAN (<i>E. I. du Pont de Nemours & Co., Wilmington, DE, USA</i>)	4.76
Fatigue behaviour and damage development in woven fabric and hybrid fabric composites K. SCHULTE (<i>DFVLR, Cologne, FR Germany</i>), E. REESE, T-W. CHOU (<i>University of Delaware, Newark, DE, USA</i>)	4.89

The torsional fatigue characteristics of unidirectional glass reinforced materials	4.100
R. DAVIDSON (<i>AERE Harwell, Oxfordshire, UK</i>), C. J. SADDLER (<i>Westland Helicopters, Yeovil, UK</i>)	
Fatigue damage development in carbon fiber reinforced epoxy composites: correlation between the stiffness degradation and the growth of different damage types	4.114
M. WEVERS, I. VERPOEST, E. AERNOUDT, P. DE MEESTER (<i>Katholieke Universiteit Leuven, Belgium</i>)	
Damage mechanisms and stiffness degradation in graphite/epoxy composites	4.129
I. M. DANIEL, J. W. LEE, G. YANIV (<i>Northwestern University, Evanston, IL, USA</i>)	
The effect of environment on the fatigue damage development in notched carbon fibre composites	4.139
S. KELLAS, J. MORTON (<i>Imperial College, London, UK</i>), S. M. BISHOP (<i>Royal Aircraft Establishment, Farnborough, UK</i>)	
Rupture of carbon fibre reinforced plastics (T300-914) composite materials: influence of initial first ply failures on the fatigue behaviour	4.150
M. RENAULT, D. VALENTIN (<i>Ecole des Mines de Paris, Evry, France</i>), F. PEREZ (<i>Aérospatiale, Les Mureaux, France</i>)	
Continuous monitoring of fatigue degradation in composites by dynamic mechanical analysis	4.161
G. D. SIMS, D. BASCOMBE (<i>National Physical Laboratory, Teddington, UK</i>)	

Durability

Durability of composites	4.172
C. C. HIEL (<i>Vrije Universiteit Brussel, Belgium</i>), M. J. ADAMSON (<i>NASA Ames Research Center, CA, USA</i>)	
Water absorption in carbon and glass fibre composites	4.180
M. R. PIGGOTT (<i>University of Toronto, Ontario, Canada</i>)	
The thermal spike behaviour of carbon fibre reinforced plastics	4.190
G. PRITCHARD, K. STANSFIELD (<i>Kingston Polytechnic, Surrey, UK</i>)	

- A kinetic and spectroscopic study of the hygrothermal ageing of high temperature polystyrylpyridine (PSP) matrix composites 4.200
 B. GUETTA, A. R. BUNSELL (*Ecole des Mines de Paris, Evry, France*),
 C. BELINSKI, B. BLOCH, F. LALAU KERALY (*ONERA, Châtillon, France*), F. LAUPRETRE (*ESPCI, Paris, France*)

- Accelerated aging of FRP in hot-water by ultrasonic vibration technique 4.212
 T. HORINO, Z. MAEKAWA, H. HAMADA (*Institute of Technology, Kyoto, Japan*)

- Effect of water environment on propagation of delamination fatigue cracks in CFRP 4.222
 M. HOJO, R. HAYASHI (*Industrial Products Research Institute, Ibaraki, Japan*), K. TANAKA (*Kyoto University, Japan*), C.-G. GUSTAFSON (*Swedish Plastics and Rubber Institute, Stockholm, Sweden*)

Creep and Viscoelasticity

- The nonlinear viscoelastic behaviour of a randomly orientated fibre reinforced polymer under abrupt changes in applied stress 4.232
 C. M. HOWARD, L. HOLLAWAY (*University of Surrey, Guildford, UK*)

- Mechanical behaviour of polymeric matrix composites in biaxial stress fields 4.243
 H. R. BROUWER (*Vrije Universiteit Brussel, Belgium*)

- Characterization of the mechanical behaviour of T300/914 laminates using the local viscoelastic response 4.252
 F. MUSEUX, Y. SURREL, A. VAUTRIN, G. VERCHERY (*Ecole des Mines de Saint-Etienne, France*)

- Microyield behavior of carbon fiber reinforced plastics 4.262
 E. G. WOLFF (*The Aerospace Corporation, El Segundo, CA, USA*)

- Strength reduction of woven glass fabric composite after creep deformation 4.272
 R. PYRZ (*Aalborg University, Denmark*)

Lifetime statistics for single Kevlar® 49 filaments in creep-rupture at elevated temperatures	4.278
S. L. PHOENIX, H. F. WU, P. SCHWARTZ (<i>Cornell University, Ithaca, NY, USA</i>)	

