

## TABLE OF CONTENTS

FOREWORD	VII
INTRODUCTION BY I. PRIGOGINE : The Message of Entropy.	IX
KESSLER D.A., KOPLIK J., LEVINE H. - Pattern Formation far from Equilibrium : The Free Space Dendritic Crystal.	1
DEWEL G. - Pattern Selection in Anisotropic Systems.	12
TESAURO G. - Pattern Formation in Models of Convection.	23
LUBENSKY T.C., INGERSENT K. - Patterns in Systems with Competing Incommensurate Lengths.	48
ABRAHAM F.F. - Computer Simulation of Quasi Two-dimensional Phases.	73
SADOC J.F. - Non-Crystalline Solids : a Geometrical Approach in Curved Space.	108
SCHULMAN L.S. - Morphology and Phase Transitions: from Cellular Automata to Galaxies.	118
MÜLLER S.C. - Chemical Waves in an Excitable Medium: a Quantitative Description.	143
COHEN M.H. - The Morphology of Sedimentary Rocks.	158
BERTRAND G. - Pattern Formation during Dry Corrosion of Metals and Alloys.	168
BEGHI M.G., BOTTANI C.E., CAGLIOTI G. - Thermoelastic-Plastic Transition and Dislocation Dynamics in Metals by Deformation Calorimetry.	187
KESTIN J. - Thermodynamics of Plastic Deformation.	202
KUBIN L.P., CHIHAB K., ESTRIN Y. - Nonuniform Plastic Deformation and the Portevin-Le Chatelier Effect.	220
GERBERICH W.W., SHETH J.K., KACZOROWSKI M. - Fatigue-Induced Nanoscale Patterns and Microstructures.	237
WALGRAEF D., SCHILLER C., AIFANTIS E.C. - Reaction-Diffusion Approach to Dislocation Patterns.	257

VI

NEUMANN P. - Strain Bursts in Fatigue Experiments.	270
HERRMANN G., NAJAR J. - Thermodynamic Aspects of Continuous Damage in Brittle Solids.	287
KRAUSZ A.S., KRAUSZ K. - The Energy Expression of the Microstructure in Thermally Activated Processes.	300
STEINBERG V., MOSES E. - Experiments on Convection in Binary Mixtures.	309
LAUDE L.D. - Non-Equilibrium Laser Compound Synthesis.	336
MARTIN G., BELLON P. - Stability Criteria for Phases under Irradiation.	351
COULLET P. - Phase Description of almost Periodic Patterns.	358
INDEX	375
