

TABLE OF CONTENTS

Preface.....	3
Section 1. SURFACE ENERGETICS AND THERMODYNAMICS	
Crystal face specificity in surface segregation of CuNi alloys. K. Wandelt.	3
Vacancies at Si, Ge and GaAs (100) surfaces. J. Pollmann.	7
Vacancy formation energy near transition metal surfaces. G. Allan, J. Wach.	11
The basic thermodynamical equations of surface phases. Z. Chvoj, P. Demo.	15
Surface segregation kinetics in Cu-Au alloys. W. Losch, J. Kirschner.	19
An AES study of the intergranular segregation sulphur in nickel and associated embrittlement. A. Larere, C. Roques-Carnes, P. Dumoulin, M. Gurtmann.	22
XPS and AES study of surface segregation in clean oxygen and hydrogen-covered Pt-Ni alloys. J. Sedlacek, L. Hilaire, P. Légaré, G. Maire.	26
Surface minimization calculations on silicon surfaces. J.W.T. Ridgway, M.S. Sheela.	30
Orientation dependence of the surface segregation on Sn on Cu. S. Hofmann, J. Erlewein.	34
Calculation of the composition of the surface layers and of the surface free energy of mixtures. General theory and approximate method for binary alloys. L.Z. Mezey, J. Giber.	38
UHV-SEM studies Stranski-Krastanov growth systems. J.A. Venables, P. Akhter, J. Derrien.	42
Total emissivity measurements of metals and coatings at low temperatures. D. Giuliatti, A. Gozzini, M. Lucchesi, R. Stampacchia.	46
Elastic interaction of a point defect with a stressed surface. R.F. Wallis, A.A. Maradudin, L. Dobrzynski, B. Djafari-Rouhani.....	50
A molecular-dynamics study of self-diffusion on rare-gases (100), (110) and (111) surfaces. G. de Lorenzi, V. Pontikis, J. Jacucci.	54
Section 2. SURFACE DIFFUSION	
Reconstruction movement of surface atoms of In/Si (111) system. S. Baba, J.M. Zhou, A. Kinbara.	61

Comparison of anisotropy in grain boundary segregation in copper-bismuth and iron base systems. C. Molinari, J.C. Joud.	65
Influence of steps on the surface self-diffusion of copper. J. Cousty, B. Perrailon.	69
On the influence of steps on adatom and surface-vacancy diffusion: a molecular dynamics investigation. J. Cousty, V. Pontikis.	73
The influence of atomic steps on Ni surfaces self-diffusion coefficient D_s^* J. Jaunet, C. Waldburger, J. Philibert.	77
Section 3. PHYSICAL ADSORPTION	
Surface interactions of a semiconductor inversion layer and Van Der Waals adsorption energy. N.J.M. Horing, S. Silverman.	83
Semiempirical rules for gas-surface potential parameters. H. Hoinkes, H. Wilsch.	87
The adsorption of neon, helium and hydrogen gas on a number of solid surfaces at temperatures below 25 K. M.J. Sparnaay, A. Reijnders-Coenen.	91
Deformation of an elastic substrate upon adsorption near the commensurate-incommensurate transition. R. Beaume, J. Suzanne.	95
Commensurate-incommensurate phase transition and diffusion in monolayers. L.A. Bolshov, A.M. Dykhne, M.S. Veschunov.	96
Specific heat study of two dimensional adsorbed O_2 or graphite and magnetic properties of O_2 monolayers. R. Marx, R. Braun.	100
The influence of surface - defects on the adsorption of xenon on metal surfaces. K. Wandelt, J. Hulse, J. Küppers, G. Ertl.	104
Xenon adsorption on pretreated Pd (110) surface. J. Hulse, J. Küppers, K. Wandelt, G. Ertl.	108
Commensurate-incommensurate phase transition in Kr-monolayers adsorbed on graphite. J. Bohr, M. Nielsen, J. Als-Nielsen.	112
A new method to study physisorption using surface acoustic wave. J. Pouliquen, M. Depoorter, A. Defebvre.	116
Two solid phases of a monolayer of C_2H_2 adsorbed on graphite. P. Thorel, C. Marti, G. Bomchil, J.M. Alloneau.	119

