

Contents of Volume 1

1. WORK HARDENING — CONSOLIDATION

Cross-slip and flow patterns in plastic deformation P.J. Jackson	3
A study of cross slip in the F.C.C. structure J. Bonneville and G. Vanderschaeve	9
Mechanism of stage IV work hardening at high temperatures H.G. Brion, P. Haasen and H. Siethoff	15
Types of dislocation substructures and stages of stress-strain curves of F.C.C. alloys N.A. Koneva, D.V. Lychagin, L.T. Trishkina and E.V. Kozlov	21
Experimental investigation of stress dependence on the dislocation density in F.C.C. alloys N.A. Koneva, L.A. Teplyakova, D.V. Lychagin, Yu. A. Abzaev, T.S. Kunitsina, A.V. Paul, N.A. Popova and E.V. Kozlov	27
On the velocity of jogged screw dislocations F. Povoło and A.J. Marzocca	33
Mechanical properties of thin-foil specimens N. Igata, Y. Kohno and T. Fujihira	39
Effect of superconducting transition on plasticity of molybdenum single crystals of high purity H.-J. Kaufmann, I.N. Kuzmenko, V.D. Natsik and V.V. Pustovalov	45

SHAL-A*

Linear strain hardening of nickel-cobalt solid solutions at large strains D.A. Hughes, J.C. Gibeling and W.D. Nix	51
On the formation of microbands during plastic straining of metals E. Nes, W.B. Hutchinson and A.A. Ridha	57
Role des dislocations de jonction dans les mecanismes de maclage de l'alliage Cu-7,3% at Al F. Tranchant, J.F.M. Vergnol, M.F. Denanot et J. Grilhé	63
Cross slip and latent hardening in silicon single crystals J.P. Michel, R. Allem and A. George	69
Mechanical behavior of polycrystals and single crystals of silicon M. Omri, J.P. Michel, C. Tête and A. George	75
Plastic deformation under simultaneous cyclic and unidirectional loading at low and ultrasonic frequencies H.O.K. Kirchner, W. Kromp, F.B. Prinz and P. Trimmel	81
Work hardening due to internal stresses in dendritic microstructures E. Blank, M. Kaspar and M. Rappaz	87
Relationship between solidification thermal parameters, dendrite arm spacing and ultimate tensile strength in Al-4.5% Cu Li Qingchun, Chen Yuyong and Jiang Zhuling	93
Soft surface effect in copper single crystals oriented for multiple glide and in polycrystalline copper J.T. Fourie	99
Strengthening characteristics of heavily cold-rolled copper M. Zehetbauer and D. Trattner	105
Structure parameters describing reverse loading in polycrystalline copper N. Christodoulou, S.R. MacEwen and O.T. Woo	111
Reverse microplasticity and acoustic emission during unloading of pure copper R. Rahouadj and F. Ferrieux	117
Reloading behaviour and acoustic emission in pure copper F. Ferrieux and R. Rahouadj	123

Deformation of copper at high strain rates J.A. Giannotta, G. Regazzoni and F. Montheillet	129
Tensile deformation and fracture behaviour of pure aluminium and aluminum alloy at cryogenic temperatures T. Takaai, T. Tatsumi and T. Tamura	135
Inhomogeneity of plastic deformation in polycrystalline aluminium J.B. Bilde-Sørensen and N. Hansen	141
Dislocation-grain boundary interactions in tungsten bicrystals J.R. Fekete and R. Gibala	147
Influence of Luders bands on the Hall-Petch relationship J.S.H. Lake	153
Effect of grain size on the deformation behaviour of nickel and nickel alloy sheet N.K. Park and B.A. Parker	159
Role of grain size in work hardening of brass and Ni-00 alloys A.W. Thompson and H. Dong	165
Deformation of zirconium polycrystals Z. Trojanová, B. Smola, P. Lukác and A. Dlouhý	171
Influence of grain size on the work hardening of austenitic stainless steels M. Dollar and S. Gorczyca	177
Effect of cold rolling and intercritical annealing on microstructure and deformation of Mn-Si-C steel D.Z. Yang, D.K. Matlock and G. Krauss	183
Effect of microstructural refinement on the deformation behavior of dual-phase steels D.A. Burford, D.K. Matlock and G. Krauss	189
Tensile ductility dependence on polycrystal grain size R.W. Armstrong	195
Work hardening mechanisms in polygonal ferrite high strength low alloy steels at cryogenic temperatures S. Yue and W.J. Bratina	201

