

Table of Contents: Volume 2

Chapter VI Structural Dynamics

Dynamic Analysis of Elastoplastic Arches Using Small Computers (S.L. Lee, W.A.M. Alwis, S. Swaddiwudhipong, B. Mairantz)	VI-3
The Longitudinal Harmonic Motion of an Elastic Bar Embedded in an Elastic Half Space (R.K.N.D. Rajapakse, A.H. Shah)	VI-9
Laterally Loaded Pile Analysis by Traveling Wave Method (M.C. Wang)	VI-15
On the Mean Response of a Beam to a Randomly Moving Load (K. Sato, S. Yamamoto, O. Kamada, N. Takatsu, I. Yamasaki)	VI-21
On Vibrations of a Forced Self-Excited Nonlinear System with a Retardation: Subharmonic Vibrations of Order 1/2 (Y. Tsuda, A. Sueoka, Y. Yoshitake, H. Tamura)	VI-27
Transient Dynamics in Quasistatic Buckling (A.S. Kushner, R.F. Jones, Jr.)	VI-33
Elasto/Visco-Plastic Dynamic Response of Moderately Thick Shells of Revolution under Asymmetrical Loading (S. Takezono, K. Tao, H. Uchibori)	VI-41
Active Control of Cantilevered Pipes Conveying Fluid (H. Doki, J. Tani)	VI-47
Vibration Analysis of Irregular Plates by the Rayleigh-Ritz Method and Substructures (D-P. Chen, T.S. Chen)	VI-53
The Linear and Non-Linear Dynamic Response of Thin Shells by Spline Collocation on Microcomputer (C. Xu)	VI-59
A Numerical Approach to Axisymmetric Random Vibration of Cylindrical Shells (A.V. Singh)	VI-69

Free Vibration and Static Analysis of General Plate by Spline Finite Strip (Y.K. Cheung, L.G. Tham, W.Y. Li)	VI-75
Vibration Analysis of Machining Center (M. Ookuma, A. Nagamatsu)	VI-81
Seismic Analyses of LMFBR Cores (K. Itoh, S. Seino, T. Ishii)	VI-87
Computational Model to Determine the Influence of Seismic Excitation on the Drop Time of Control Rods in Pressurized Water Reactors (J. Stabel, J.D. Kim, R. Holzer)	VI-93
Dynamic Analysis of Frame-Shear Wall Structures (D. Zhang)	VI-99
Beam Analogy for Analysis of Dynamic Response of Floor (W.Y. Zhou)	VI-105
Nonlinear Dynamic Analysis of Guyed Towers (G.V. Surya Kumar, N.V. Raman)	VI-111
Effect of Mass Moment Inertia on a Sagged, Coupled Transmission Line (C.N. Chang)	VI-119
Some Algorithms to Periodic Solution and the Oscillations of a Pendulum (H. Tamura)	VI-127
Optimization Analyses for Vehicle Body Vibrations and Radiated Noise (I. Hagiwara, M. Yaoi, T. Fujiwara)	VI-133
Dynamic Response and Stability of Rigid Frames Subjected to Time-Dependent Axial Forces (C.H. Yu, C.K. Wang)	VI-139
Complements for Tabular Calculation of Natural Frequencies in Torsional Systems (J-Q. Wu)	VI-145
Examples for Tabular Calculation of Natural Frequencies in Undamped Vibrating Systems (J-Q. Wu)	VI-151
A New Method Calculating Dynamic Characteristics of a Frame (X. Yin, H. Chen)	VI-157
Adaptive and Hierarchical Analysis of Eigenvalue Problems (O. Friberg, N-E. Wiberg)	VI-163
D'Alambert Approach to Structures Subjected to Concentrated Loads (M. Zak)	VI-171
Some Consideration about Dynamic Analysis for Structures (S. Ichihashi, A. Wada)	VI-179
Forced Motion of Initially Stressed Elastic Solids: Finite Element Methods (Y.D. Kwon, H. Reismann)	VI-185