Structure of a monolayer of CF_4 on graphite. B. Croset, J. Lauter, C. Marti, P. Thorel.	122
Neutron diffraction study of ethane films adsorbed on graphite. J.P. Biberian, J.P. Coulomb, J. Suzanne, G.J. Trott, H. Taub, F.Y. Hansen, H.R. Danner.	126
On dipole moments of physisorbed atoms. J.P. Sunnen, M. Schmeits.	130
Band structure calculations for hexagonal. K. Hermann, J. Noffke.	134
Section 4. THEORETICAL CHEMISORPTION	
Spatial distribution of hydrogen molecules desorbed from transition metal surfaces. T. Toya, Y. Ohno, S. Ishi, S. Nagai.	141
Quantum mechanical description of angular and energy distribution of desorbing particules. G. Doyen.	145
Adsorption in external positive electric field. K.F. Wojciechowski.	149
Calculations of core ionization potentials, shake-up energies and intensities for chemisorbed CO and for carbonyls. D.R. Salahub, R.P. Messmer, S.H. Lamson.	152
Molecular chemisorption on simple metal surfaces. P.K. Jonhansson.	156
Calculation of valence electron energy bands for thin films and layered structures by a pseudopotential perturbation scheme. J. Sitte.	160
Response function of metal overlayers. J.P. Ganachaud, D. Spanjaard.	164
Aspects of reaction dynamics at metal surfaces. J.W. Gadzuk, M. Métié.	168
One-step description of XPS and Auger spectra. O. Gunnarsson, K. Schönhammer.	172
Chemisorption of oxygen atoms on zinc (0001) surface by DV-X α cluster calculations. E. Miyazaki, M. Tsukada, H. Adachi.	176
Na adsorption on Al (100) : a cluster model analysis of electronic relaxation. R. Hoogewijs, G. Dalmai, J. Vennik.	180
The surface molecule picture revisited. J. Lopez, J.C. Le Bossé, J. Rousseau-Violet.	184

Method for calculating the electronic structure of heterogeneous metal-metal interface and superconductivity. Zhang Li-Yuan, Yin Dao-Io.	188
Local densities of states for metals covered with layers of different symmetry. S.Z. Vlaev, I.Z. Kostadinov, T.S. Marinova.	192
Energy level shifts of ammonia adsorbed on iron surfaces : cluster models. K. Hermann.	196
 Section 5. EXPERIMENTAL CHEMISORPTION	
Interactions in chemisorbed phases. G. Ertl.	203
Bonding geometry of CO on planar and stepped single crystal surfaces. T.E. Madey, J.E. Houston, S.C. Dahlberg.	205
Room temperature adsorption of CO on clean and carbided Ni (100) surface. J.C. Bertolini, B. Tardy.	209
Interaction of HNCO with Cu(111)/surface. F. Solymosi, J. Kiss, A. Berko.	213
The adsorption of oxygen on a cylindrical tungsten single crystal. H.M. Kramer, E. Langer, E. Bauer.	217
Adsorption and dissociation of nitric oxide on Ni (111). S. Lehwald, J.T. Yates, Jr., H. Ibach.	221
The reactions of oxygen, sulphur, selenium and tellurium with tantalum surfaces. P.O'Callaghan.	225
A LEED/Auger study of the monolayer growth of Co on Cu (100) and its oxidation. L. Gonzalez, R. Miranda, M. Salmeron.	229
Effect of temperature on the adsorption of gold on the (100) tungsten single crystal plane. J. Polanski, Z. Sidorski, S. Zuber.	233
Nitrogen chemisorption on W (001) : structure and kinetic processes. K. Griffiths, D.A. King.	237
Chemisorption and epitaxial growth : a study of the adsorption of chlorine on chromium and chromium oxide single crystal surfaces. J.S. Foord, R.M. Lambert.	242