Influence of cooling rate from the normalising temperature on the Hall-Petch slopes for steels B. Mintz and J. Kolahi-Aval	207
Dislocation substructures and yield strength of prestrained low carbon steel sheets J.H. Schmitt and B. Baudalet	213
The mechanism of work-hardening in Hadfield's steel and the influence of minor amounts of vanadium S.B. Sant and R.W. Smith	219
2. ANISOTROPY AND TEXTURE – ANISOTROPIE ET TEXTURE	
Influence of hydrogen on the development of the deformation texture and fracture during pressing in a D.P. steel C.M. Vlad, P.I. Welch and H.J. Bunge	227
Texture development and recrystallization kinetics of a cold rolled dual-phase steel sheet C.M. Vlad and H.J. Bunge	233
The Lankford's r value of dual-phase steels T. Sakaki and K. Sugimoto	239
Grain deformation modes during rolling: grain shape and orientation effects A. Skalli, R. Fortunier and J.H. Driver	245
Texture and microstructure of Ti-6Al-4V alloys after high temperature rolling K. Morii, H. Mecking and G. Lütjering	251
Orientation dependence of the deformed microstructure in 70/30 brass J. Hirsch, M.Y. Huh and K. Lücke	257
Effect of thermal processing on the texture and microstructure of aluminium D. Juul Jensen and N. Hansen	263
A simplified method for describing plastic anisotropy Ph. Lequeu, F. Montheillet and J.J. Jonas	269

Computer simulation of the elastic-plastic transition in a Taylor polycrystal T. Leffers and O.B. Pedersen	275
FCC single crystals: hardening anisotropy and stacking fault energy P. Franciosi	281
Poisson's ratio of metals and alloys F. Povoio and R.E. Bolmaro	287
Measurement of residual stresses in zircaloy tubes C.S. Hartley and J.J. Hammer	293
Effect of texture on instability of plastic flow Shih-Chin Chang and Shou-Hsiung Chen	299
Anisotropic deformation hardening in textured aluminium alloy C.Q. Chen and H.X. Li	305
Texture and properties of Al-Li based alloys K. Gatenby, M.H. Loretto, R.E. Smallman and W.S. Miller	311
Effect of grain size on the microstructure and texture of cold-rolled aluminium N. Hansen, B. Bay, D. Juul Jensen and T. Leffers	317
Structure and strain localisation failure in aluminium sheet stretching P.M.B. Rodrigues, P.S. Bate and D.V. Wilson	323
 3. SOLUTE HARDENING AND ALLOY THEORY — DURCISSEMENT PAR SOLUTES ET THEORIE DES ALLIAGES	
The Portevin - Le Chatelier effect at constant stress rate: a simple mathematical description L.P. Kubin and Y. Estrin	331
Effects of carbon and nitrogen levels on the temperature ranges for serrated flow in austenitic stainless steel L.H. de Almeida, I. Le May and S.N. Monteiro	337
The Portevin - Le Chatelier effect: I. Model for the type-B serrations R.B. Schwarz	343

Dynamic strain ageing and relaxation in 316 type stainless steel D. Blanc and J.L. Strudel	349
A comparison of the cyclic deformation behaviour of two purities of zirconium L. Handfield, J.I. Dickson and G. L'Espérance	355
Modulus effect in solid solution strengthening in F.C.C. solids R.J. Arsenault, S. Patu and D.M. Esterling	361
Temperature anomaly of work hardening in Cu ₂ NiZn P.M. Bronsveld, A.J. Huis in't Veld, G.J.L. Van der Wegen and J.Th.M. De Hosson	367
Cyclic and monotonic deformation of interstitial-free iron K. Maruyama, M. Meshii and H. Oikawa	373
Effects of quenched-in hydrogen on deformation of iron single crystals K. Hashimoto and M. Meshii	379
Superposition of solid solution and precipitation hardening in the system (Cu Au) - Co E. Nembach, N. Büttner and K.-D. Fusenig	385
Flow stress of α -iron under the influence of neutron irradiation at various temperatures and of alloying D. Brunner and J. Diehl	391
 4. PRECIPITATION HARDENING - DURCISSEMENT PAR PRECIPITATION	
Influence of carbides on the mechanical properties of Inconel 718 S. Fox, J.W. Brooks, M.H. Loretto and R.E. Smallman	399
Durcissement de l'alliage 800 par precipitation A. Mathiot, G. Robert, R. Coppola et S. Refioertin	405
Microstructure of plastically deformed Ni-base superalloys A.J. Huis in't Veld, P.M. Bronsveld, G. Boom and J.Th.H. De Hosson	411
Hardening Mechanisms in nimonic alloy PE 16 G. Neite and E. Nembach	417

