## MICRO-STRUCTURAL DEVELOPMENT AND VOID SWELLING

2.	Effect of dose rate on the microstructure of cold-worked 316 stainless steel. L. BOULANGER, L. Le NAOUR and V. LEVY	1
6.	Primary recrystallisation and void swelling behaviour of cold worked, niobium stabilised austenitic steels. R.M. BOOTHBY, T.M. WILLIAMS and D.R. HARRIES	5
7.	Void swelling in ion-irradiated austenitic Fe-Cr-25 Ni alloys. D.J. MAZEY, D.E.J. BOLSTER and W. HANKS	9
8.	Void swelling and microstructural development in experimental austenitic alloys. D. GULDEN and K. EHRLICH	13
9.	Void swelling in cold worked commercial alloys with Ni-contents between 15% and 44% after heavy ion irradiation. D. GULDEN and G. KNOBLAUCH	17
10.	High dose stainless steel swelling data on interior and peripheral oxide fuel pins. A. BOLTAX, J.P. FOSTER and U.P. NAYAK	21
11.	Effect of time and dose rate on the swelling of 316 cladding in Phénix. J.L. SERAN and J.M. DUPOUY	25
12.	Void swelling in PFR core materials. C. BROWN, G.A.B. LINEKAR and E.J. FULTON	29
14.	Effects of cold work on void nucleation and growth in an austenitic stainless steel during heavy-ion and electron irradiation. V.N. VOEVODIN, B.V. MATVIENKO, B.N. SINGH and T. LEFFERS	33
15.	The factors which control the nucleation and growth of voids in austenitic steels during electron irradiation. M.J. MAKIN	37
16.	Comprehensive modelling of void swelling in steels. R. BULLOUGH, S.M. MURPHY and M.H. WOOD	43
P1.	Precipitation in 20 Cr-25 Ni type stainless steel irradiated at low temperatures in a thermal reactor (AGR). C. TAYLOR	47
P2.	Radiation-induced microstructural changes in Ni-C and Pt-C alloys. P.G. REGNIER and N.Q. LAM	51
P5.	Some characteristics of a diamond cubic phase commonly observed in irradiation austenitic steels. T.M. WILLIAMS and P.W. LAKE	55
P6.	Dimensional stability of some Fe-Ni-Cr alloys used in nuclear power generation. A. MARUCCO and B. NATH	59
P9.	Void swelling behaviour of UK steels. C. BROWN, R.M. SHARPE, E.J. FULTON and C. CAWTHORNE	63
P10.	Effects of grain boundaries and dislocation-cell walls on void nucleation and growth in aluminium during fast neutron irradiation. A. HORSEWELL, F.A. RAHMAN and B.N. SINGH	69
P11.	Response of aluminium and its alloys to exposure in the high flux isotope reactor. K. FARRELL	73

P12.	Some effects of alloying elements on void swelling in high purity Fe-Ni-Cr alloys. J. CAWLEY and F.B. PICKERING	77
P13.	Defect structure in ion irradiated nickel-carbon and nickel-silicon alloys. K.A. SHOAB, S.J.H. BUKHARI and K. EHRLICH	83
P14.	Temperature dependent void growth in electron irradiated materials. A.J.E. FOREMAN	87
P15.	Swelling of oxide dispersion strengthened ferritic alloys. M. SNYKERS and W. VANDERMEULEN	91
P16.	Role of inert and reactive gases in void nucleation. A.J.E. FOREMAN and B.N. SINGH	95
P17.	Relaxation volumes of self-interstitial-atoms and vacancies in metals. P. EHRHART	101
P18.	Elastic shear polarizabilities and the inhomogeneity interaction of self-interstitial-atoms. K.-H. ROBRICK	105

