

Contents of Volume 1

Invited lectures

Dislocations and mechanisms revealed by computer simulation D.J. Bacon	3
Low amplitude fatigue of copper crystals from 4.2K to 350K Z.S. Basinski and S.J. Basinski	13
The influence of texture on strain hardening U.F. Kocks, M.G. Stout, and A.D. Rollett	25
The dynamic organization of dislocation structures L.P. Kubin and J. Lépinoux	35
The strength of metal matrix composites under mechanical and thermal loadings H. Lilholt	61
Microstructural concepts for strengthening of metals, ceramics and polymers H. Mecking, N. Claussen, and H.J. Petermann	81
Deformation mechanism of cubic metals at high temperature H. Oikawa and H. Yoshinaga	97
Metastable alloy phases prepared by solid state reactions and ball milling R.B. Schwarz	113
X-ray diffraction line broadening and crystal plasticity M. Wilkens	125

1. Dislocations

A geometrical method to characterize the order in microtwins from in situ observations A. Coujou, A. Beneteau, G. Alcouffe, and Ph. Lours	133
Kinematics of the motion of dislocations interacting with small precipitates U. Messerschmidt and F. Appel	139
HVEM-in-situ observation of dislocation processes in the system Cu-Co E. Nembach, K. Suzuki, M. Ichihara, and S. Takeuchi	145
Dislocation-like defects in an amorphous Lennard-Jones solid L.T. Shi	151
Dislocation behaviour in dual phase steels A.W. Sleswyk and S. Mandziej	155
Deformation of crystals controlled by the Peierls mechanism S. Takeuchi and T. Suzuki	161
Twinning in a Cu-Al crystals: An instability of plastic flow F. Tranchant, J. Vergnol, and J. Grilhé	167
Temperature and strain-rate dependence of the flow stress of bcc transition metal crystals in cyclic deformation M. Werner and A. Seeger	173
Computer simulation of the interaction between a screw dislocation and point defects in α -iron lattice K. Makii, T. Tsutsumi, Y. Aono, and E. Kuramoto	179

2. Dislocation Arrangements

Thermally activated dislocation motion in fcc solid solutions R.J. Arsenault and S. Li	187
Microbands in deformed aluminium B. Bay and N. Hansen	193
Monotonic and cyclic deformation-induced dislocation substructures in bcc metals K.J. Bowman, V.K. Sethi, I. Rusakova, and R. Gibala	199
In situ deformation of γ' nickel base single crystals. The movement of screw dislocations in $\{001\}$ planes from -100°C to 880°C N. Clément, D. Caillard, P. Lours, and A. Coujou	205
Glide in prismatic planes in beryllium. An in situ study A. Couret and D. Caillard	211
Corrugated glide surfaces and the origin of earthquakes P.J. Jackson	217

Strengthening through led's D. Kuhlmann-Wilsdorf	221
On the strength anomaly in β -brass H. Saka and Y.M. Zhu	227
TEM-in-situ deformation of Cu-Zn single crystals F. Schmidt-Hohagen and H. Neuhäuser	233
Prismatic slip in hcp metals G. Schoeck and W. Püschl	239
In situ HVEM observations of dislocation transmission by $\varepsilon = 9$ grain boundaries in silicon A. Jacques, X. Baillin, and A. George	245
Formation of prismatic loops induced by in situ straining of the γ' phase of a nickel base superalloy Ph. Lours, B. de Mauduit, A. Bénéteau, N. Clément, and D. Caillard	251
 3. Plastic Deformation	
Plastic prestrain effects on the buckling characteristics of steel A. Abel	259
Hardening stages of [112] oriented copper single crystals at intermediate and high temperatures P. Anongba, J. Bonneville, and J.L. Martin	265
Plastic behavior of high-purity molybdenum single crystals in tension and compression Y. Aono, E. Kuramoto, D. Brunner, and J. Diehl	271
Characterization of dislocation cells in deformed fcc metals I. Barker, B. Ralph, and N. Hansen	277
A yield function for orthotropic sheets under plane stress conditions F. Barlat, J. Lian, and B. Baudelet	283
Superplastic behavior of mechanically alloyed aluminum IN90211 T.R. Bieler and A.K. Mukherjee	289
Superplastic deformation characteristics in an age strengthening Cu-1.9Be-0.3Ni Alloy P.Q. Chen, T. Jin, and M. Zhao	295
The superplastic-like characteristics of a silicon carbide whisker reinforced aluminum composite A.H. Chokshi, T.G. Nieh, J. Wadsworth, and A.K. Mukherjee	301
Plastic instability and fractography in the heat treatable Al alloy 6261 R. Colás and A. Grinberg	307