Faces specificity of the carbon monoxide adsorption on cobalt single crystals. H. Papp.	245
Adsorption of O ₂ and C ₂ H ₄ on silver single crystal surfaces studied by ELS and TPD. C. Backx, C.P.M. De Groot, P. Biloen.	248
Distinct "slow" and "fast" velocity distributions in the D ₂ desorption flux from Pd (100). G. Comsa, R. David, B.J. Schumacher.	252
Reaction of O ₂ , NO and H ₂ O with gallium surfaces and matrix-isolated clusters and atoms. D. Schmeisser, K. Jacobi, D.M. Kolb.	256
N-O adsorption on the close-packed faces of Ni, Ru and W. A comparison. D. Menzel, E. Umbach.	260
Oxygen interaction with Cu (110) studied by AES, ELS, UPS and work function changes. C. Benndorf, A. Hohlfield, C. Nöbl, F. Thieme.	263
UHV-TEM investigation of monolayer of lead on the silver (111) surface. K. Takayanagi, G. Honjo.	267
Adsorption studies using Auger electron spectroscopy from cylindrical single crystals. A.F. Armitage, D.P. Woodruff.	271
Interaction of oxygen with Ni (100) at low temperature. Comparison to room temperature. H. Hopster, C.R. Brundle.	275
A comparative study of the electron back-donation properties of the group VIII metals in the adsorption of molecular CO and N ₂ . B.E. Nieuwenhuys.	279
AES, SES, ELS and SIMS characterization of chemisorbed oxygen layers and oxide films on Ni/2% Cr (110) crystal. Modification of these films by ion bombardment. J.C. Pivin, F. Pellerin, C. Roques-Carnes, C. Le Gressus.	283
The structures of CO, CO ₂ and small hydrocarbon molecules (acetylene, ethylene, propylene, methylacetylene) adsorbed on Rh (111) and Pt (111) studied by LEED and HREELS. M.A. van Hove, L.H. Dubois, R.J. Koestner, G.A. Somorjai.	287
Adsorption of water on metal films. Influence of surface topography on the work function changes. J.M. Heras, E. Albano.	291
Carbon monoxide adsorption on Ni (110) studied by infrared ellipsometric spectroscopy. P.R. Mahaffy, M.J. Dignam.	295

On the structure of sulphur adsorbed on (110) nickel face. C. Koziol, S. Mroz.	299
The adsorption of N ₂ on W (100) under long exposure. H.F. Winters, P. Mofgen, S. Tougaard, J. Onsgaard.	303
The adsorption of water on Ru (001) : vibrational and geometric properties. P.A. Thiel, F.M. Hoffmann, W.H. Weinberg.	307
LEED intensities for array of ordered islands. E.D. Williams, W.H. Weinberg.	311
Desorption of F and Cl from (100), (110), (111) Nb surfaces. G. Bolbach, J.C. Blais, A. Brunot, A. Marillier.	314
Chemisorption of nitric oxide on metal surfaces. H. Miki, T. Kioka, K. Kawasaki.	317
Sulphur chemisorption on the silver (111) and (100) faces. G. Rovida, F. Pratesi.	321
Iodine chemisorption on the silver (111), (100) and (110) faces. U. Bardi, G. Rovida.	325
Benzene adsorption at room temperature on Re (0001) studied by AES, LEED and TPD. S. Tatarenko, R. Ducros.	329
Electron stimulated desorption : relationship between threshold energies and electronic transitions in the adsorbed complex. J. Rubio, J.M. Lopez Sancho, M.P. Lopez Sancho.	332
An Ir and EELS study of the adsorption of CO on Pd (100). A. Ortega, F.M. Hoffmann, W. Stenzel, A. Garbout, R. Unwin, K. Horn.	335
Surface photovoltage spectroscopy of selective Cs-adsorption on the (0001) CdSe surface. E. Monard, H. van Hove, A. Neyens.	339
CO adsorption on (111) Cu-Ni surfaces studied by AES, ELS, UPS, LEED, TDS and work function measurement. K. Besenthal, H. Erhart, W. Kirstein, F. Thieme.	345
Structure and electronic properties of the Cu (111)/Na adsorption system. S.A. Lindgren, L. Wallden.	349
Chemisorption of oxygen and initial oxidation of Ni : a correlation of gravimetric measurements and O(KLL) Auger intensity. C. Benndorf, C. Nöbl, H. Seidel, F. Thieme.	353
Chemisorption of carbon monoxide on rhodium single crystal surfaces. G. Borstel, M. Neuman, G. Seitz, W. Braun.	357