#### IN-REACTOR CREEP

17.	Irradiation creep of solution annealed and cold worked 316 stainless steel. J.L. BOUTARD, Y. CARTERET, R. CAUVIN, A. MAILLARD and Y. GUERIN	109
18.	The in-pile deformation of austenitic stainless steel pressurized capsules after irradiation up to 35 dpa NRT. H.-J. BERGMANN and M. LIPPENS	113
19.	Irradiation creep and swelling of ferritic steels irradiated in fast reactors: new results. A. de BREMAECKER and J.-J. HUET	117
20.	Irradiation creep of the martensitic steel No. 1.4914 between 400°C and 600°C (Mol 5B). K. HERSCHBACH and W. DOSER	121
22.	Progress in the theory of radiation and thermal creep. R. BULLOUGH, M.W. FINNIS, J.R. MATTHEWS and M.H. WOOD	125
P19.	The creep of solution annealed, austenitic steels at about 500 K in the Dounreay Fast Reactor (DFR). G.W. LEWTHWAITE and D. MOSEDALE	129
P21.	Irradiation creep in model alloys for fusion reactor first walls. P. JUNG	133

#### HIGH TEMPERATURE MECHANICAL PROPERTIES

25.	Irradiation effects on the fracture toughness of 20% cold worked Type 316 stainless steel. F.H. HUANG and G.L. WIRE	135
26.	The fracture toughness of fast reactor irradiated Type 321 stainless steel and Nimonic PE16. E.A. LITTLE	139
27.	The effect of boron on the development of helium induced creep embrittlement in Type 316 stainless steel. B. VANDER SCHAAF and P. MARSHALL	143
28.	The influence of helium on high temperature fatigue of Type 316 stainless steel. I.S. BATRA, K. SONNENBERG and H. ULLMAIER	149
29.	Mechanical behaviour of irradiated 20% cold worked Type 316 stainless steel subjected to a biaxial stress state. N.S. CANNON and G.D. JOHNSON	153
30.	Mechanical properties of irradiated solution annealed and cold worked 316 cladding. J.L. BOUTARD, J.M. DUPOUY and J.P. SAGOT	157
32.	Post-irradiation creep rupture properties of the 12% Cr martensitic steels 1.4914 and 1.4923. C. WASSILEW, K. EHRLICH and K. ANDERKO	161
P22.	Influence of TiC precipitation in stainless steel on strength, ductility and helium embrittlement. W. KESTERNICH, M.K. MATTA and J. ROTHAUT	165

P26. Creep embrittlement of austenitic stainless steels with titanium addition. M.F. ELSEN	167
--	-----

#### THERMAL REACTOR MATERIALS

33. Influence of copper on the defect microstructure and radiation strengthening of iron. F. FRISIUS, R. KAMPMANN, P.A. BEAVEN and R. WAGNER	171
35. Correlation of creep and growth of pressure tubes with operating variables and microstructure. R.A. HOLT, A.R. CAUSEY and V. FIDLERIS	175
37. The enhancement of fatigue crack growth rates in zirconium alloys in a reactor environment. C. PICKER and B.W. PICKLES	179
38. Annealing studies of Zircaloy-2 cladding at 580–850°C. E.D. HINDLE	183
P27. The non-destructive examination of reactor pressure vessel steels by positron annihilation. J.P. HIGHTON	187

#### DESIGN AND PERFORMANCE OF REACTOR COMPONENTS AND STRUCTURES

39. Transport of carbon in 316 steels submitted to neutron irradiation. J. ROUAULT, L. GALLAND, R. CYTERMANN and M. COLIN	191
40. Influence of the different loadings on diametral and axial plastic strains of the claddings of Phénix pins. Y. GUERIN and J.L. BOUTARD	195
41. Fast reactor core distortion. J.A. DODD	199
42. Component deformation in PFR core. J.K. BUTLER, R.J. LILLEY, A.B.G. WASHINGTON, D.P. WILLIAMS, K.M. SWANSON and A.J. BROOK	203
43. LMFBR fuel subassembly design: measures to meet the behaviour of irradiated stainless steel. H. MAYER, K. FENNEKER, J. SINGER and H. TÖBBE	207
44. Mechanical behaviour of irradiated fuel pin cladding evaluated under transient heating and pressure conditions. M.L. HAMILTON, G.D. JOHNSON, C.W. HUNTER and D.R. DUNCAN	211
45. Analysis of the mechanical properties of irradiated fuel pin cladding relative to transient performance applications. W.F. BRIZES and G.D. JOHNSON	215
