
Contents and Subject Index

PART I SUMMARY AND CONCLUSIONS

EXECUTIVE SUMMARY 2
1. BACKGROUND 5
2. INTRODUCTION 8
3. FINDINGS REGARDING MARKET SIZE AND POTENTIAL MARKET GROWTH 11
4. FINDINGS REGARDING INDUSTRY STRUCTURE 15
5. FINDINGS REGARDING INTERNATIONAL DIFFERENCES IN COMPETITIVE STRATEGY 24
Research and Development 24
Degree of Integration of Production 27
Early Commercialization Strategies 29
6. POTENTIAL ECONOMIC BENEFITS OF TECHNOLOGICAL CHANGE IN ADVANCED CERAMIC MATERIALS 31
Potential Productivity Benefits 31
Potential Savings of Critical Materials 34
Implications of Changes in U.S. Competitiveness 35
7. FINDINGS REGARDING TECHNICAL BARRIERS 37
Process-Related Barriers 38
Property and Performance Barriers 40

Measurement and Testing Barriers.	43
8. CONCLUSIONS	47
9. IMPLICATIONS FOR NBS.	50
APPENDIX: SUMMARIES OF INDIVIDUAL CASE STUDIES.	52
Heat Engines	52
Capacitors	57
Integrated Optics.	59
Gas Sensors	65
Cutting Tools	70
REFERENCES.	76

PART II HEAT ENGINE APPLICATIONS

EXECUTIVE SUMMARY.	78
1. BACKGROUND AND INTRODUCTION.	84
Background	84
Introduction.	85
Organization of This Part	87
2. STRUCTURAL CERAMIC TECHNOLOGY AND TECHNICAL BARRIERS	88
Introduction.	88
Introduction to Structural Ceramic Materials	89
Systems and Components	89
Introduction.	89
Incremental Substitution of Ceramic Parts	90
The Uncooled and Adiabatic Engines	90
The Automotive Gas Turbine Engine.	94
Processing	95
Major Technological Barriers and Opportunities	97
Near-Term Technological Problems and Opportunities	97
Longer-Term Technological Problems and Opportunities.	97
Starting Materials Barriers.	98
Process Barriers.	100
Forming and Consolidation	100
Densification	101
Finishing	102
Measurement Barriers.	102
Design Methodology Barriers	104
3. INDUSTRY AND MARKET BACKGROUND	105
Introduction.	105

The Market for Heat Engines and Ceramic Components	105
The Demand for Heat Engines	105
Current Market Penetration by Ceramic Components	109
Imports and Exports of Vehicles, Components, and Structural Ceramic Materials	109
Major Buyers and Sellers of Structural Ceramic Powders and Components for Motor Vehicle Heat Engines	112
The Degree of Vertical and Horizontal Integration	113
Conditions of Entry	115
Competition and Competitive Strategy in the Structural Ceramics Industry	115
Worldwide Research and Development Activities	117
R&D on Heat Engine Applications in the United States	117
Foreign R&D in Heat Engine Applications	122
R&D in Japan	122
R&D in the Rest of the World	126
 4. AN ASSESSMENT OF THE POTENTIAL SOCIAL BENEFITS OF CERAMIC HEAT ENGINE TECHNOLOGY	129
Introduction	129
Key Technological Milestones	130
A Scenario for Estimating the Fuel-Efficiency Benefits of Ceramic Heat Engines in Motor Vehicles	133
Caveats Regarding Interpretation of the Fuel Savings Forecasts	136
Other Potential Cost Saving Benefits of Ceramic Heat Engines	140
The Benefits of Ceramic Engines in Other Uses	140
Savings of Critical Metals	141
Cobalt	141
Chromium	142
Nickel	142
U.S. Chances in the International Race to Develop Ceramic Heat Engines	142
Implications for the U.S. Balance of Trade	144
 APPENDIX A: PROPERTIES OF STRUCTURAL CERAMIC MATERIALS	148
 APPENDIX B: MAJOR STRUCTURAL CERAMIC PROCESSING STEPS	155
Powder Production	155
Consolidation and Forming	156
Densification	157
Finishing	159
Inspection and Quality Assurance	159
 APPENDIX C: POWDER PRODUCTION PROCESSES	162
Silicon Carbide	162
Silicon Nitride	166