How to Seek for Generalized Functional of Vibration Problem (S.J. Zhou)	VI-191
Sensitivity Analysis for the Structural Dynamic Computation (Y-L. Liu)	VI-195
Structural Modelling of Systems through Dynamic Condensation Technique (K.G. Ishtev, P.C. Petrov, Z.P. Bonev, P. Philipov)	VI-199
Mathematical Programming Formulation of Dynamic Elastoplasticity Analysis Problems (C. Polizzotto, G. Borino)	VI-205
A Data Structure for Three-Dimensional Sliding Interfaces (S.W. Key)	VI-211
Finite Element Crush Analysis of Axially Compressed Circular Cylindrical Shells (Y. Toi, K. Yuge, T. Kawai)	VI-217
Nonlinear Finite Element Crash Analysis of a Minivan (A.J. Regan, R. Winter)	VI-223
The Transient Impact Problem between a Thin Elastic Ring and a Rigid Flat Boundary (T.C. Soong, I. Choi)	VI-233
A Damage Estimation Method of Double Hull Structures in Collision (H. Ito, K. Kondo, N. Yoshimura)	VI-237
Finite Element Simulation of Cylinder Impact Including the Effects of Friction (N. Yamagata, J. Nagtegaal, S. Nakazawa)	VI-243
Analysis of Aseismic Design of BWR Building (K. Delinić, P. Zangl)	VI-249
Numerical Analysis of Metallic Structures under Impulsive Loads and Large Displacements (P. Andreuccetti, D. Aquaro, G. Forasassi)	VI-255
Vibration Isolation of Structures from Surface Waves (D.E. Beskos, I.G. Vardoulakis)	VI-263
Comparison of Non-Reflecting Boundaries for Wave Propagation Problems in the Time Domain (T.T. Nakagawa, H. Shiojiri, S. Aoyagi)	VI-269
Clarification of Mechanism of Elstic Waves Using Graphic Representations (K. Harumi, A. Ohtsuki)	VI-275
Computer Simulation of Seismic Waves and Clarification of their Mechanism (A. Ohtsuki, K. Harumi)	VI-283
Propagation of Plastic Wave in a Long Rod with Consideration of Temperature Rise (H. Date)	VI-289

Strong Shocks in Nonlinear Elasticity (M. Elzanowski, M. Epstein)	VI-295
Stress Waves in Laterally Loaded Cylindrical Shells (J.F. Carney III, S.T. Choi, S.R. Reid)	VI-301
Spectral Analysis of Elastic Waves Backscattered from Two Fluid Filled Cylindrical Cavities (T. Ohyoshi, T. Kamata, K. Miura)	VI-309
The Displacement Field Produced by the Propagating Rectangular Rupture Plane: The Exact Three-Dimensional Solution (A.S. Bykovtsev, D.B. Kramarovskiy)	VI-315

Chapter VII

Fluid Dynamics

Direct Simulation of High-Reynolds-Number Flows by Finite-Difference Methods (H. Takami, K. Kuwahara)	VII-3
Mathematical Modelling of Three-Dimensional Flow Field in the Mold Region in Continuous Casting Systems (F-L. Zhang, Z. Jiang)	VII-23
Numerical Simulation of Viscoelastic Flow through Sudden Contraction Using Type Dependent Difference Method (J.H. Song, J.Y. Yoo)	VII-29
Unsteady Forces on an Inclined Thin Elliptic Cylinder (T. Sawada, T. Tanahashi, E. Kanai, T. Ando)	VII-35
Numerical Solution of Combined Body Force and Forced Flow Filmwise Condensation (K. Noto, R. Matsumoto)	VII-41
Zonal Methods for the Solution of the Navier-Stokes Equations (L. Fuchs)	VII-47
Interpolating Matrix Method Applied to Fluid Flows Surrounded by Complex Boundaries (S. Koshizuka, Y. Oka, S. Kondo, Y. Togo)	VII-53
Adaptive Grid for Internal Flow Computation (W. Shyy)	VII-59
Computational Towing Tank Experiments by a Finite-Difference Method (H. Miyata)	VII-65
Numerical Simulation of Transonic Cascade Flows Based on Potential Equation (H. Nishida, N. Satofuka, T. Tamaki, A. Shimizu)	VII-71
Effects of Boundary Conditions on Numerical Turbulent Flow around a Two-Dimensional Vehicle by κ - ϵ Model (K. Kitoh, T. Kobayashi, H. Morooka)	VII-77