Studies of microstructures and strength in Fe-Al-Mn alloys T.F. Liu and C.M. Wan	423
Age strengthening of Fe-Mn-Al stainless steels S.C. Chang, M.T. Jahn, Y.C. Pan and C.M. Wan	429
Age hardening of binary iron-nickel martensites J.T. Carter, Zhang Guosheng, and W.C. Leslie	435
Dislocation-precipitate interactions in Al-Li binary and Al-Li-Cu ternary alloys P. Sainfort and P. Guyot	441
Decomposition de la solution solide de l'alliage 7075 au cours de la trempe - effet sur le durcissement par precipitation P. Archambault, F. Moreaux et G. Beck	447
Fatigue and creep behaviour of aged alloys based on Al-4%Cu-0.3% Mg S.R. Arumalla and I.J. Polmear	453
Dispersoid particle hardening in high strength aluminium alloy C.Q. Chen	459
Discontinuous yielding in an Al-Zn-Mg alloy J. Wood and P.G. McCormick	465
Tensile properties at very low temperature in aluminum magnesium alloys S. Saji, S. Senda and S. Hori	471
Effect of microstructure on flow stress and strength in P/M 7091 and I/M 7075 aluminum alloys Young-Won Kim and W.M. Griffith	477
Precipitation hardening and substructure features in Al-Zn-Mg alloys A.M. El Sheikh	483
An investigation of microstructure and properties of a thermomechanically treated high strength Al-Zn-Mg-Cu alloy B.D. Hong, D.M. Jiang, T.G. Sum and C.Y. Zhao	489
High-strength and high conductivity precipitation hardenable dilute copper alloys Y. Murakami, K. Nakao, K. Hidaka, I. Marumoto and H. Yamaguchi	495

On strengthening in some copper-base spinodal alloys P. Kratochvíl, J. Pešička, B. Smola and B. Sprušil	501
Deformation of ordered and dispersion-hardening alloys L.E. Popov, T.A. Kovalevskaya, L.Ja. Pudan, O.A. Sergeeva and I.A. Terentyeva	507
Deformation of niobium crystals containing zirconia particles W.J. Botta F., J.W. Christian and G. Taylor	513
Influence of microstructure on the tensile properties of Al-Ti alloys D.H. St.John, L.M. Hogan and J.A. Eady	519
5. MARTENSITIC AND PHASE TRANSFORMATIONS — CHANGEMENTS DE PHASE ET TRANSFORMATION MARTENSITIQUE	
Effect of hydrogen on the deformation-induced α'' martensite in Ti-10V-2Fe-3Al J.E. Costa, D. Banerjee, J.C. Williams and A.W. Thompson	527
Stress-strain irregularities observed during tensile testing of a ferritic stainless steel A. Grinberg, R. Colás and D.M.K. Grinberg	533
Effect of prior cold work on dual phase steel A.A. Hussein, L.I. El-Menawati and Z.M. El-Bradie	539
Dislocations and volume accommodation in dual phase steels S. Mandziej, A.W. Sleeswyk, B.H. Kolster and J. Beyer	545
Influence of room temperature deformation on mechanical properties of a dual-phase steel C.K. Yao and Y. Pan	551
Strength and ductility of dual phase aluminum bronze A.A. Hussein and L.I. El-Menawati	557
Monitoring the response of shape memory alloys along thermomechanical paths in transformation space H. Verguts and E. Aernoudt	563
Etude du comportement mecanique associe a la transformation martensitique d'alliages de type Fe-Ni-C sollicités en fluage ou en traction E. Gautier, A. Simon et G. Beck	569

