LIST OF CONTRIBUTORS	ix
FOREWORD	xi
PREFACE	xiii

1 Introduction

J. K. Hirvonen

I. Characteristics of Ion Implantation	1
II. Historical Perspective and Scope of Present Volume	3
III. Ion Implantation—Advantages and Limitations of Technique	4
IV. Status of Industrial Applications of Ion Implantation	6
V. Ion-Implantation Equipment and Costs	11
References	15

2 Ion Bombardment Effects on Material Composition

Z. L. Liao and J. W. Mayer

I. Introduction	17
II. Effects of Ion Bombardment	18
III. Sputtering of Alloys and Compounds	24
IV. High-Dose Ion Implantation	35
V. Conclusion	48
References	49

3 Implantation Metallurgy—Equilibrium Alloys

S. M. Myers

I. Introduction	51
II. General Properties	53

	III. Experimental Characterization	65
	IV. Applications	66
	V. Conclusion	81
	References	82
4	Implantation Metallurgy—Metastable Alloy Formation	
	<i>J. M. Poate and A. G. Cullis</i>	
	I. Introduction	85
	II. Dilute Alloys—Experimental	91
	III. Concentrated Alloys—Experimental	96
	IV. Compound and Precipitate Formation	107
	V. Mechanisms for Formation of Implanted Layer Structures	112
	VI. Conclusions	130
	References	131
5	Ion Implantation Studies of Hydrogen in Solids	
	<i>S. T. Picarux</i>	
	I. Introduction	135
	II. Fundamental Implantation Parameters	138
	III. Experimental Techniques	145
	IV. Hydrogen Implantation Studies of Metals	148
	V. Semiconductors and Insulators	165
	VI. Applications	168
	References	171
6	The Application of Ion Implantation to Aqueous Corrosion	
	<i>V. Ashworth, R. P. M. Procter, and W. A. Grant</i>	
	I. Introduction to Corrosion	176
	II. Effect of Ion Implantation on Aqueous Corrosion	197
	III. Corrosion Behavior of Amorphous Metals	238
	IV. Use of Ion Implantation in Studies of Corrosion Mechanisms	242
	V. Conclusions and Future Trends	249
	Appendix	250
	References	255
7	Thermal Oxidation	
	<i>G. Dearnaley</i>	
	I. Introduction	257
	II. The Oxidation of Metals	260

CONTENTS

vii

III. The Oxidation of Alloys	266
IV. Ion Implantation of Metals	271
V. Observations on Implanted Metals	276
VI. Practical Applications of Ion Implantation for Oxidation	
Resistance	316
References	318

8 Tribological and Mechanical Properties

N. E. W. Hartley

I. Introduction	321
II. Wear Mechanisms	322
III. Contact Mechanisms during Friction	323
IV. Ion Implantation and Adhesion	333
V. Wear	335
VI. Microhardness	356
VII. Fatigue	360
VIII. Industrial Applications of Ion Implantation in Mechanical	
Property Improvement	363
References	368

9 Chemical Properties of Ion Implanted Materials

Gerhard K. Wolf

I. Introduction	373
II. Analytical Methods for Studying the Chemical Properties	
of Ion Implanted Materials	376
III. Radiation Chemistry of Implanted Materials	384
IV. The Chemical State and the Reactions of Implanted Atoms	388
V. Applications of Ion Bombarded Materials in Chemistry	401
References	411

10 Superconductivity

O. Meyer

I. Introduction	415
II. Disordered Systems	417
III. Metastable Alloys	429
IV. Compounds	434
V. Applications	439
VI. Conclusions	441
References	441

II Optical Effects of Ion Implantation*P. D. Townsend and S. Valette*

I. Introduction	446
II. Optical Waveguides and Components for Electro-Optics	448
III. Implantation: Index and Annealing Changes	453
IV. Optical Properties of Implanted Semiconductors	458
V. Luminescence: General Considerations	469
VI. Optical Absorption	480
VII. Conclusions	482
References	483

INDEX	489
CONTENTS OF PREVIOUS VOLUMES	497
