

Contents of Volume 2

SESSION 6: DEFORMATION OF POLYCRYSTALS

Quantitative Prediction of Texture Evolution of Aluminium during Tensile Strain. Comparison with Experimental Orientation Distribution Function	763
J J ENGEL, M PERNOT and R PENELLE	
A Modified Sachs Approach to the Plastic Deformation of Polycrystals as a Realistic Alternative to the Taylor Model	769
T LEFFERS	
Incorporating Work Hardening in Yield Loci Calculations	775
W F HOSFORD	
The Effect of Dispersoids and Grain Size on Mechanical Properties of AlMgSi Alloys	781
O LOHNE and O J NAESS	
Effects of Grain Size and of Carbon Content in the Strain Hardening of Polycrystalline Iron and Low-Carbon Steels	789
M ATKINSON	
Effects of Micro-Cracking and Intrinsic Obstacle Strength on the Hall-Petch Relation for Ultrafine Grain Size Polycrystals	795
R W ARMSTRONG	
Effect of Grain Size and Deformation-Induced Grain Refinement on the Residual Strength of Shock-Loaded Metals and Alloys	801
L E MURR, E MOIN, K WONGWIWAT and F GREULICH	

The Grain Size Dependence of Mobile Dislocation Density in Copper Alloys at the Onset of the Portevin-Le Chatelier Effect	807
M MAYER, O VÖHRINGER and E MACHERAUCH	
Deformation by Transformation : A Mathematical Treatment	813
P VAN HOUTTE, J DE VOS, E AERNOUDT and L DELAEY	
On the Yield and Flow Stress of Lamellar Pearlite	819
J GIL SEVILLANO	
A Dislocation Model for Twinning and Fracture and its Application to HCP Metals	825
M H YOO	
Strain Hardening of Iron : Axisymmetric vs. Plane Strain Elongation	831
A RAZAVI and G LANGFORD	
Anisotropy of 250 Maraging Steel Shear-Spun Tubes	837
Z BRAT, P ARI-GUR and D G BRANDON	
Elastic and Plastic Deformation of Inhomogeneous Materials such as Polycrystals - An Approach with Models	843
T ABE	
The Effect of Grain Size and Strain on the Tensile Flow Stress of Copper at Room Temperature	849
N HANSEN	
Relation between Statistical Grain Size Distribution and Yield Strength	855
M KUHLMEYER	
Deformation-Induced Changes of the Microstructure of Two-Phase Stainless Steel having Microduplex Structure	861
D BERGNER, P KLIMANEK and R SCHERKE	
Deformation of Eutectoid Steel during Pearlitic Transformation under Tensile Stress	867
E GAUTIER, A SIMON and G BECK	
The Plane-Strain Compression of Aluminium Bicrystals	875
J-J SERPOUL and J H DRIVER	
Strain Accommodation in Copper and Aluminium Incompatible Bicrystals	881
C REY and A ZAOUÏ	

On the Nature of the Effect of Low Temperature Thermocycling of the Yield Stress of Austenitic Stainless Steels	887
E M MEDVEDEV, F F LAVRENTEV and T M KURMANOVA	
Texture and Slip Systems Modifications in Equibiaxial Expansion	893
C GASPARD, P MESSIEN, J MIGNON and T GRÉDAY	
Strain Rate Sensitivity and the Plasticity of Aluminium Alloys	899
B A PARKER	
Deformation and Fracture in Aluminum-Zinc-Magnesium Alloys at Elevated Temperature	905
A K GHOSH and C H HAMILTON	
Properties of Iron-Carbon Alloys under Thermal and Deformed Ageing Conditions	913
S GOLOWIN and W WLISSOW	
The Effect of Rapid Annealing on the Mechanical Behavior of Cold Rolled Eutectoid Steel	921
A QUERALES and J G BYRNE	
Deformation of Hexagonal Polycrystals	927
P LUKÁČ and Z TROJANOVÁ	
The Behavior of Slip during Reverse Loading of β -Ti-Mn Alloy	933
H MARGOLIN and F HAZAVEH	
SESSION 7: SOLID SOLUTION HARDENING	
Hardening by Random Substitutional Solutes	941
N LOUAT	
The Effect of Diffusion on Solid Solution Hardening	947
V PAIDAR	
High-Temperature Solid-Solution Strengthening Studied through Internal Friction	953
R B SCHWARZ	
Solid Solution Softening in Iron-Carbon Alloys	959
J P PEYRADE, P GROH and J P COTTU	
Solid Solution Hardening and Softening in Iron Alloy Single Crystals between 4.2 K and 300 K	965
K KITAJIMA, Y AONO, H ABE and E KURAMOTO	