Isothermal martensitic transformation in Fe-Ni-C alloys at subzero temperatures in the presence of hydrogen C.A.V. de A. Rodrigues and C. Prioul	575
 6. CREEP RESISTANCE — FLUAGE	
Contrainte de saturation dans les monocristaux et polycristaux C.F.C. Z. Jasieński	583
Plastic instability and rupture life in tension creep Y. Estrin and H. Mecking	589
Dislocation network dynamics during creep deformation of monocrystalline sodium chloride P. Lin, M.A. Przystupa, and A.J. Ardell	595
High temperature deformation of alpha-titanium H. Oikawa and M.-X. Cui	601
Acceleration of creep due to cyclic loading of CrMo-steel H. Wolf, M. Schießl and W. Blum	607
On the interpretation of creep and stress-relaxation data F. Povoło	613
The effect of an electric current on the stress relaxation of aluminum wire conductors M. Braunović	619
Athermal nature of the plastic flow of metals at intermediate temperatures as revealed by impression creep D.H. Sastry and G.S. Murthy	625
A micromechanics model of the initiation of intergranular wedge-type cracks at high temperature M. Tanaka and H. Iizuka	629
Intergranular creep fracture in aluminum-magnesium alloy M. Otsuka and R. Horiuchi	635
High temperature deformation superimposed by compressional stresses M. Boček	641

Investigation of the creep failure mechanism in the Mo-5% alloy E. Freund, D. Agronov and A. Rosen	647
On cavity nucleation during creep N.Y. Tang, A. Plumtree	653
Comportement des spheroides de graphite et stabilite de la deformation par plasticite de transformation a chaud des fontes a graphite spheroidal A. Hazotte et A. Simon	659
Creep of [112] Al single crystals M. Carrard and J.L. Martin	665
Dislocation link length distributions during Harper-Dorn creep of monocrystalline aluminum S. Lee and A.J. Ardell	671
Experimental study of the dislocation mechanisms of grain boundary sliding H. Fukutomi and T. Kamijo	677
Creep deformation mechanisms in nickel-base single crystal superalloys P. Caron and T. Khan	683
Deformation of a Ni-based superalloy: compression creep and <i>in situ</i> experiments M. Ignat, F. Louchet and J. Pelissier	689
Effects of substructure on the creep properties of TZM alloy D. Agronov, E. Freund and A. Rosen	695
Creep induced dislocation subgrain sizes arising from stress changes D. Lonsdale and P.E.J. Flewitt	701
Precipitation effects and creep fracture in type 316 weld metal R. Pilkington, E. Barker and G.J. Lloyd	707
Work hardening and recovery during primary creep of TiN dispersion hardened 20%Cr-25%Ni stainless steel R.C. Ecob	713
Particle coarsening and long duration tertiary creep in Ni-base superalloy in 939 S. Basso and V. Lupinc	719

Microstructure creep rupture ductility relationship of modified alloy 800 at 600°C B.I. Selling and I.O. Smith	725
Dependence of creep on the distribution of strengthening precipitates I. Jung and G. Sauthoff	731
Design of Ferritic high temperature alloys H. Calderon, M.E. Fine and J.R. Weertman	737
Mechanisms of creep in oxide dispersion strengthened alloys R. Petkovic-Luton and M.J. Luton	743
Prediction of the service behaviour of 2-1/4 Cr-1Mo steel components in electricity generating plant J.D. Parker	749
Study of hot creep resistance and aggressiveness against steel of zinc die casting alloys D. Galvez-Sosa, D. Coutsouradis and T. Greday	755
Creep properties of powder metallurgically produced aluminium-glass composites K.U. Kainer and B.L. Mordike	761
An interpretation of stress change-strain transient experiments in Al-5.5 at %Mg M.J. Mills, J.C. Gibeling, and W.D. Nix	767
Transient creep of an Al-5 at %Mg solid solution E. Weckert and W. Blum	773
Back stresses in high temperature creep of Al-Mg alloys I.O. Smith and D.O. Northwood	779
Creep mechanisms and internal friction behavior in Al and Al-3wt%Mg alloy E. Bonetti, E. Evangelista and G. Tassinari	785
Deviation from viscous glide creep in class A alloys T. Endo, T. Shimada and T.G. Langdon	791
High temperature creep of Al-Mg alloys Z. Horita and T.G. Langdon	797

Creep in magnesium-rare earth alloys W. Henning and B.L. Mordike	803
Influence of microstructure upon the creep properties of an aluminium alloy F. Howard, G.W. Lorimer and R. Pilkington	809
