

CONTENTS

Introduction

Session 1: Mechanical Testing (1). Chairman: M. Bader

Experimental techniques for measuring fibre/matrix interfacial bond shear strength <i>R.J. Gray</i>	3
Fracture toughness testing of high performance laminates <i>R.J. Lee and D.C. Phillips</i>	12
Fracture toughness of carbon fibre/epoxy composites <i>D.W. Radford and E. Teghtsoonian</i>	27
Fracture mechanisms in bending of unidirectional Kevlar-reinforced epoxy composites <i>G.Marom, M. Davidovitz, A. Mittelman and I. Roman</i>	36

Session 2: Materials' Characterization (1). Chairman: L. Ainsworth

Prediction of notch-tip energy absorption in composite laminates <i>J.K. Wells and P.W.R. Beaumont</i>	47
In-plane and interlaminar shear fatigue characterization of unidirectional GFRP and CFRP, including moisture effects <i>J.P. Favre and G. Vidal</i>	57
The assessment of fatigue damage in CFRP laminates <i>M.G. Bader and L. Boniface</i>	66
Elastic and creep characterization of a GRP laminate for use in power engineering <i>J.H. Greenwood</i>	76

Session 3: Non-destructive Testing (1). Chairman: R.D. Adams

An x-ray radiography study of delamination growth in notched carbon/epoxy laminates <i>T. Mohlin, L. Carlsson and A.F. Blom</i>	85
Non-destructive testing of aircraft composite structures <i>A. Mahoon</i>	93
The development of analytical techniques for the quality control of carbon fibre-reinforced composites at British Aerospace, Weybridge <i>A.J. Mason</i>	102
Acoustic emission studies in glass fibre-polyester composites with rubber toughened matrices <i>G.A. Crosbie, F.J. Guild and M.G. Phillips</i>	114

Session 4: Quality Assurance and Structural Analysis. Chairman: G. Meades

Quality assurance in a production environment <i>A.W. Thompson</i>	127
Tensile strength testing and quality control procedures for aromatic polyamide yarns <i>J. Cook</i>	137
Certification of Kevlar on primary structure Saab/Fairchild SF-340 aircraft <i>M. Levy and K. Grube</i>	145
Evaluation of folding technique for ferrocement roofing elements <i>R. Sri Ravindrarajah, N.C. Das Gupta and N.E. Shanmugam</i>	159

Session 5: Environmental Testing. Chairman: B. Harris

Influence of processing on the water ageing of unsaturated polyester based composites <i>A. Apicella, C. Migliaresi, L. Nicolais, L. Iaccarino and S. Roccotelli</i>	171
Thermo/hygro response measurement and behaviour of selected composite systems <i>G.E. Pynchon and J.E. Stumm</i>	181
Model composite beams for environmental testing <i>F.R. Jones</i>	193
Long-term hydrostatic test on large diameter GRP pressure pipes <i>S. Roccotelli and L. Iaccarino</i>	203
Woven glass-fibre reinforced polyester-resin composites exposed to the marine environment <i>D. Short, A.W. Stankus and J. Summerscales</i>	212

Session 6: Materials' Characterization (2). Chairman: L.N. Phillips

Determination of interlaminar fracture toughness and fracture mode dependence of composites using the edge delamination test <i>T.K. O'Brien, N.J. Johnston, D.H. Morris and R.A. Simonds</i>	223
Development of microdamage in composite laminates during fatigue loading <i>K. Schulte</i>	233
Effect of TiC and TiN diffusion barriers on tensile and fatigue properties of W fibre-reinforced Ni composites <i>R. Ahlroth</i>	243
Assessment of dynamic behaviour of brittle materials <i>V. Agopyan and S.A. Jefferis</i>	252
Time dependent behaviour of aromatic polyamide yarns <i>A. Howard</i>	264

Session 7: Non-destructive Testing (2). Chairman: M.G. Phillips

Pattern recognition in ultrasonic testing of fibre-reinforced plastics <i>W. Oppermann, H.-A. Crostack and A.-H. Engelhardt</i>	277
Dynamic effects during vibrothermographic non-destructive evaluation of composites <i>S.S. Russell and E.G. Henneke, II</i>	282
Non-destructive measurement of the glass content of GRP material <i>P. Schmeling and S. Sandell</i>	293

Session 8: Mechanical Testing (2). Chairman: B. Hawthorne

Failure and fracture studies for short-fibre reinforced composites based on various thermoplastic matrices <i>D.C. Leach and D.R. Moore</i>	303
Fatigue in CFRP under variable amplitude loading <i>A. De Iorio, S. Mignosi and M. Schiavone</i>	314
FRP-box beams under static and fatigue loading <i>U. Meier, R. Müller and A. Puck</i>	324
