INVITED PAPERS

Work hardening of face-centered cubic single crystals F.R.N. Nabarro	1667
The effect of strain path on texture: theoretical and experimental considerations P. Van Houtte	1701
Solution hardening in FCC alloys H. Suzuki	1727
Precipitation hardening D.J. Lloyd	1745
Martensitic transformations and mechanical behavior C.M. Wayman	1779
A new theoretical and practical approach to creep and creep fracture R.W. Evans and B. Wilshire	1807
Superplasticity C.H. Hamilton	1831
Microstructure evolution and flow stress during hot working W. Roberts	1859
The influence of microstructure on toughness J.D. Embury and G. Burger	1893

Cyclic deformation and fatigue: some current problems H. Mughrabi	1917
Plastic deformation of glassy polymers: constitutive equations and macromolecular mechanisms C. G'Sell	1943
Material aspects in adhesion, galling and adhesive wear J.A. Schey	1983
Inelastic behavior of glassy and partially crystallized metallic alloys A.S. Argon	2007
SUBMITTED PAPERS	
Prediction of deformation textures in cubic metals: application to the plane strain compression of FCC single crystals B. Bacroix, F. Montheillet and J.J. Jonas	2033
Structure et propriétés de traction d'alliages ferrito- martensitiques durcis par précipitation de phase κ A. Alamo, H. Aubert, J. Laniesse, C. Lelong, M. Pigoury and C. Foucher	2041
Mean jump distance and activation length of moving dislocations in Al-Li alloys J.Th.M. de Hosson and O. Kanert	2047
Creep of copper-base shape memory alloys H. Verguts, E. Aernoudt and L. Delaey	2053
Strengthening mechanisms in very diluted titanium-oxygen-iron alloys F.D.S. Marques and J.H. Qadri	2059
Superplasticity in Al-Li alloys A.K. Ghosh and C. Gandhi	2065
Flow behaviour of nickel-base superalloys at isothermal forging temperatures and strain rates J.P. Immarigeon and A.K. Kou1	2073
Effect of the microstructure on the room temperature deformation behavior of a 316 stainless steel F.D.S. Marques and P.N. Fejokwu	2079

Model for the prediction of yield stress and recrystallization anomalies of cold rolled aluminium killed steel sheets R. Thibau, J. Masounave, R. Decelles and L. Piperni	2085
Grain refinement by recrystallization hot-rolling to achieve high strength and notch toughness in microalloyed steel plate G.E. Ruddle and D.L. Baragar	2091
Structure and properties of autotempered low-carbon martensite Q. Jingyuan	2099
Fracture toughness of low-carbon martensite Q. Jingyuan and Z. Huijui	2105
Effect of deformation-nitrocarburizing combined treatment on mechanical properties of Fe-0.20C steel X.C. Meng, B.S. Jin, T.H. Zhang and Z.R. Liu	2111
Influence of mean stress on fatigue strength of Ti-6Al-4V S.Adachi, L. Wagner and G. Lüttjering	2117
Fatigue thresholds of isothermally transformed cast steel and nodular cast iron H.J. Zhou, J. Zeng, H. Gu and D.Z. Guo	2123
The influence of microstructure on the fatigue threshold of Mn-Ni-Al bronzes J.I. Dickson, L. Handfield, S. Lalonde, J.-P. Bailon	2129
Inhomogeneous plasticity in hydrostatically loaded spherulites J.R. Dryden, A.S. Deakin and D.M. Shinozaki	2137
Comparative mechanical properties of human bones A.H. Uçisik, M.A. Goksan, I. Uçok and C. Bindal	2143
ERRATUM "Hot deformation of 301 steel" vol. 2, page 935 N.D. Ryan and H.J. McQueen	2147
ENGLISH ABSTRACTS FOR FRENCH PAPERS	2149
AUTHOR INDEX	2165
SUBJECT INDEX	2173
