

Table of Contents

Preface.....	vii
Experimental Aspects of Electrical and Thermal Properties of Metals.....	1
<i>K. Schroder</i>	
Properties and Applications of High Strength, High Conductivity Coppers and Copper Alloys.....	19
<i>P.W. Taubenblat, W.E. Smith, and A.R. Graviano</i>	
Metallurgical Characteristics of Aluminum for High Conductivity Applications.....	31
<i>E.H. Chia</i>	
Optimizing Conductivity, Formability and Relaxation Resistance in Copper Alloys.....	53
<i>E. Shapiro and J. Crane</i>	
High Conductivity Copper in Wire and Cable Applications.....	63
<i>B.G. LeFevre, T.J. Louzon, and J.M. Seibert</i>	
Dispersion Strengthened Copper Properties and Applications.....	77
<i>A.V. Nadkarni</i>	
Multiple Hardening Mechanisms for High Strength, High Temperature, High Conductivity Copper Base Alloys.....	103
<i>N.J. Grant, A. Lee, and M. Lou</i>	
New Anneal Resistant Copper for Radiator Fin.....	119
<i>Y.W. Lee, B.S. Vagnoni, and E. Ling</i>	
Development of a High Strength, High Conductivity Cu-Ni-Be Alloy.....	133
<i>A. Guha</i>	
Copper-Beryllium for Elevated Temperature Electronic and Electrical Applications.....	147
<i>F.R. Mollard, K.G. Wilke, and A.R. Chaudhry</i>	
Application and Fabrication Processes of Superconducting Composite Materials.....	169
<i>E. Gregory</i>	
Subject Index.....	187
Author Index.....	190