Numerical Analysis of Two-Dimensional Compressible Turbulent Flows in a Turbine Stage (Y. Shikano, M. Ikegawa, S. Nakano)	VII-83
Simulation of Large Incompressible Flows by the Finite Element Method (M. Bercovier, M. Engelman)	VII-89
A New Finite Element Method for Solving the Unsteady Navier-Stokes Equation (E. Kanai, T. Sawada, T. Tanahashi, T. Ando)	VII-97
Arbitrary Lagrangian-Eulerian Finite Element Method for the Analysis of Free Surface Fluid Flows (B. Ramaswamy, M. Kawahara)	VII-103
Conjugate-Gradient Methods Applied to the Finite-Element Approximation of the Navier-Stokes Equations (Y. Eguchi, L. Fuchs)	VII-109
On Some Mixed Finite Element Methods for the Stokes Problem in R^3 (R. Stenberg)	VII-115
Some Finite Element Formulations for Flow Analysis of Power Law Fluid (N. Miyazaki)	VII-121
The Time-Dependent Finite Element Method for Calculating Transonic Flowfield in Turbomachinery (F-Y. Zhu, X-H. Zhou)	VII-127
A Numerical Study on Flows around Rectangular Cylinders (Y. Yoshida, T. Nomura)	VII-133
Finite Element Analysis of Wind Flow Using Large-Eddy Simulation (T. Ogawa, T. Suzuki, Y. Seko, A. Yanagisawa)	VII-139
A Method of Least Squares Adjustment for Finite Element Calculations of Steady Transonic Flows (C-H. Lee, C. Cai)	VII-145
Numerical Study of Two-Dimensional Peristaltic Flows by the Finite-Element Method (S. Takabatake, K. Ayukawa, M. Sawa)	VII-151
Selective Lumping Finite Element Method for the Analysis of Wave Run-Up (N. Ioki, M. Kawahara)	VII-157
Steady Viscous Incompressible Flow Analysis by a Partial Upwind Finite Element Method (H. Kanayama, K. Toshigami)	VII-163
Dynamics of Aerostatically Lubricated Bearings (G. Lin, T. Aoyama, I. Inasaki)	VII-169
A Finite Element Analysis of Hydrodynamic Pressure on Reservoir Structures (J. Radnić, F. Damjanić)	VII-175
Helmholtz Decomposition and Navier-Stokes Equations (L. Morino, B.K. Bharadvaj, S.P. Del Marco)	VII-181

An Unconditionally Stable Numerical Scheme for Sodium Boiling Calculations (H. Ninokata, A.L. Schor, A. Deguchi)	VII-187
An Analytical Model for Calculating Dynamics of Sodium/Water Reaction Bubble in an LMFBR Steam Generator and Coupled Transient Response of the Intermediate Heat Transport System (Y.W. Shin, A.H. Wiedermann, C.K. Youngdahl, C.E. Ockert)	VII-195
Numerical Solutions of the Euler Equations by Multi-Grid and Semi-Implicit Runge-Kutta Methods (H. Shirahata)	VII-201
A New Time Integration Method for Convection Diffusion Equations (M. Koizumi, K. Sagae, M. Utamura)	VII-207
Self Actuating Valves: Numerical Techniques and Experimental Test Results (M. Becker, E. Brehm, R. Puzalowski, U. Neumann, U. Simon)	VII-213
Visualizing Air Motion inside a Cylinder of a Direct Injection Diesel Engine (K. Kaneda, K. Harada, Y. Sato, E. Nakamae)	VII-219
A Simple Algorithm for Stationary Free Surface Flow Problems (H. Terasaka, N. Hirata)	VII-225
High-Accuracy Bench Mark Solutions to Natural Convection in a Square Cavity (T. Saitoh, K. Hirose)	VII-231
Numerical Simulation of Confined Strong Swirling Flow: Part I—Modification of the Turbulent Vorticity Transport Equation (Y.Z. Li, C. Nong)	VII-237
Numerical Simulation of Confined Strong Swirling Flow: Part II—Numerical Simulation of the Coaxial Swirling Jets in a Cylindrical Combustion Chamber (Y.Z. Li, C. Nong)	VII-243
Analysis of Moisture Diffusion in Composite Laminates (C-C. Lin, K-M. Yang)	VII-249
Numerical Approach to Added Mass and Damping of a Vibrating Circular Cylinder in a Two-Phase Bubble Fluid (F. Hara, O. Kohgo)	VII-255
Representation of Two-Dimensional Boundary Layers by Discrete Vortices (K. Kamemoto, Y. Kawamata)	VII-261
The Effect of the Geometry of Bottom Surface Obstacles on the Downstream Flow (L. Vongsarngpoon, W. Naidnoi)	VII-267
Simulation of the Filling-UP of a Porous Slab against Gravity (R.M.S. Gama, R. Sampaio)	VII-273

