

## CONTENTS

1. <u>The Theory of Radiation Induced Defect Production . .</u>	1
Mark T. Robinson	
Introduction . . . . .	1
Primary Recoil Energy Spectra . . . . .	3
Electron and Ion Irradiations . . . . .	3
Thermal Neutron Irradiations . . . . .	5
Fast Neutron Irradiations . . . . .	6
The Displacement Cascade . . . . .	10
LSS Atomic Collision Theory . . . . .	10
Electronic Stopping Cross Sections . . . . .	12
The Displacement Process . . . . .	15
Radiation Induced Defect Production . . . . .	18
The Damage Energy Model . . . . .	18
Effects of Cascade Density . . . . .	21
Concluding Remarks . . . . .	22
2. <u>Field-Ion Microscope Studies of the Defect</u>	
<u>Structure of the Primary State of Damage</u>	
<u>of Irradiated Metals . . . . .</u>	28
David N. Seidman	
Introduction . . . . .	28
The Field-Ion Microscope Technique . . . . .	33
Field Ionization . . . . .	33
Field Evaporation . . . . .	34
Resolution . . . . .	37
Cornell FIM Studies of Depleted Zones in	
Irradiated Tungsten . . . . .	37
Depleted Zones Created at 473K . . . . .	38
Depleted Zones Created at 18K . . . . .	45
Other FIM Experiments on Vacancy Type Radiation	
Damage . . . . .	51
Summary . . . . .	54

3.	<u>Defect Production by Energetic Particle</u>	
	<u>Bombardment</u> . . . . .	58
	K. L. Merkle	
	Particle Irradiation Experiments . . . . .	59
	Determination of the Atomic Displacement	
	Threshold . . . . .	62
	TEM of Displacement Cascades . . . . .	68
	TEM of Depleted Zones . . . . .	68
	Energy Dependence . . . . .	70
	Defect Structure . . . . .	78
	Size Distribution . . . . .	79
	Depth Distribution . . . . .	82
	Channeling . . . . .	84
	Comparison between Cascade Structures Observed in	
	Neutron and Ion Irradiations . . . . .	85
	Summary and Conclusions . . . . .	88
4.	<u>Defect Annealing Processes in Metals</u> . . . . .	95
	F. W. Young, Jr.	
	Stage I . . . . .	97
	Stage II . . . . .	106
	Stage III . . . . .	110
	Stage IV . . . . .	116
	Stage V . . . . .	118
	Summary and Conclusions . . . . .	119
5.	<u>Radiation-Enhanced Diffusion in Metals and Alloys.</u>	125
	Nghi Q. Lam and Steven J. Rothman	
	Introduction . . . . .	125
	Kinetics of Diffusion by Radiation-Induced Point	
	Defects . . . . .	127
	The Simple Model . . . . .	127
	Time-Dependent Solutions . . . . .	129
	Steady-State Solutions . . . . .	131
	Deficiencies of the Simple Model . . . . .	132
	Experimental Techniques, Results, and Discussion .	133
	Self-Diffusion . . . . .	133
	Impurity Diffusion . . . . .	138
	Chemical Diffusion . . . . .	141
	Ordering and Clustering . . . . .	143
	High-Voltage Electron Microscopy . . . . .	150
	Conclusions . . . . .	151

6.	<u>Theory of Defect Clustering and Void Formation</u> . . .	157
	H. Wiedersich	
	Steady-State Defect Concentration . . . . .	158
	Defect-Cluster Nucleation . . . . .	169
	Swelling . . . . .	179
	Sink-Annihilation Probabilities . . . . .	184
	Summary and Conclusions . . . . .	189
7.	<u>Simulation Experiments with the High Voltage</u>	
	<u>Electron Microscope</u> . . . . .	194
	J. J. Laidler, F. A. Garner and L. E. Thomas	
	Introduction . . . . .	194
	HVEM Parameters Atypical of Neutron Environments . . . . .	195
	Non-Isotropic Flux . . . . .	195
	Nature of the Displacement Event . . . . .	196
	Displacement Rate Effects . . . . .	197
	Limited Irradiation Volume . . . . .	197
	Displacement Rate Gradients . . . . .	199
	Beam Heating . . . . .	200
	Surface Effects . . . . .	202
	Stress Effects . . . . .	207
	Electron Irradiation Parameters . . . . .	208
	Applications of HVEM Irradiations . . . . .	209
	Fundamental Studies . . . . .	209
	Swelling Design Equations . . . . .	217
	Summary and Conclusions . . . . .	222
8.	<u>The Effect of Metallurgical Variables on Void</u>	
	<u>Swelling</u> . . . . .	227
	W. G. Johnston, T. Lauritzen, J. H. Rosolowski and A. M. Turkalo	
	Void Swelling - A Metallurgical Problem . . . . .	227
	Mechanism of Void Formation . . . . .	229
	Predicted Effects of Metallurgical Variables . . . . .	230
	Experimental Methods for Studying Void Swelling . . . . .	232
	Nickel Ion Bombardment of Austenitic Stainless Steels . . . . .	233
	Observed Effects of Structure on Swelling . . . . .	236
	Effect of Major Alloy Composition on Swelling . . . . .	238
	Effects of Minor Element Additions . . . . .	245
	Discussion of the Effects of Alloy Composition on Swelling . . . . .	251
	Swelling Predictions Based on Observed Compositional Effects . . . . .	253

	The Control of Swelling Through Metallurgical Variables . . . . .	259
	Summary . . . . .	260
9.	<u>Radiation-Enhanced Creep</u> . . . . .	267
	F. A. Nichols	
	Introduction . . . . .	267
	Radiation Damage Cascades . . . . .	268
	Phenomenology of Radiation Creep . . . . .	269
	Effect of Irradiation on Diffusion-Controlled Creep Processes . . . . .	275
	Low-Stress Radiation Creep . . . . .	278
	Intermediate-Stress and High-Stress Radiation Creep . . . . .	283
	Statistical Fluctuations and Dislocation Climb . . . . .	289
	Summary . . . . .	290
10.	<u>Irradiation Strengthening and Embrittlement</u> . . . . .	295
	E. E. Bloom	
	Abstract . . . . .	295
	Introduction . . . . .	296
	Effects of Irradiation on Deformation . . . . .	298
	Dislocation Glide . . . . .	299
	Dislocation Creep . . . . .	304
	Diffusion Flow . . . . .	309
	Effects of Irradiation on Fracture . . . . .	309
	Fractures in Unirradiated Conditions . . . . .	309
	Fracture of Irradiated Material . . . . .	312
	Concluding Statement . . . . .	324
11.	<u>Radiation Effects on Superconductivity</u> . . . . .	330
	B. S. Brown	
	Introduction . . . . .	330
	Elemental Superconductors . . . . .	336
	Alloy Superconductors . . . . .	343
	Compounds . . . . .	351
	Conclusions . . . . .	360
12.	<u>Radiation Damage of Nonmetallic Solids</u> . . . . .	366
	Allen N. Goland	
	Introduction . . . . .	366
	Defects in Nonmetals . . . . .	369
	Radiation Damage Processes in Nonmetals . . . . .	370
	Concluding Remarks . . . . .	391
	Index . . . . .	395
