

Contents of Volume 3

7. Fracture

A dislocation model for crack blunting M.N. Bassim	1039
Cavitation by cold deformation of alloy 800H and Nimonic 80A T. Baumgärtner, A. Plath, B. Kempf, K. Bothe, and V. Gerold	1045
Inclusion/matrix mechanical interaction. An in situ study by tensile and fatigue tests in the scanning electron microscope T. Bretheau, D. Caldemaison, and M.H. Ambroise	1051
Crack growth mechanisms in an aluminium bronze J. Byrne, M.A. Phoplonker, and R.L. Jones	1057
Influence of microstructure and specimen size on cleavage fracture below and at general yield H. Dünnewald-Afrmann, M. Twickler, R. Twickler, and W. Dahl	1063
Microstructure and mechanical properties relationships in Pb-Sn alloys A.E. Elsheikh	1071
A statistical description of the effect of strain rate. Thickness and temperature on the brittle fracture toughness of an arctic grade steel B. Faucher and W.R. Tyson	1077
The dynamics of dislocation generation at crack tips and the brittle-ductile transition P.B. Hirsch, S.G. Roberts, J. Samuels, and P.D. Warren	1083

Influence of specimen orientation on low-temperature fracture behavior of low carbon steel plate Z. Huang and M. Yao	1089
The development of high temperatures in titanium alloys during fast fracture K. Jagannadham, H.-D. Kunze, L.W. Meyer, and H.G.F. Wilsdorf	1095
Effect of silicon on the grain boundary segregation of phosphorus and the phosphorus induced intergranular fracture in high purity Fe-Si-P alloys C.M. Liu, K. Abiko, and H. Kimura	1101
Acoustic emission at propagation of quasistatic cracks in alkali-halogen crystals L.I. Maslov, V.N. Rozhnov, and O.P. Zaitzeva	1107
Stress corrosion cracking of carbon steels in carbonate solutions J. Might and D.J. Duquette	1115
Effects of retrogression and reaging treatments on stress corrosion cracking and fracture toughness of Al-Zn-Mg-Cu alloy T. Ohnishi and T. Ito	1121
Influence of microstructure on the cleavage fracture path and fracture properties of microalloyed steels B. Strnadel, E. Mazancová, and K. Mazanec	1127
Improvement in plane-strain fracture toughness of ultrahigh strength low alloys steel 4340 through thermal and thermomechanical treatments Y. Tomita	1133
The investigation on the critical condition for cleavage fracture M.J. Tu, W.B. Yan, and J.Sh. Lin	1139
The geometrical interpretation of fractals applied in quantitative fractography J. Wasén and B. Karlsson	1145
An investigation of the reason for the intergranular fracture appearing at the great quantity of retained austenite zone in the ion carbonitrided layers of steel 20Cr2Ni4A L. Xia and X. Ma	1153
Numerical analysis of superplastic deformation with superimposed pressure for cavity sensitive material D. Zhou, J. Lian, and Y. Liu	1159
Ligament size limitations in brittle fracture toughness testing J. Toivonen, J. Pietikäinen, and K. Wallin	1165
Effect of filtration on the fracture toughness of stainless steel R. Ye and Y. Yang	1171

Evaluating tough-brittle transition temperature and selecting materials G. Yu and C.G. Xu	1177
8. Modern Strengthening Methods in Steels	
Assesment of forming limit diagrams from combined tension and torsion tests T. Baudin and C. Levaillant	1185
Effect of grain size and grain boundary carbide thickness on the mechanical properties of C-Mn steels M. Bingley and T. Siwecki	1191
The effects of plastic self-deformation of structural steel martensite crystals T. Eterashvili	1197
A study on the microstructure and mechanical properties optimizing of 3Cr ₂ W ₈ V steel Z.R. He, L. Chen, and G.W. Que	1203
Deformation characteristics and work-hardening behaviour of some high strength manganese steels A.O. Inegbenegor, R.D. Jones, and B. Ralph	1209
Precipitation mechanism of MC type carbide and its impact on strengthening of high temperature steels W. Kesternich	1215
Tensile plastic flow of type AISI 304 steel thin sheet containing hydrogen P.E.V. De Miranda	1221
The strength and toughness of bainite-martensite duplex structure in 1C-1.5Cr bearing steel C. Li and J.F. Liu	1227
Plastic deformation mechanism of quench-tempered steel Y. Liu	1233
Microstructural characterization of a GMA weldment in a copper-precipitation strengthened HSLA steel J.M.B. Losz and K.D. Challenger	1239
Mechanical behaviour of bainitic-austenitic ductile cast irons D. Löhe and E. Macherauch	1245
Effects of dynamic strain aging on the strength of 18-8 type austenitic stainless steel K.W. Qian, W. Chen, L. Xiao, and C. Ni	1251
The analysis of elastic-plastic property in dual-phase steel by self-consistent estimate D. Qiao	1257