Desorption of cesium from molybdenum (111); positive ion and neutral lifetime measurements. R. Klein, J. Fine.	361
LEED intensity analysis of the Ag(001) c(2x2) - I structure. E. Zanazzi, M. Maglietta, U. Bardi, M. Torrini.	365
Thermodynamics of oxygen vacancy defects on thin film ZnO surfaces as measured by electrical conductivity. W. Seehausen, W. Göpel, R. Haul, U. Lampe.	366
Study of O ₂ and SO ₂ adsorption kinetics on Fe single crystal surfaces. M. Schmidt, W. Kätzel, K. Berndt, F. Storbeck.	370
Adsorption of C ₂ H ₄ on tungsten by ESD and TDS. C. Refolio, J.M. López Sancho.	376
Section 6. SURFACE REACTIONS	
Basic studies of surface reactivity and elementary catalytic processes on well-characterized metal surfaces. R.M. Lambert.	381
Catalytic oxidation of CO on Pt (111) : a study by XPS, UPS and dynamic high resolution measurements of work function. P.R. Norton, D.K. Creber, J.W. Goodale.	390
Decomposition of NO on clean Pt at high pressures. M. Mummy, L.D. Schmidt.	394
Adsorption of cyanogen on rubidium dosed silver (111). N.D. Spencer.	395
Growth of platinum on rhenium - Interactions of oxygen with this surface. B. Weber, G. Praline, M. Alnot, J.J. Ehrhardt, A. Cassuto.	399
Molecular beam study of the catalytic reaction between NO and CO on Pt (001). S.P. Singh-Bopari, D.A. King.	403
Structure and reactivity of Pd low-index crystal faces covered with Pb deposits. W. Palcewska, I. Szymska, I. Ratajczyjowa, M. Lipski.	407
The formation and hydrogenation of carbonaceous layers on iron. H.P. Bonzel, H.J. Krebs.	411
Ion bombardment induced variation in reactivity of several gas-metal systems. R. Miranda, J.M. Rojo, M. Salmeron, J. Ibanez.	415
Deactivation of metal catalysts by chemisorbed species in equilibrium with the gaseous reactants. A. Frennet, G. Liénard, A. Crucq, L. Degols.	419

Reactivity of lead monolayers on copper : evidence for oxygen spill-over. D. Chadwick, A.B. Christie.	423
Determination of surface structures with ion beams. N. Winograd, S.P. Holland, K.E. Foley, R.A. Gibbs.	427
The interaction of oxygen with Zn doped SnO ₂ p (1x2) (110) face. E. de Frésart, J. Darville, J.M. Gilles.	431
Kinetics of the catalytic CO-oxidation on ZnO. P. Esser, R. Feierabend, W. Göpel.	436
Charge-transferred states of H ₂ and CO on ZnO and their reactions. M. Watanabe, T. Ito.	440
The oxidation of hydrogen and carbon monoxide on Ir (111). V.N. Ageev.	444
The oxidation of C ₂ hydrocarbons on Ag (110). M.A. Barteau, R.J. Madix.	448
The early stages of oxidation of magnesium, aluminium and magnesium/aluminium alloys. B.E. Hayden, D.F. Klemperer, G.C. Allen, P.M. Tucker.	453
The conversion process of ethylene on Pt (111). A.M. Baro, H. Ibach.	458
Interaction of oxygen and water with erbium surfaces : Auger and electron energy loss spectroscopy. E. Bertel, F.P. Netzer.	462
Sulphur-oxygen opposition at the surface of iron, chromium and stainless steel studied by electron spectroscopy. C. Jardin, Bui Minh Duc, J.P. Gauthier, G. Thollet, P. Michel.	466
Oxidation of crystalline magnesium (0001) studied by ELS, AES, LEED and work function measurements. H. Namba, J. Darville, J.M. Gilles.	470
Influence of potassium on the oxygen chemistry of silver surfaces : oxides and superoxides on Ag (100). M. Kitson, R.M. Lambert.	474
The dissociation and solution of carbon monoxide at the Mo (100) surface. R.A. Armstrong.	478
Catalytic reactions on metal surfaces studied by surface potential measurements. I. Lundström, D. Söderberg.	482
Infrared chemiluminescence from reactions at metal and semiconductor surfaces. T.J. Chuang.	486

