FOREWORD	xi
PREFACE	xiii
CONTENTS OF PREVIOUS VOLUMES	xv

Neutron Scattering—General Introduction

G. Kostorz and S. W. Lovesey

I. Introduction	2
II. Neutron Production and Detection	12
III. Basic Scattering Theory	21
IV. Diffraction from Crystals	30
V. Liquids and Amorphous Substances	42
VI. Coherent Inelastic Scattering	50
VII. Incoherent Inelastic Scattering	57
VIII. Conclusion	63
References	64

Neutron Crystallography

P. J. Brown

I. Introduction	69
II. Techniques for Neutron Crystallography	73
III. Selected Applications of Nuclear Scattering	91
IV. Applications of Magnetic Scattering	109
V. Conclusions	128
References	129

Phonons and Structural Phase Transitions*R. Currat and R. Pynn*

I.	Opening Remarks	132
II.	Phonons and the Properties of Materials	135
III.	Phonon Dispersion and Interatomic Forces	139
IV.	Displacive Phase Transitions	146
V.	Fermi Surface Instabilities	162
VI.	Other Structural Phase Transformations	173
	References	185

Phonons and Defects*R. M. Nicklow*

I.	Introduction	191
II.	Theory	193
III.	Experimental Results	205
IV.	Conclusion	224
	References	224

Small-Angle Scattering and Its Applications to Materials Science*G. Kostorz*

I.	Introduction	227
II.	Theory	229
III.	Experimental Details	247
IV.	Studies of Phase Separation	260
V.	Other Results	277
VI.	Conclusion	285
	References	286

Diffuse Elastic Neutron Scattering from Nonmagnetic Materials*G. S. Bauer*

I.	Introduction	291
II.	Theory	293
III.	Experimental Conditions	309
IV.	Experimental Results	317
V.	Future Prospects	333
	References	334

Magnetic Inhomogeneities*T. J. Hicks*

I. Introduction	337
II. Magnetic Inhomogeneities Associated with Atomic Inhomogeneities	338
III. Magnetic Domains	362
IV. Flux Lines in Superconductors	370
V. Conclusions	377
References	378

Polymer Conformation and Dynamics*J. S. Higgins*

I. General Background	381
II. Elastic Coherent Scattering—Small Angle Scattering from Polymer Samples	386
III. Inelastic and Quasi-Elastic Scattering	407
IV. Future Work	416
References	420

Hydrogen in Metals*K. Sköld, M. H. Mueller, and T. O. Brun*

I. Introduction	423
II. Structure of Metal Hydrides	425
III. Phonon Dispersion Curves in Metal—Hydrogen Systems	437
IV. Hydrogen Diffusion and Quasi-Elastic Neutron Scattering	444
References	457

Materials Problems in Neutron Devices*A. Freund and J. B. Forsyth*

I. Introduction	462
II. Defining Beam Geometry	463
III. Monochromators	471
IV. Filters	490
V. Specimen Environment	498
VI. Detection	503
References	507