Studies of hardening mechanisms of symmetrically oriented single crystals of FCC solid solutions L. Diehl, F. Springer, and Ch. Schwink	313
Microstructures of heavily deformed continuously cast 70/30 brass and copper C.Y. Chung, B.J. Duggan, M.S. Bingley, and W.B. Hutchinson	319
Hardening anisotropy evolution of fcc polycrystals in channel die testing P. Franciosi and M.G. Stout	325
Plastic deformation and fracture of zinc-aluminum alloys under static and impact loading H.A. Ghoneim and M.M. Farag	331
Serrated yielding in Al-Zn alloys M. Jovanović, M. Grujičić, and Dj. Drobnjak	337
Modelling stage IV work hardening of metals P. Haasen	343
Dynamic studies of slip line formation on single crystals of fcc solid solutions A. Hampel, M. Schülke, and H. Neuhäuser	349
Load relaxation behavior of polycrystalline OFHC copper S.-P. Hannula, C. Paszkiet, and C.-Y. Li	355
Anisotropic strain hardening in polycrystalline copper: a phenomenological model F. Hess and A.W. Sleswyk	361
Shear bands formation in copper single crystals during plane-strain compression Z. Jasiński and A. Piątkowski	367
Flow stress anisotropy in commercially pure aluminium D. Juul Jensen and N. Hansen	373
Anomalous plasticity of high-purity LiF single crystals in the temperature range 0.55 to 4.2 K H.-J. Kaufmann, S.V. Lubenets, V.D. Natsik, V.V. Pustovalov, L.S. Fomenko, and S.E. Shumilin	379
Parameters of dislocation structures and factors determining flow stress at stages III and IV N.A. Koneva, D.V. Lychagin, L.A. Teplyakova, and E.V. Kozlov	385
Work-hardening of high purity single crystals of iron and iron-carbon alloys J. Kumagai, S. Takaki, S. Suzuki, and H. Kimura	391
The magnitude of the internal stress in a superplastic Pb-62% Sn alloy Y. Ma, Z. Horita, and T.G. Langdon	397

Macroscopic strain localization: Role of microstructural instabilities P. Martin, B. Baudalet, G. L'Espérance, A. Korbel, and J.H. Schmitt	403
Numerical simulation of the Portevin-Le Chatelier effect P.G. McCormick	409
The effects of surface films on mechanical behavior of B2 ordered intermetallic alloys R.D. Noebe, J.T. Kim, J.W. McVay, and R. Gibala	415
The relation between flow stress and dislocation structure in gallium antimonide M. Omri, J.-P. Michel, and A. George	421
Slip transfer across the grain boundary in Fe-3wt%Si bicrystals P. Sittner, P.P. Pal-Val, and V. Paidar	427
Strain hardening at large strains A.D. Rollett, U.F. Kocks, J.D. Embury, M.G. Stout, and R.D. Doherty	433
Microstructural influences on the plastic deformation of high chromium ferritic alloys M.P. Shaw, J.M. Robinson, I.M. Wolff, and A. Ball	439
Effect of grain size on the flow stress in terms of the dislocation density measured by resistivity J. Takamura and T. Narutani	445
Plasticity and microstructure of copper in stage IV - cold work hardening M. Zehetbauer, V. Seumer, and W. Witzel	451
Strain rate sensitivity of stress in Ni ₃ (Al,Ta) single crystals J. Stoiber, J. Bonneville, and J.L. Martin	457
Thermodynamics of open systems, self-organization, and crystal plasticity A. Seeger	463
The influence of plastic fronts on the limit load capacity of transversely bended beams in the light of experimental investigations L. Chodor and Z. Kowal	469
Texture and flow stress of cold-drawn aluminium alloys N. Hansen ja D. Juul Jensen	475
On the rule of mixtures for flow stresses of sandwich sheet metals D.N. Lee and Y.K. Kim	481
Plastic deformation of inhomogeneous materials with ellipsoidal inclusions N. Nagayama, T. Abe, and S. Nagaki	489
Deformation and precipitation influencing serrated flow E. Pink	495

Microstructure and mechanical properties of industrial aluminium
alloys after rolling

T. Tran Quoc and F. Louchet

501