Isomerization of C ₆ hydrocarbons on low and high index faces of platinum. G. Maire, F. Garin.	490
Kinetics of H ₂ S adsorption onto Fe films. M.R. Shanabarger.	494
The reaction between hydrogen and adsorbed oxygen on Cu (110). S. Hachicha, P. Hofmann, A.M. Bradshaw.	498
Interaction of oxygen with alkali covered Ni (100). G.M. Bliznakov, L.N. Surnev, M.P. Kiskinova.	502
Electron induced dissociation of lead iodide surfaces. A. Friedenbergr, Y. Shapira.	506
Analysis by AES, XPS and UPS of the incorporation of oxygen in Pt (111) single crystal. A. Slavin, J. Fusy, J. Jupille, M. Alnot, J.J. Ehrhardt, A. Cassuto.	509
The influence of carbon monoxide on hydrogen sorption on Pd (111). I. Ratajczykowa.	513
Coadsorption of hydrogen and carbon monoxide on nickel. M. Abon, B. Tardy.	517
The adsorption of n atoms Pt (110) and Cu (111) surfaces. J. Kiss, A. Berko, F. Solymosi.	521
A study of the interaction between ethylene and deuterium on Ni (111) by SIMS. D.J. Surman, J.C. Vickerman, J. Wolstenholms.	525
Infrared analysis of the chemisorbed phases during a heterogeneous catalytic reaction. Study of the adsorption of CO in the fisher-tropsch synthesis on Fe/Al ₂ O ₃ . H. Batis-Landlonsi, D. Bianchi, C.O. Bennett, G.M. Pajonk, S.J. Teichner.	529
Platinum films on alumina as model catalysis for size effects in catalysis. H. Glassl, R. Kramer, K. Hayek.	533
"Bronze-like" compounds identified during oxidation on well defined Pt surfaces doped with Ca : a LEED, AES, ELS and XPS study. G. Lindauer, P. Légaré, G. Maire.	537
The characterization of intermediates in surface reactions : the methoxy and formate species on Cu (100). P. Hofmann, K. Horn, A.M. Bradshaw.	541
Isotopic exchange of molecular oxygen with the surface oxygen of ferric molybdate. D.G. Klissurski, M.M. Kancheva.	545

Propagation of a reaction on a catalyst surface. Measure of the propagation speed. J.P. Dauchot, T. Bertonil.	548
The initial oxidation of polycrystalline niobium as studied by electron spectroscopy. S.J. Bean, D.C. Chadwick.	551
Decomposition of nitrous oxide on copper single crystal surfaces. F.H.P.M. Habraken, G.A. Bootsma.	555
An XPS study of the selective oxidation of a NiCr alloy. A. Mosser, J. Werckmann.	559
On the high temperature oxidation of crystals of the Fe _{0.82} Cr _{0.18} alloy surfaces. P.J. Moller, F.F. Pedersen.	563
 Section 7. SOLID - LIQUID INTERFACES	
Early stages of Pb condensation on Ag (111) studied in ultra high vacuum and in an electrochemical cell. K. Takayanagi, D.M. Kolb, G. Lehmpfuhl, K. Kambe.	569
A simple method for the preparation of Pt single crystal electrodes used in electrochemical measurements. R. Faure, R. Durand.	573
Investigation of the role of the superficial structure of gold on the charge transfer mechanism by the electrochemical photo-emission method. G. Picq, P. Vennereau.	577
Modulated reflectance spectroscopy for the study of the first steps of oxidation. L. Arsov, G. Blondeau, M. Froelicher, A. Hugot-Le Goff, V. Jovancicevic.	581
Surface equilibrium in binary solid solution : typical behaviour of very slightly soluble elements. A. Rolland, F. Cabané-Brouty.	585
Use of new techniques to investigate electrocrystallization processes. J. Vereecken.	589
Adsorption on gold crystal faces in aqueous solutions. A. Hamelin, J.P. Bellier.	594
New phenomena at the Si-water electrolyte interface. E.V. Buzaneva.	598
Dielectric constants of thin metallic films adsorbed or deposited on gold electrodes. F. Chao, M. Costa.	602