475°C embrittlement of duplex stainless steel G. Wahlberg, U. Rolander, and G.L. Dunlop	1263
Influence of hot deformation and interrupted quenching on the microstructure of a medium alloy steel A. Vilchis, R. Colás, A. Grinberg, and D.M.K. de Grinberg	1269
Effect of retained austenite on hydrogen induced cracking of 60Si ₂ Mn steel Z.Q. Cui, Z.H. Wang, and R.G. Wu	1275
Irreversible damage in high carbon steel in hydrogen environment K. Zhou and S. Zhang	1281
Effects of hydrogen and tempering temperature on mechanical properties and fracture morphology of SAE 4135 steel P. Nguyễn-Duy, V. Tremblay, and J. Lanteigne	1287
Weldability of cast arctic offshore steel OS-540 Vaculok J.I. Liimatainen, R.O. Katila, and H.O. Martikainen	1293
Plastic deformation of structural steels in microcrack peaks T. Eterashvili and E. Kutelia	1299
Changes of fine structure of carbon steels strengthened by shock waves in pre-heated condition E. Kutelia, A. Peikrishvili, T. Eterashvili, and G. Gotsiridze	1305
Microstructures and properties of austenitic-bainitic ductile iron produced by continuous cooling J.Z. Li, X.S. Ning, W.H. Lu, and Q.D. Zhou	1311
Strain-strengthening of a low carbon martensitic steel C.K. Yao and Y. Pan	1317
Hot workability of 316 and other 300 series steels H.J. McQueen and N.D. Ryan	1323
Influence of strain aging on tearing resistance of C-Mn plates and welds for PWR secondary systems D. Wagner, Y. Meyzaud, P. Balladon, and P. Bocquet	1331
9. Boundaries and Interfaces	
Interfacial structure of M ₂₃ C ₆ /γ and VC/γ in a carbide strengthening superalloy B. Miao and X. Xie	1339
On the Zener drag pressure by cubic shaped particles W.B. Li, S.P. Ringer, and K.E. Easterling	1345
Variation of yield stress as a result of pre-strain and subsequent annealing and its relationship with changes in the properties of grain boundaries K. Tangri, S. Sangal, and K.J. Kurzydowski	1351

The grain boundary character distribution and intergranular corrosion of columnar grain structure in iron-chromium alloys T. Watanabe, M. Takazawa, and H. Oikawa	1357
Effect of nodular graphite upon elastic properties of iron D. Kucerovsky, J. Dryden, and G.R. Purdy	1363
Effect of bismuth and silver segregation on chemical bonding of grain boundaries for fcc metal copper X.J. Wu, Q.Q. Zheng, B. Hu, Z. Zeng, F.X. Zhou, and Z.Y. Chen	1369
 10. Special Areas	
Mechanical spectroscopy of the structural relaxation in metallic glasses E. Bonetti	1377
Effect of structural changes in grain-boundaries on electrical properties of iron-tin alloys M. Braunović	1383
Strength of aluminum alloys produced by a mechanical alloying process T. Hasegawa, T. Shibuya, T. Yakou, and T. Miura	1389
Thermomechanical processing of aluminium alloys-SiC particulate composites M. Almas and F.J. Humphreys	1395
Tensile properties of sandwich sheet metals in terms of component properties D.N. Lee and Y.K. Kim	1401
Creep behaviour of short fibre-reinforced Al-al ₂ O ₃ alloys K. Matsuura and N. Matsuda	1409
Measuring and understanding strain rate sensitive deformation with the nanoindenter M.J. Mayo and W.D. Nix	1415
Stress relaxation and structural relaxation in metallic glasses H. Neuhäuser, U. Klemm, and R. Schneider	1421
Microstructural strengthening of copper alloys produced by rapid solidification M.A. Morris and D.G. Morris	1427
Magnetomechanical effect in polycrystalline iron P. Ruuskanen	1433
Contribution of the obstacle strength to the toughness increase in composite materials and hibrid composite materials B. Parga Landa and F. Hernández Olivares	1439

11. Appendix

Debatable problems in the physics of plasticity A.N. Orlov and V. L. Indenbom (invited lecture)	1447
Hot working and resulting 300°C mechanical behavior of Al-Fe and Al-Fe-Co Alloys G. Avramovic-Cingara, H.J. McQueen, A. Salama, and T.R. McNelley (section 3)	1457
High temperature creep of a p/m Al-8Fe-2Mo alloy M. Otsuka, M. Inoue, T. Hirano, and R.Horiuchi (section 6)	1463
The strength of steam turbine bolts U Makela, P Auerkari, P Rautala, S Sandlin, and D K Wallin (section 6)	1469
The geometrical interpretation of fractals applied in quantitative fractography J. Wasen and B. Karlsson (section 7)	1475
Practical equations relating microstructure and strength in carbon steels J. G. Cabanas-Moreno and A. Sanchez-Acosta (section 8)	1483
Magnetomechanical measures of internal stress V.F. Coronel, S. Catto, and D.N. Beshers (section 10)	1489
Index	1495