Numerical Simulation of the Flow Field in a Bath Caused by an Impinging Gas-Jet under Hard-Blown Conditions (Y.Z. Li, P. Gan)	VII-279
--	---------

Chapter VIII

Thermal Problems

Solving Time-Dependent Slow Moving Interface Problems in Heat Transfer Using the CVBEM (T.V. Hromadka II, C.C. Yen)	VIII-3
Solidification Analysis in Castings by Boundary Element Method (T. Aizawa, C.P. Hong, T. Umeda)	VIII-13
Numerical Simulation of the Conjugate Heat Transfer Process from a Heated Moving Surface (M.V. Karwe, Y. Jaluria)	VIII-19
An Indirect Discrete Method for Three Dimensional Thermal Analysis Using Subregions (J.L. Wearing, C. Patterson, M.A. Sheikh, R.P. Scholfield)	VIII-25
Analysis of Stefan Problem by Using the Function of Delta-Sequence (N. Fukuchi)	VIII-33
Simplified 2-Dimensional Thermal Analysis Method Considering 3-Dimensional Heat Transfer (N. Kasahara, K. Iwata)	VIII-39
Time Accurate Temperature History Due to Moving Source of Heat: A Two Dimensional Case (A. Ramaraju, A.G. Marathe, S.K. Biswas)	VIII-45
A Study on the Reduction of Computing Time of the Monte Carlo Method Applied to the Radiative Heat Transfer with Variable Properties (M. Kobiyama)	VIII-51
A Numerical Solution for Heat and Mass Transfer in a Porous Concrete Slab (C.L.D. Huang, P.L. Miller)	VIII-57
A Study of Coupled Heat and Mass Transfer During Coal Devolatilization (J.T. Yang, J.L. Chen, G.G. Wang)	VIII-63
Onset of the Thermal Convection in a Porous Medium with Rotation (J.J. Jong, S.L. Jiann)	VIII-71
Numerical Analysis of the Directed Heat Diffusion in a Nonlinear Anisotropic Medium (S.N. Dimova-Borshukova)	VIII-77
Sensitivity Analysis in Thermal Problems (K. Dems)	VIII-83

Modelling of Heat Exchangers Using Finite Element Method (K.N. Seetharamu)	VIII-89
Thermal and Stress Analysis of a Fusion Reactor First Wall with Non-Circular Coolant Channels (M. Seki, T. Takeda, H. Kawamura, H. Hashizume, K. Miya)	VIII-97
Analysis of Temperature and Elastic-Viscoplastic Stresses during Continuous Casting Process (Z.G. Wang, T. Inoue)	VIII-103
Analysis and Computation of Temperature Field and Thermal Deformation on the Column of Vertical Lathe by Finite Element Method (X. Wang, H. Cao, J. Sun)	VIII-109
Development of a Prediction Code for Stirling Combustion Flows (K. Eguchi, S. Fujii, Y. Sugiyama)	VIII-123
Aerodynamic Structure of a Flat Plate Laminar Boundary Layer with Diffusion Flame (T. Ueda, M. Mizomoto)	VIII-129
Three Dimensional Analysis of the Explosions of Quiescent and Laminar Swirling Mixtures in Cylindrical Vessels (Y. Tanaka, Y. Hamamoto, E. Tomita)	VIII-135
An Investigation on the Optimum Size for Flame Propagation of Monodisperse Tetralin-Air Sprays (K.K. Chan, C.S. Jou)	VIII-141
Computational Techniques for Fluid Flow and Heat Transfer Problems (S.V. Patankar)	VIII-147
Temperature Distribution of a Heat Conducting Fluid in Laminar Flow of a Multi-Passage Circular Conduit Maintained under Constant Wall Temperature (M.A. Ebadian, H.C. Topakoglu, O.A. Arnas)	VIII-153
Prediction of Laminar Flow and Heat Transfer in a Circular Annulus with Helical Fins (D.C. Lu, S.J. Jang)	VIII-159
A Variational Principle for Thermally Coupled Flow and its Application to Forced Convective Flow in a Cavity (H. Kamegaya, N. Asano, R. Ishiguro)	VIII-165
Compositionally Convective and Morphological Instabilities of a Binary Fluid Layer with Freezing (J.J. Jong)	VIII-171
Laminar Convection of Heated Fluid Flow in the Annuli of Rotating Cylinders (T.S. Lee)	VIII-177
A Finite-Difference Method for a Problem of Stationary Free Convection Caused by a Strong Heat Source (J. Slomczynska)	VIII-183