Substitutional Solid Solution Hardening in Binary and Ternary Tantalum Base Alloys	971
L A GYPEN and A DERUYTTERE	
The Orientation Dependence of the Yield and Flow Stress of High Purity Iron Single Crystals Doped with Hydrogen	977
H MATSUI, A KIMURA and H KIMURA	
Metal Interstitial Solid Solution Strengthening	983
J M GALLIGAN and P D GOLDMAN	
Rationalization of Softening and Hardening Effects by Interstitial Atoms in BCC Metals	989
J NAGAKAWA and M MESHII	
Effect of Nitrogen Concentration on Temperature Dependent Mechanical Properties of Vanadium	995
O N CARLSON, D K REHBEIN and K E BOGACIK	
The Deformation of Niobium Alloys Containing Mo and Ta in Solid Solution	1001
M I WOOD and G TAYLOR	
The Deformation of Single and Poly-Crystals of Lithium-Magnesium Alloys	1007
M I MORA-VARGAS, H SAKA and G TAYLOR	
Substitutional Solution Softening of Iron	1013
P CHOMEL and J P COTTU	
Scavenging within the Framework of Intrinsic Theories for Alloy Softening	1019
E PINK, E MÜGSCHL and B ORTNER	
The Solid Solution Hardening of Steel by Silicon	1025
R R PRESTON	
Plastic Deformation of Fe-6at.%Si Single Crystals at High Temperatures	1031
N ZÁRUBOVÁ and S. KADEČKOVÁ	
The Influence of Alloying on the Onset of Dynamic Strain ageing of Steels with Low Carbon Content	1037
K HÜTTEBRÄUCKER, O VÖHRINGER and E MACHERAUCH	
Work Hardening and Twinning in Single Crystals of Copper and α -Phase Cu-Al Solid Solutions at Temperatures 4.2 to 300 K	1043
V I STARTSEV, V V DEMIRSKI and S N KOMNIK	

Destabilization and Induced Anomalous Work-Hardening during the Plastic Deformation of Al-Cu Solid Solutions P MERLE and J MERLIN	1049
Anneal Hardening of Nickel Alloys H WARLIMONT	1055
Solid Solution Hardening P LUKÁČ and Z TROJANOVÁ	1061
Solid Solution Strengthening of Titanium by Aluminum at Low Temperatures H CONRAD and K K WANG	1067
Plastic Behaviour of Zircaloy-4 in the Temperature Range 77-1000 K J L DEREPI, S IBRAHIM, D ROUBY, G FANTOZZI and P GOBIN	1073
SESSION 8: FATIGUE	
Correlating Back Stresses and Friction Stresses with Dislocation Behaviour in Fatigued Copper Single Crystals D KUHLMANN-WILSDORF	1081
Cyclic Deformation Behaviour of α -Copper and Underaged Copper-Cobalt Alloy Single Crystal M WILHELM and P EVERWIN	1089
Cyclic Hardening in Copper-Nickel Alloys P CHARLESLEY, A F SHIMMIN and A M H ALI	1095
Annihilation of Dislocations during Glide at Low Temperatures H MUGHRABI and U ESSMANN	1101
Investigation by High Voltage Electron Microscopy of the Microstructural Evolution of 316 L Stainless Steel during Monotonic and/or Cyclic Uniaxial Loading at Room Temperature C DONADILLE, L ESSADIQI, M PERNOT, R PENELLE and P LACOMBE	1107
Correlation between Microstructure and Fatigue Fracture A GYSLER, J LINDIGKEIT and G LÜTJERING	1113
Plasticity of Duralumin in Low Cycle Fatigue K T WIERINGA and A W SLEESWYK	1119
The Fatigue Properties of Superelastic Cu-Zn-Al Alloys J JANSSEN, M FOLLON and L DELAHEY	1125

