

## Contents

LIST OF CONTRIBUTORS	xi
FOREWORD	xiii
PREFACE	xv
CONTENTS OF PREVIOUS VOLUMES	xvii

### **Impact Damage Mechanics: Solid Projectiles**

*A. G. Evans*

I. Introduction	1
II. Damage Observations	3
III. Dynamic Properties	6
IV. Contact Characteristics	26
V. Impact Stresses	39
VI. Impact Damage Models	47
VII. Strength Degradation	62
VIII. Erosion	63
IX. Summary	65
References	65

### **Erosion by Solid Particle Impact**

*A. W. Ruff and S. M. Wiederhorn*

I. Introduction	69
II. Single Particle Erosion	70
III. Multiple Particle Erosion	92
IV. Theories of Erosion	113
V. Significant Parameters	121
VI. Summary and Recommendations	123
References	124

## The Mechanics of Liquid Impact

*William F. Adler*

I. Introduction	127
II. Material Response to Liquid Impingement	130
III. Analyses of Liquid Impacts	145
IV. Rain Erosion Prediction Models	168
V. Summary and Recommendations for Future Work	175
References	178

## Erosion of Solid Surfaces by the Impact of Liquid Drops

*J. H. Brunton and M. C. Rochester*

I. Introduction	186
II. Experimental Methods and Erosion Simulation Techniques	190
III. Impact Variables and Their Effect on Erosion	192
IV. The Effect of Material Properties on Erosion	201
V. The Impact Pressure and the Flow of a Drop during Impact	203
VI. Erosion of Metals and Alloys	216
VII. The Erosion Resistance of Nonmetals: Polymers, Ceramics, and Glasses	224
VIII. Composites	233
IX. Coatings	236
XI. Erosion Theories	238
XII. Summary and Recommendations for Further Work	242
References	244

## Cavitation Erosion

*C. M. Preece*

I. Introduction	249
II. Experimental Techniques	252
III. Erosion Rates	259
IV. Microscopic Observations	274
V. Similarity between Cavitation Erosion and Liquid Impact Erosion	296
VI. The Mechanisms of Cavitation Erosion	297
VII. Summary and Recommendations for Future Work	303
References	305

## Dynamics of Cavitation Bubbles and Cavitating Liquids

*K. A. Mørch*

I. Introduction	309
II. Cavitation Inception	311

CONTENTS	<i>ix</i>
III. Dynamics of Single Bubbles	315
IV. Dynamics of Clusters of Bubbles	338
V. Wave Propagation in Cavitating Liquids	340
VI. Flow Cavitation	346
VII. Vibratory Cavitation	348
VIII. Cavitation Number and Scale Effects	349
IX. Summary and Recommendations for Future Work	352
References	353

## **Erosion–Corrosion**

*Brijesh Vyas*

I. Introduction	357
II. Interaction between Chemical and Mechanical Attack	358
III. Aqueous Medium	361
IV. Gaseous Medium	377
V. Summary and Recommendations for Future Work	389
References	390

## **Practical Applications of Erosion Processes**

*D. A. Summers*

I. Historical Review	395
II. The Development of Hydraulic Mining of Coal	398
III. Current Hydraulic Mining Practices	401
IV. Higher Pressure Research in Mining	404
V. High Pressure Drilling Systems	407
VI. High Pressure Cutting	415
VII. High Pressure Cleaning	418
VIII. Low Pressure Cleaning	426
IX. Cavitation Cleaning	429
X. Cavitation Cutting	431
XI. Abrasive Cleaning	432
XII. Abrasive Cutting	434
XIII. Summary and Conclusions	434
References	437