Zirconia.	167
LIST OF INDIVIDUALS INTERVIEWED.	168
BIBLIOGRAPHY AND SELECTED REFERENCES	169

PART III CAPACITORS

EXECUTIVE SUMMARY.	174
1. BACKGROUND AND INTRODUCTION.	177
Background	177
Introduction.	178
Organization of This Part	179
2. CERAMIC CAPACITOR TECHNOLOGY	181
Introduction.	181
Introduction to Capacitors	181
Capacitor Functions.	182
Capacitor Materials	183
Ceramic Capacitor Dielectrics	185
Capacitor Manufacturing Processes	188
The Wet Process	191
The Dry Process	192
The Fugitive Electrode Process.	192
Other Processes.	193
Directions of Future Technological Change and Economic Effects	193
Introduction.	193
Future Trends in Technology and Cost Reduction	194
Major Technical Barriers to Further Cost Reduction.	196
Evaluation of Technical Change and Future Trends in Price.	201
Reliability of Multilayer Ceramic Capacitors.	205
Major Technical Barriers to Reliability Improvement	205
Future Trends in Reliability	207
Compatibility of MLCs with New Active Components	207
Technical Barriers	209
3. THE U.S. CERAMIC CAPACITOR INDUSTRY	210
Introduction and Summary	210
The U.S. Market for Ceramic Capacitors	211
Introduction.	211
Historical Trends in U.S. Shipments of Ceramic Capacitors	211
The Demand for Multilayer Ceramic Capacitors by End Use	215
Future Growth in the Demand for Multilayer Ceramic Capacitors	217
Market Penetration of Multilayer Ceramic Capacitors	220
Imports and Exports of MLCs	221

Industry Structure	224
Introduction.	224
Industry Concentration and Integration.	224
Barriers to Entry	227
Expected Future Trends in Industry Structure	228
Industry Competition	229
Research and Development in the MLC Industry	231
 4. THE BENEFITS OF FUTURE TECHNOLOGICAL ADVANCE IN MULTILAYER CERAMIC CAPACITORS	235
Introduction	235
Productivity Benefits	236
Introduction.	236
Benefits Attributable to Reduced Manufacturing Cost	236
Benefits Attributable to Improved Reliability	240
Other Productivity Benefits.	244
Benefits for U.S. Competitiveness in World Markets	244
Introduction.	244
Short-Term Prospects for U.S. Competitiveness.	245
Longer-Term Prospects for U.S. Competitiveness.	246
Substitution for Critical Materials	248
 5. REPORT SUMMARY	249
Summary of Major Findings	249
Summary of Major Technical Barriers	252
Summary of Measurement- and Standards-Related Technical Barriers	253
Primary Measurement- and Standards-Related Barriers	253
Secondary Measurement- and Standards-Related Barriers	254
 BIBLIOGRAPHY AND SELECTED REFERENCES	256

PART IV INTEGRATED OPTIC DEVICES

EXECUTIVE SUMMARY	258
 1. BACKGROUND AND INTRODUCTION	264
Background	264
Introduction	265
Organization of This Part	266
 2. A BACKGROUND DISCUSSION OF INTEGRATED OPTICS TECHNOLOGY	268
Introduction	268
Systems and Components	269
Fiber Optic Communications Systems	269
Integrated Optic Devices.	272

Candidate Ceramic Materials for Integrated Optics.	277
The Fabrication of Integrated Optic Devices.	278
Current Status of Integrated Optic Technology	281
Technical Barriers to Commercial Development and Diffusion	284
Optical Damage.	284
Availability of Consistent Material	285
Electrooptical Coefficient and Implications for Device Configuration	286
Crystal Orientation in Devices	286
Specification of Ultimate Device Functions	287
Measurement-Related Barriers to Development and Diffusion	287
Index of Refraction Measurement.	287
Optical Quality Material Characterization and Standards.	287
Phase Equilibria	287
Waveguide Fabrication Monitoring Techniques	288
Lifetime Testing	288
3. AN OVERVIEW OF THE INTEGRATED OPTICS INDUSTRY.	289
Introduction.	289
End-Use Industries and Applications	290
The U.S. Integrated Optic Device Industry	292
The Foreign Integrated Optic Device Industries.	295
4. THE EXPECTED SOCIAL BENEFITS OF THE DEVELOPMENT AND DIFFUSION OF INTEGRATED OPTICAL DEVICES	297
Introduction.	297
Prospects for the Development of a Market for Integrated Optics	298
Projections of U.S. Sales of Ceramic Integrated Optical Communications Devices.	298
Sensitivity to Assumptions Regarding Modulators and Filters.	300
Assumptions Underlying Optical Switch Projections.	305
Overview of the Benefits of Integrated Optics	308
An Assessment of the Potential Economy-Wide Cost Saving Resulting from the Use of Integrated Optics in Communications.	309
Conclusions	311
LIST OF INDIVIDUALS INTERVIEWED	313
BIBLIOGRAPHY AND SELECTED REFERENCES	314
 PART V	
TOXIC AND COMBUSTIBLE GAS SENSORS	
EXECUTIVE SUMMARY.	318
1. BACKGROUND AND INTRODUCTION.	325
Background	325
Introduction.	326