Heat Transfer

Inverse heat transfer problems in composite materials	4.287
J. V. BECK, A. M. OSMAN (<i>Michigan State University, East Lansing, MI, USA</i>)	
Low temperature heat capacities of boron filaments- and silicon carbide whiskers-reinforced aluminum	4.297
D. P. DANDEKAR (<i>Army Materials Technology Laboratory, Watertown, MA, USA</i>), Z. Z. FU, J. C. HO (<i>Wichita State University, KS, USA</i>)	
Transport properties of disordered composite materials from the microstructure	4.302
S. TORQUATO (<i>North Carolina State University, Raleigh, NC, USA</i>)	
Theory of longitudinal electrical resistivity of metal matrix composites at cryogenic temperatures	4.311
F. S. ROIG (<i>University of California, Santa Barbara, CA, USA</i>), J. E. SCHOUTENS (<i>MMCIAC Kaman-Tempo, Santa Barbara, CA, USA</i>)	
Measurements of thermal conductivity and thermal contact resistance in composite materials for space applications	4.323
M. GIOMMI, F. R. TORRISI (<i>Selenia Spazio SpA, Rome, Italy</i>), M. MARCHETTI, P. TESTA (<i>University of Rome, Italy</i>)	
Mechanical and thermo-physical behavior of a coated fiber composite	4.335
H. HATTA (<i>Mitsubishi Electric Corporation, Sagamihara, Japan</i>), M. TAYA (<i>University of Washington, Seattle, WA, USA</i>)	

Thermal Damage and Corrosion

Thermal fatigue of unidirectional graphite/epoxy laminates	4.344
W. L. MORRIS, B. N. COX (<i>Rockwell International, Thousand Oaks, CA, USA</i>)	

Stress corrosion cracking of an impact modified polyamide and its short-fiber composites	4.353
H. VOSS, K. FRIEDRICH (<i>Technical University of Hamburg, FR Germany</i>), A. DOLGOPOLSKY, B. PARKS (<i>University of Delaware, Newark, DE, USA</i>)	
Qualitative and quantitative fractography of GRP stress corrosion fracture	4.365
J. N. PRICE, D. HULL (<i>University of Cambridge, UK</i>)	
Evaluation of corrosive environmental degradation of GRP composite using acousto-ultrasonic technique	4.375
V. K. SRIVASTAVA, R. PRAKASH (<i>Banaras Hindu University, Varanasi, India</i>)	

Thermal Effects

3-D analysis of transient interlaminar thermal stress of cross-ply composites	4.384
YUAN RUO WANG, TSU-WEI CHOU (<i>University of Delaware, Newark, DE, USA</i>)	
The thermophysical and thermal shock resistance properties of carbon-carbon composites	4.394
ZHAO JIAXIANG, DIN KUNHE, WEI JINXIAN (<i>Beijing Research Institute of Materials and Technology, Beijing, PR China</i>)	
Cooling rate effects in PEEK and carbon fibre-PEEK composites	4.401
P. T. CURTIS (<i>Royal Aircraft Establishment, Farnborough, UK</i>), P. DAVIES (<i>Université de Technologie de Compiègne, France</i>), I. K. PARTRIDGE, J. P. SAINTY (<i>Cranfield Institute of Technology, Bedford, UK</i>)	
An experimental study of lamination residual strain and stress in composite during fabrication	4.413
SONG HUAN-CHENG, LI JIAN-XIN (<i>Beijing Institute of Aeronautics and Astronautics, Beijing, PR China</i>)	
Mechanical properties of graphite epoxy composites at elevated temperatures	4.422
S. K. HA, G. S. SPRINGER (<i>Stanford University, CA, USA</i>)	

Late Submissions

- A fatigue damage model for unidirectional composites 4.431
P. DE ROO (*Renault Laboratories, Boulogne-Billancourt, France*), B.
PALUCH (*Institut de Mécanique des Fluides, Lille, France*)
- The analysis of residual dicyandiamide (DICY) and its effect on the
performance of GRP in water and humid environments 4.443
F. R. JONES (*University of Sheffield, UK*), M. A. SHAH (*University of
Chittagong, Bangladesh*), M. G. BADER, L. BONIFACE (*University of
Surrey, Guildford, UK*)
- Effect of cold climate factors on strength and durability of structural
fiberglass composites 4.457
V. N. BULMANIS (*USSR Academy of Sciences, Yakutsk, USSR*),
YU. S. URZHUMTSEV (*Latvian SSR Academy of Sciences, Riga,
USSR*)