An electrochemical method for studying the structure and the composition of interfaces in solid. L. Beaunier, M. Froment, C. Vignaud.	606
Electrochemical behaviour of silver single crystal surfaces covered with a monolayer adsorbed of sulphur. C. Nguyen van Huong, R. Parsons, P. Marcus, J. Oudar.	610
The study of the electrode-electrolyte interface by surface plasmon excitation. A. Tadjeddine, D.M. Kolb.	614
Study of the SiO ₂ -electrolyte interface by capacitance and conductance measurements on Si-SiO ₂ -electrolyte structures. A. Prolonge, G. Kamarinos, P. Gentil.	619
The various electrochemical states of Pt (111) surface characterized by LEED and AES. R. Durand, R. Faure, G. Guinet, D. Aberdam, C. Corotte, D. Dufayard.	622
Electrooptical effects in the double layer region at the metal-aqueous electrolyte interface. R. Kofman, R. Garrigos, P. Cheyssac.	626
Spectroscopic investigation of the adsorbed water layer on gold and silver single crystals at metal-solution interfaces. C. Himen, R. Parsons.	630
Surface states and the process for electrochemical transfer at the n-Si electrolyte junction. J.N. Chazalviel.	634
Electropolymerized thin films on metallic surfaces. G. Lecayon, A. Le Moel, C. Le Gressus.	638
Section 8. ATOMIC STRUCTURE	
Solid surface atomic structure. J. Oudar.	645
Investigation of the relaxation and adsorption-induced phase transition of a Pt (100) surface by MeV ion backscattering, nuclear microanalysis, LEED and XPS. P.R. Norton, J.A. Davies, D.P. Jackson, C. Sitter, D.K. Creber.	659
Modulation and partial order in 2D structures/diffraction and crystallographic aspects. M. Huber.	663
Surface atomic geometry determinations from core-level X-ray photoelectron angular distributions. C.S. Fadley, S. Kono, J.T. Lloyd, K. Thompson.	665
Spectroscopy Auger study of Stranski-Krastanov growth mode in the case of Au (110) Mo. E. Gillet, B. Gruzza.	669

Structure study of Au-deposited Si (100) surface by MeV ion scattering. T. Narusawa, K. Kinoshita, W.M. Gibson.	673
A LEED analysis of the Sc (0001) surface. S. Tougaard, A. Ignatiev.	677
Reconstruction and dynamics of the W (100) and Mo (100) and Cr (100) surfaces. A. Fasolino, G. Santoro, E. Tosatti.	679
Electron microscope study of reconstructed (111) gold surface. Y. Tanishiro, H. Kanamori, K. Takeyanagi, K. Kobayashi, K. Yagi, G. Hongo.	683
A computer experiment on the constant momentum transfer average (CMTA) method for surface structure determination by LEED. E. Zanazzi, M. Torrini.	687
A new experimental approach for the study of the formation and adsorption properties of small metal particles. C. Papageorgopoulos, H. Poppa.	688.
Formation of Pb-clusters in He-atmosphere. J. Mühlbach, E. Recknagel, K. Sattler.	692
Study of the earliest film growth stages by ellipsometry. K. Kinoshita, M. Yamamoto, T. Goroh, S. Hirasawa, Y. Tomohiro, S. Kawabata.	696
Ordered aluminum overlayers on Si (111) : structure, bonding and driving mechanism for surface reconstructions. R.H. Williams, A.W. Parke, R.S. Bauer, G.V. Hansson, D.J. Chadi.....	699
Determination of interatomic distances at solid surfaces with ISS; a study of stepped Cu (410). A.J. Algra, S.B. Luitjens, E.P.Th. M. Suurmeijer, A.L. Boera,.....	703
Surface composition and electronic structure of Ag-Pd single crystal alloys. M. Pessa, H. Asonen, M. Lindroos, B.L. Gyorffy, W. Temmermann, A.J. Pindor.	707
LEED analysis of the interaction of Al with the GaAs (110) surface. A. Kahn, P. Mark.	711
Non equilibrium compound formation by pulsed electron beam annealing. G. Majni, F. Nava, G. Ottaviani, A. Luches, U. Nassisi, E. Galli...	715
Section 9. SURFACE VIBRATIONAL PROPERTIES	
Surface vibrational properties : recent advances. R.F. Willis.	723
Lattice vibrations at real interfaces. G. Benedek, V.R. Velasco.	738