Threshold for Fatigue Crack Initiation M E FINE and Y H KIM	1131
The Initiation of Fatigue Cracks at Notches V B LIVESEY and J F KNOTT	1137
On the Influence of Microstructure on the Threshold Level for Fatigue Crack Growth in Steels K MINAKAWA and A J McEVILY	1145
On the Influence of Temperature and Frequency on Fatigue Softening of Structural Steels H VEITH	1151
Temperature Dependence of Fatigue Process of Iron Single Crystals S IKEDA	1157
The Influence of Cyclic Stressing on the Barkhausen Effect in Polycrystalline Iron P KETTUNEN and P RUUSKANEN	1163
Microstructural Stability and Fatigue Deformation in Cu and Al-0.7 at. % Mg Single Crystals B RAMASWAMI, T W LAU and G POON	1169
Dislocation Structures and Persistent Slip Band Formation during Cycling of Age-Hardened Al-Zn-Mg Single Crystals W VOGEL, M WILHELM and V GEROLD	1175
The Correlation of Texture and Fatigue M A BURKE and G J DAVIES	1181
Influence of Crystalline Orientation on the Environment Affected Fatigue Crack Propagation in Copper P VIOLAN, P COUV RAT and C GASC	1189
The Influence of Slip Character on the Low Cycle Fatigue Behaviour G CHALANT and L RÉMY	1195
Creep-Fatigue Interactions in Fibrous Eutectic Composites N S STOLOFF, D J DUQUETTE, C KOBURGER and W A JOHNSON	1201
Influence of Microplasticity and Crack Initiation on the Fatigue Behaviour of Precipitation Hardened Alloys M GRÄF and C VERPOORT	1207
Shear Band Formation during Low-Cycle Fatigue of α -Fe Based Single Crystals T MAGNIN and J H DRIVER	1213

Cyclic Deformation of Copper Polycrystals	1219
K V RASMUSSEN and O B PEDERSEN	
The Occurrence of FCC Deformation Twinning under Cyclic Conditions and Strain Reversibility in High-Strain Fatigue	1225
L RÉMY and G CHALANT	
Effects of Silver on Tensile and Fatigue Properties of an Aluminium-Magnesium Alloy	1231
K BOYAPATI and I J POLMEAR	
Orientation Dependence of the Cyclic Deformation Properties of Niobium Single Crystals	1237
M ANGLADA and F GUIU	
Fatigue of NiTi and CuZnAl Shape Memory Alloys	1243
K N MELTON and O MERCIER	
On the Influence of Overloads on Fatigue Crack Propagation in Structural Steels	1249
W DAHL and G ROTH	
A Study on Fatigue Crack Propagation of Rail Steels	1255
S NISIDA, T URASHIMA, K SUGINO and H MASUMOTO	
Crack Propagation in Coarse Two-Phase Steels	1261
K HAMBERG and B KARLSSON	
A Model for Fatigue Crack Closure in Ductile Materials	1267
S PURUSHOTHAMAN and J K TIEN	
Detection of Fatigue Damage by Electrochemical Scanning	1273
W J BAXTER	
Fatigue Failure Prediction by X-Ray Double Crystal Diffractometry and Topography	1279
R N PANGBORN, S WEISSMANN and I R KRAMER	
SESSION 9: IN-SITU ELECTRON MICROSCOPY DURING DEFORMATION	
In Situ Electron Microscopy of Deforming α Cu-Al Single Crystals	1287
M F DENANOT, J VERGNOL and J P VILLAIN	
Observation of Dislocation Movement at 20 K during Microdeformation in FCC Metals	1293
R GOTTHARDT, PH. BUFFAT and G GREMAUD	