Computational Study of Nonboundary Layer External Natural Convection Flows (Y. Jaluria, R. Agarwal)	VIII-189
Computation of Three Dimensional Natural Convection in an Irregular Enclosure with Mixed Boundary Conditions (E.K. Glakpe, C.B. Watkins, Jr., B. Kurien)	VIII-195
Analysis of Laminar Flow and Heat Transfer for Two-Dimensional Jet Impingement over Inclined Plates (S. Jayaraj, V.K. Garg)	VIII-201

Chapter IX

Coupled-Field Problems

MHD Computations in Tokamak Fusion Research (T. Takeda, T. Tsunematsu, S. Tokuda, G. Kurita, T. Takizuka)	IX-3
3D Analysis of Iron-Core Stray Field in Fusion Devices (T. Fujita, Z. Yoshida, N. Inoue)	IX-9
The Three Dimensional Flow Analysis for Superconducting Electro-Magnetic Thruster Ship: ST-500 (E. Tada, K. Imaichi, M. Simpo, Y. Saji)	IX-15
An Analysis of MHD Equilibria of Cylindrical Plasmas Using Boundary Element Method (T. Honma, M. Tsuchimoto, I. Kajii)	IX-21
Rock Mass Discontinuities and Damage Mechanics (T. Kawamoto, Y. Ichikawa, T. Kyoya)	IX-27
Analysis of Discontinuous Rock Mass Considering the Strain Softening (R. Hamajima, M. Kusabuka)	IX-37
A New Approach to Calculating Initial Ground Stresses from Displacement Measurements (Z.L. Feng)	IX-43
Deformation Behaviours of Composite Soil with Roots (M. Ueno, H. Izumi)	IX-49
Deformation Analysis of Soil Structures on the Ariake Clay Ground (N. Miura, M. Hyodo)	IX-55
Steady Response of an Axisymmetric Body to Obliquely Incident Seismic Waves (V. Avanessian)	IX-61
Evaluations of Dynamic Soil-Structure Interaction by Substructure Method (K. Kawano, Y. Yamada)	IX-67
An Infinite Element Algorithm for Elastodynamic Load Transfer Problems (P. Karasudhi)	IX-73
Diffraction of SH, P, SV, and Rayleigh Waves by the Alluvial Valley of the Los Angeles Basin (M. Dravinski, T.K. Mossessian)	IX-79

A Solution Procedure for Multi-Dimensional Soil Consolidation (Y. Yoshida, T. Nomura, S. Sirivichayakul, T. Ichikawa)	IX-85
Design and Construction Problems of an Earth Dam with the Clay Core in an Area Exposed to Mining Damages (Z. Kordecki, J. Krok, W. Biliński, J. Szarliński) ...	IX-91
Finite Element Analysis of Dynamic Response of Ship Structure to Impulsive Wave Force (H. Ohtsubo, T. Kuroiwa, Y. Yamamoto)	IX-97
Modal Method for Flow-Induced Free Vibration Analysis (T. Aizawa)	IX-103
Elastoplastic Buckling Analysis by the Finite Element Method (E.G. Carnoy, G. Panosyan)	IX-109
Finite Element-Substructure Method for Dynamic Analysis of Coupled Fluid-Solid Interaction Problems (J. Xing)	IX-117

Chapter X

Optimization

Computational Methods for Optimum Design of Large Complex Systems (J.S. Arora, P.B. Thanedar)	X-3
A New Approach in Determining the Existence and Non-Existence of Optimal Solution of Vibrating Structures via the Pontryagian Minimum Principle (S.K. Hati, S.S. Rao)	X-9
The Zigzag Approach for Optimum Design of Frame Structures (M.Y. Dong, G.C. Zhou)	X-17
The Stability of the Solution of Structural Optimization Problems (G.J. Yu)	X-23
A New and Efficient Generalized Curve-Fitting Unidimensional Search Scheme for Unconstrained Optimization (M.V.C. Rao, K.S. Chandra)	X-27
Structure/Control Optimization to Improve the Dynamic Response of Space Structures (N.S. Khot)	X-33
Study on a Tendon Control of Structures (Y. Seguchi, Y. Tada, Y. Inoue)	X-39
Structural Control in CAE System of Gas Turbin Blade (T. Tsuta, K. Mori, T. Isozaki, K. Hamabe, S. Yamaji, T. Tanizawa, K. Take, A. Hoshino, T. Sugimoto, K. Hashimoto, M. Yoshikane)	X-45
Computational Experience Gained in Structural Optimization under Uncertainty (D.M. Frangopol)	X-53

