Contents of Previous Volumes	xi

## Morphogenesis of Solid Polymer Microstructures

## J. H. Magill

Ι.	Historical	3
II.	Polymeric Materials	14
III.	Polymer Synthesis	29
IV.	Molecular Weight	48
V.	Bonding and Molecular Geometry: Forces between Atoms and Molecules	65
VI.	Crystal Structures and Crystallinity of Polymers	89
VII.	Morphological Features of Crystallized Polymers	122
VIII.	The Nature of the Amorphous State	168
IX.	Relationship between Morphology and Properties	181
Χ.	Crystallization Kinetics	247
XI.	Polymer Processing	296
XII.	Concluding Remarks	340
	References	341

#### Molecular Aspects of Rubber Elasticity

#### Thor L. Smith

Ι.	Introduction	369
II.	Characteristics of Macromolecules and Networks	371
III.	Molecular Theory of Rubber Elasticity	384
IV.	Properties and Structure of Elastomers	416
V.	Summary Remarks	441
	Symbols	444
	References	447
INDEX		1