Estimation of Friction Forces in a Concentrated Face Centred Cubic Ni-Cr Alloy	1299
N CLÉMENT, F MONCHOUX and J L MARTIN	
Determination of Geometrical Statistical Parameters of the Dislocation-Point Obstacle Interaction from In-Situ Deformation Experiments in the HVEM	1305
U MESSERSCHMIDT and F APPEL	
Softening of Iron by Carbon and Jerky Motion of Screw Dislocations during In Situ Experiments	1311
F LOUCHET and L P KUBIN	
The Clustering of Ni Atoms in Ni Rich NiAl; Effect on the Flow Stress at Intermediate Temperatures (300°K to 1000°K)	1317
A LASALMONIE, M J LEQUEUX and P COSTA	
A Microscopic Study of the Substructure during Creep in Aluminium at Intermediate Temperature	1323
D CAILLARD and J L MARTIN	
Dislocation Patterns Leading to the Initiation of Ductile Fracture in Pure Metals and Alloys	1329
H G F WILSDORF	
SESSION 10: COMBINATION OF ELEMENTARY HARDENING MECHANISMS	
The Yield Stress of Alloys with Complex Microstructure	1337
E HORNBOGEN	
Adhesive Bonding Produced by Deformation of Composites and its Influence on Mechanical Properties	1343
G WASSERMANN	
Additive Strength Contributions in Cu-Al ₂ O ₃ Polycrystals	1351
P BRØNDSTED	
The Interrelationship of γ' Size, Grain Size and Mechanical Properties in IN-939, a Cast Nickel-Base Superalloy	1359
C P CUTLER and S W K SHAW	
The Yield Stress, Flow Stress and Work Hardening of an Aluminium Alloy with Microduplex Structure	1365
J C JAQUET and H WARLIMONT	
The Interrelationship of Microstructures and Mechanical Properties in High Manganese Steels	1371
D M STANNARD and A J BAKER	

Relation between Structure and Mechanical Properties of High-Strength Low-Alloy Martensitic Steels after High Temperature Thermomechanical Treatment	1377
G ZOUHAR JR, P FINKE, A GÜTH, M SCHAPER and H-J KLAUß	
Stress Relaxation and Activation Volume at the Yield Point of Cold Worked and Neutron Irradiated Copper Single Crystals	1383
D BRUNNER and J DIEHL	
Simultaneous Imaging of Different Stages of Hardening Contained in the Surface Region of Deformed Cu-5.8 at. % Al Crystals	1389
N R COMINS and J T FOURIE	
Solid Solution and Strain Hardening of Concentrated Cu-Ni Alloys	1395
H NEUHÄUSER, H FIEBIGER and N HIMSTEDT	
The Mechanical Properties of Cu-Cr-SiO ₂ Single Crystals	1401
N J LONG, M H LORETTO and C H LLOYD	
Superposition of Precipitation and Solid Solution Hardening in (Cu Au) -Co Single Crystals	1407
E NEMBACH and M MARTIN	
Deformation Hardening of Type 304 Stainless Steel at Elevated Temperature	1413
A P L TURNER	
Static Softening in Aluminum Alloys	1419
P FURRER, J M VITEK and E SHAPIRO	
Contribution to the Identification of the Mechanisms Responsible for the Plastic Deformation at Low Temperature of an Alloy Uranium - 7.5 w% Nb - 2.5 w% Zr	1425
D MIANNAY and A M NOMINÉ	
Microstructural Effects on the Temperature Dependence of the Yield Strength in a Cr-Mo-V Steel	1431
H KOTILAINEN, K TÖRRÖNEN and P NENONEN	
Combination of Elementary Hardening Mechanisms in a Cr-Mo-V Steel	1437
K TÖRRÖNEN, H KOTILAINEN and P NENONEN	
The Influence of Cooling Rate on the Strength and Microstructure of Low Carbon Niobium Steels	1443
A J LAPOINTE and T N BAKER	

Strengthening of Low Carbon Low Alloy Steels by Rolling at Austenite-Ferrite Two Phase Regions	1449
M NAGUMO, H MORIKAWA, N OKUMURA and Y KAWASHIMA	
Electron Microscope Investigations of Welding-Simulation Heat-Treated Specimens of the Pressure Vessel Steel 22 NiMoCr 37 with Respect to Stress-Relief Cracking	1455
K KUßMAUL, K HERZ, H M PHAM, W DIETRICH and D KUPPLER