Structural Shape Determination under Uncertain Loading Conditions: An Extended Method from Inverse-Variational-Problem (Y. Tada, Y. Seguchi)	X-59
Optimal Design of Brittle Structures with Reliability Constraint (T.Y. Kam)	X-65
Buckling Strength Optimization of FRP Laminated Plates by Use of the Hessian Matrix (S. Nakagiri, H. Takabatake)	X-71
Structural Optimization in Elastic Perfectly Plastic Punch Problem (J. Haslinger, P. Neittaanmäki)	X-77
Optimum Shape of Elastic Inclusion in Infinite Elastic Solid under Triaxial Stress Field (K. Yamazaki, J. Oda)	X-83
A New Method for the Optimum Design of Truss Structures (B.P. Wang)	X-91
Optimum Quasi-Rectangular Holes with Minimum SCF in Finite Plates under Uniaxial Loading (N.K. Naik)	X-97
Optimum Design of Box Girders (Y.S. Unlusoy, H. Kobakçi)	X-103
Optimization of Thin-Walled Beams under Torsional Loadings (C. Szymczak, Z. Matulewicz, A. Kolka)	X-109
Optimal Design of Supports and Hinges in Elastic Structures Subjected to Loads and Initial Distortions (A. Garstecki)	X-115
The Development and Connection of Some Optimal Methods with the View of Machine Tool Structure Optimization Practice (J. Sun, H. Cao)	X-121
Interactive Multiobjective Fuzzy Optimization Design of Ship Grillage Structure (G. Zeng, S. Sun)	X-129
Optimization of Structures and Controls under Seismic Loading (F.Y. Cheng, C.P. Pantelides)	X-135
Optimal Control of Multistory Structures (J-P. Pu)	X-141
Control of Earthquake Excited Structures (L. Hadjikov, P. Dineva, J. Ivanova, S. Patarinski) ...	X-147
Control of Dynamical Response of Piping by Using Optimal Visco-Elastic Dampers (K. Delinić, F. Zerrmayr)	X-153
Optimization of Dynamically Loaded Structures with Random Parameters (S.F. Jóźwiak)	X-159

Chapter XI
Special Techniques for Computational Mechanics

New Trends in Boundary Integral Equations Methods (H.D. Bui)	XI-3
Some Applications of Boundary Element Method to Geodynamics (S. Kobayashi)	XI-9
An Integral Equation Approach to Inverse Problems in Structural Mechanics (M. Tanaka, Y. Masuda)	XI-15
An Alternative Approach to Boundary Element by Series Method (L. Tang, W. Jin)	XI-25
Some Attractive Applications of Boundary Element Method to Solid Mechanics (N. Kamiya, K. Saito)	XI-33
The Application of BEM for Non-Homogeneous Materials (J. Kihara, K. Ishii).....	XI-39
BEM by Using Half-Plane Fundamental Solution (T. Sawada, G.W. Ye)	XI-45
Boundary Variational Principles of the Boundary Element Method: Boundary Integral Equations of the Boundary Element Method (X-J. Niu)	XI-51
Numerical Dissipation Effects in Finite-Volume Euler Solutions for Conical Vortex-Dominated Flows (O.A. Kandil, A. Chuang)	XI-57
Euler Flow Computations of Axisymmetric Mixed Flow Inlet (A.G. Marathe, H.S. Mukunda)	XI-65
On the Application of Collocation Least Square Method to Static and Dynamic Problems in Structural Mechanics (S.S.F. Ng)	XI-71
Deterministic Models of Chaos in Mechanical Systems (M. Zak)	XI-77
A Mixed Method for Analyzing Combined Structures (X-W. Wang, Y-C. Liu)	XI-85
Modeling of An Elastic Mechanical System Using Mean-Axis (O.P. Agrawal, A.A. Shabana)	XI-93
The Deformation Map as a Means for Investigation of the Behavior of Deformable Nonlinear Bodies (D. Shilkrut)	XI-99
Integral Equation Method for Thermal Fluid Flow Problems (N. Tosaka, K. Onishi)	XI-103
The Surface Singularity Method in Complex Plane (M.A. Yükselen)	XI-109

