

## ***Contents***

LIST OF CONTRIBUTORS	xi
FOREWORD	xiii
PREFACE	xvii
CONTENTS OF PREVIOUS VOLUMES	xviii

### **Powder Preparation Processes**

*J. L. Pentecost*

I. Introduction	1
II. Size Reduction Processes	2
III. Particle Growth Processes	7
IV. Cryochemical or Freeze Drying	10
V. Vapor Phase and Vaporization Processes	13
VI. Summary	13
References	13

### **Milling**

*C. Greskovich*

I. Introduction	15
II. Comminution Theory	16
III. Some Types of Milling Equipment	19
References	33

### **Characterization of Ceramic Powders**

*R. Nathan Katz*

I. Introduction	35
II. Chemical and Crystallographic Characterization	36
III. Characterization of Powder Morphology	42

IV. Bulk Properties	47
V. Summary	48
References	48

## **Effects of Powder Characteristics**

*Y. S. Kim*

I. Introduction	51
II. Powder Properties and Characteristics	53
III. Effect of Powder Characteristics on Composition, Ball-Milling, Calcining, and Sintering	58
IV. Summary	66
References	67

## **Dry Pressing**

*James S. Reed and Robert B. Runk*

I. Introduction	71
II. Process Variables	72
III. Compaction Behavior	81
IV. Die Wall Effects on Compaction	86
V. Control of Defects in Compacts	89
VI. Simplified Pressing Program	92
References	92

## **Hot Pressing**

*M. H. Leipold*

I. Introduction	95
II. Uniaxial Hot Pressing	97
III. Hot Isostatic Pressing	128
IV. Other Hot Pressing Methods	130
References	132

## **Isostatic Pressing**

*G. F. Austin and G. D. McTaggart*

I. Introduction	135
II. Presses	137
III. Pressure-Generating Systems	141

**CONTENTS***vii*

IV. Equipment Selection	143
V. Parameter Considerations	144
VI. Operation	149
VII. Conclusion	151
References	151

**Slip Casting***Robert E. Cowan*

I. Basic Slip Casting Process	154
II. Theories of Slip Casting	155
III. Molds	158
IV. Constituents of Slips	159
V. Novel Casting Processes	163
VI. Slip Casting Oxides	164
VII. Slip Casting Fluorides	166
VIII. Slip Casting Metals	167
IX. Slip Casting Intermetallic Compounds	168
X. Slip Casting Cermets	168
XI. Summary	168
References	169

**Doctor-Blade Process***J. C. Williams*

I. Introduction	173
II. Slurry Formation	176
III. Sheet Casting	183
IV. Forming	186
V. Firing	190
VI. Preferred Orientation	194
VII. Laminated Structures	196
References	197

**Firing***Thomas Reynolds III*

I. Introduction	199
II. Compound Formation	200
III. Powder for Pressing	205
IV. Sintering	205

V. Hot Pressing	212
VI. Summary	214
References	215

## Ceramic Machining and Surface Finishing

*Paul F. Becher*

I. Grinding	217
II. Mechanical Polishing	220
III. Nonabrasive Finishing	221
IV. Surface Topography	221
V. Influence of Surface Finishing on Properties	222
VI. Summary	224
References	225

## Surface Treatments

*Minoru Tomozawa*

I. Chemical Strengthening	227
II. Surface Coating	234
References	238

## Mechanical Behavior

*R. Nathan Katz and E. M. Leno*

I. Introduction	241
II. Volume and Surface Finish Effects	242
III. Elastic Modulus	245
IV. Hardness	246
V. Tensile Strength	248
VI. Other Stress States	253
VII. Shock Effects	254
VIII. Fatigue of Ceramics	257
IX. Time-Dependent Properties	259
X. Fracture Energy	261
References	262

**Methods of Measuring Surface Texture***W. C. Lo*

I. Introduction	265
II. Methods	268
III. Summary	292
References	292

**Crystal Growth***Chandra P. Khattak*

I. Introduction	295
II. Crystal Growth by the Vapor-Solid Process	296
III. Crystal Growth by the Liquid-Solid Process	297
IV. Crystal Growth by the Solid-Solid Process	302
References	303

**Controlled Solidification in Ceramic Eutectic Systems***Kedar P. Gupta*

I. Introduction	305
II. Experimental Details	306
III. Heat Transfer in the Solidifying Ingot	310
IV. Eutectic Microstructures	312
V. Eutectic System, BaNb <sub>2</sub> O <sub>6</sub> /SrNb <sub>2</sub> O <sub>6</sub>	317
References	328

**Controlled Grain Growth***R. J. Brook*

I. Introduction	331
II. Normal Grain Growth Kinetics	339
III. Abnormal Grain Growth	349
IV. Direct Control of Grain Growth	352
V. Avoidance of Grain Growth	360
VI. Conclusions	362
References	362
