vii

Exoelectron Emission

William J. Baxter

I.	Introduction	1
II.	Instrumentation	3
III.	Mechanisms of Exoelectron Emission	15
IV.	Applications of Photostimulated Exoelectron Emission	30
V.	Summary	61
	References	63

Photoacoustics in Materials Science

Allan Rosencwaig

I.	Introduction	68
II.	Photoacoustic Theory	71
III.	Experimental Methodology	74
IV.	Spectroscopic Studies	78
V.	Surface Studies	90
VI.	Deexcitation Processes in Condensed Media	96
VII.	Thermal Processes	106
VIII.	Depth Profiling and Thickness Measurements	108
IX.	Photoacoustic Microscopy	110
X.	Future Trends	115
	References	116

Microdynamic Testing of Materials

E. M. Uygur

I.	Introduction	119
II.	Instrumentation	121
III.	Measurement Techniques	145

IV. Applications	149
V. Concluding Remarks	173
References	174

Experimental Methods in the Mechanochemistry of Inorganic Solids*Vladimir Boldyrev*

I. Introduction	186
II. Experimental Methods of Investigation of Mechanochemical Processes in Inorganic Solids	187
III. Investigation of Variation of Physicochemical Properties Caused by the Mechanical Pretreatment of Solids	208
IV. Conclusion	219
References	220

High-Resolution Transmission Electron Microscopy*Ronald Gronsky*

I. Introduction	225
II. Principles	228
III. Systems	239
IV. Technique	245
V. Summary	253
References	255