Pressure Distribution on the Vane Surface of Radial Compressor Diffusers (S.K. Agrawal, R. Yadav)	XI-117
Green's Function Method for Viscous Unsteady Free Surface Flows (R. Piva, G. Graziani, L. Morino)	XI-123
Numerical Study on Mixed Boundary Element Solutions for a Transient Convection-Diffusion Equation (Y. Tanaka, T. Honma, I. Kaji)	XI-131
The Complex Variable Boundary Element Method in Groundwater Contaminant Transport (C.C. Yen, T.V. Hromadka II)	XI-137
Boundary Element Method for Shallow Water Flow Equation (N. Utagawa, N. Kaneko, M. Kawahara)	XI-143
Analysis of Stratified Flow by The Complex-Variable Boundary-Element Method (C. Lai)	XI-149
Numerical Solution of Nonlinear Problems in Stochastic Dynamics (R.A. Ibrahim)	XI-155
The Markov Model for Mechanical Behavior of Particulate Material (R. Kitamura, M. Shinchi)	XI-161
Statistical Analysis of Buckling Loads in Rotational Thin Shells with Random Geometric Imperfections (A. Mutoh, M. Murata, S. Kato, O. Matsuoka, A. Miyamura)	XI-167
A Numerical Technique on Structural Analysis of Uncertain Shape Structure by S.FEM (M. Mori, O. Ukai)	XI-173
Random Response of Multi-Degree-of-Freedom Systems by the Stochastic Central Difference Method (C.W.S. To)	XI-181
Application of Stochastic Finite Element Method to Axisymmetric Problems (X. Lu, Z. Zhou)	XI-187

Chapter XII **Advanced Systems for Computational Mechanics**

Scaling, Proportioning and Transformation as Numerical Strategies (C.C. Wang)	XII-3
A Quantitative Error Estimations for the Finite Element Analysis (H. Takeda)	XII-11
Sparse Matrix Techniques for Finite Element Method (T. Taniguchi)	XII-17

Finite Elements Software Selection for Computational Mechanics: Three Quantitative Approaches (A.S. Eldin, D.J. Evans)	XII-23
Application of the Generalized FD Approach to Stress Evaluation in the FE Solution (J. Krok, J. Orkisz)	XII-31
The Exact Estimation of Middle Sample and the Digital Evaluation of Small Sample through the Up and Down Method (R. Yu, L. Cheng)	XII-37
Hypermatrix Block Frontal Solver for Banachiewicz-Choleski Algorithm (W. Przybylo, R. Weinard)	XII-43
Finite Element Mesh Optimization Using Approximate Structural Reanalysis Techniques with Parallel Computing (A. Maeda, K. Kanehiro)	XII-49
Considerations for Parallelizing Matrix Generations and Solutions in Finite Element Analysis (T. Kato, T. Oyoshi)	XII-55
A New Approach to the Computation of Very Large Ill Conditioned Bar Systems (W. Przybylo)	XII-61
The MiPAX Parallel Computer for Computational Mechanics (M. Kishi, T. Kashizaki, K. Fujiwara)	XII-67
Experiences of Nonlinear Structural Analysis on a Supercomputer S-810 (N. Chiba, S. Sakata, N. Saito, T. Shimizu)	XII-73
A Parallel Computation of Second Derivatives of Conformational Energy for Polypeptide Chains on the Parallel Computer MiPAX (H. Hara, K. Kanehiro, N. Go)	XII-79
Database Oriented Analysis and Simulation System on a Workstation/UNIX (M. Hatakeyama)	XII-85
Life Term Prediction of Hydropower Steel Structures Based on Knowledge Engineering Techniques (H. Nakamura, S. Matsuura, S. Matsui, T. Terano, Y. Sinohara)	XII-91
Computer-Aided Job-Shop Scheduling and the Development of a Data Base System (N. Roy, D.K. Sengupta)	XII-97
Artificial Intelligence: The Means for Developing More Effective Structural Optimization Programs (S.F. Józwiak)	XII-103
Relational Databases, Parallel Processing and Minicomputer Array Processor System Algorithms in Computer Aided Engineering (W. Przybylo)	XII-109