Organization of This Part	327
2. AN OVERVIEW OF CERAMIC SENSORS	329
Introduction.	329
An Overview of Ceramic Sensors	330
Piezoelectrics	333
Negative Temperature Coefficient (NTC) Thermistors	333
Positive Temperature Coefficient (PTC) Resistors	333
Varistors	334
Oxygen Sensors.	334
Humidity Sensors	335
Combustible and Toxic Gas Sensors	335
Focus of the Remainder of the Report	336
3. A BACKGROUND DISCUSSION OF CERAMIC TOXIC AND COMBUSTIBLE GAS SENSOR TECHNOLOGY.	338
Introduction.	338
Sensor Operating Principles.	339
Ceramic Gas Sensor Structures.	340
Manufacturing Processes for Ceramic Gas Sensors	341
Status of Ceramic Gas Sensor Technology	345
Introduction.	345
Competing Gas-Sensing Technologies	346
General Technical Barriers.	347
Selectivity	348
Stability	350
Reproducibility in Manufacture	351
Required Operating Temperatures	351
Measurement-Related Technical Barriers	352
Fundamental Mechanistic Research.	352
Research on the Interaction Among Processing, Device Structure, and Device Properties.	352
Standard Reference Materials and Standard Measurement Methods.	352
Catalysts	353
Characterization of New Materials	353
4. AN OVERVIEW OF THE CERAMIC TOXIC AND COMBUSTIBLE GAS SENSOR INDUSTRY.	354
Introduction.	354
End-Use Industries and Applications.	355
Industry Participants	356
Industry Sales.	361
Growth in the Demand for Ceramic Gas Sensors	362
Historical Trends in Demand	362
Prospects for Future Demand Growth	363
Imports and Exports	366
Research and Development Activities	366

U.S. Competitiveness in Gas Sensors in the Future	369
Implications for Productivity Growth	370
APPENDIX A: HYPOTHESIS CONCERNING CERAMIC GAS-SENSING MECHANISMS	373
LIST OF INDIVIDUALS INTERVIEWED	375
REFERENCES AND SELECTED BIBLIOGRAPHY	376

PART VI CUTTING TOOLS

EXECUTIVE SUMMARY	380
1. BACKGROUND AND INTRODUCTION	386
Background	386
Introduction	387
A Brief History of Metal-Cutting Tools	388
Organization of This Part	390
2. A BACKGROUND DISCUSSION OF TECHNOLOGICAL ISSUES CONCERNING ADVANCED CERAMIC CUTTING TOOLS	393
Introduction	393
Properties of Advanced Ceramic Cutting Tool Materials	394
Alumina (Al_2O_3)	397
Alumina plus Titanium Carbide ($\text{Al}_2\text{O}_3\text{-TiC}$)	397
Silicon Nitride-Based Compositions	397
Other Advanced Ceramic Cutting Tool Materials	402
The Chemistry of Metal-Cutting with Ceramic Tools	405
Fabrication Methods for Advanced Ceramic Cutting Tools	406
Powder Production	406
Powder Consolidation and Component Forming	410
Densification	411
Finishing	411
Inspection and Quality Assurance	412
Major Technical Barriers and Opportunities	413
Technical Barriers	413
Measurement-Related Barriers	415
Institutional Barriers	416
3. THE ADVANCED CERAMIC CUTTING TOOL INDUSTRY	418
Introduction	418
Overview of the U.S. Cutting Tool Industry	418
U.S. Sales of Advanced Ceramic Cutting Tools	420
U.S. Imports and Exports of Cutting Tools	421
Suppliers of Advanced Ceramic Cutting Tools to the United States	423

Foreign Markets for Advanced Ceramic Cutting Tools	425
Research and Development in the United States	426
Comparison of U.S. and Foreign Research Efforts	427
4. AN ASSESSMENT OF THE POTENTIAL SOCIAL BENEFITS OF NEW CERAMIC CUTTING TOOLS	430
Introduction.	430
An Overview of the Benefits of New Ceramic Cutting Tools.	431
An Overview of the Problems with New Ceramic Cutting Tools	433
Estimates of the Social Cost Savings Resulting from the Use of Advanced Ceramic Cutting Tools	435
Caveats Regarding Cost Savings Projections	437
Savings of Critical Materials.	439
Cobalt.	440
Tungsten	440
International Competitiveness in Advanced Ceramic Cutting Tools	440
Conclusions	442
APPENDIX A: SYSTEMS FACTORS AFFECTING THE PRODUC- TIVITY OF METAL-CUTTING WITH ADVANCED CERAMIC TOOLS	443
LIST OF INDIVIDUALS INTERVIEWED	448
BIBLIOGRAPHY AND SELECTED REFERENCES	449
 ADDENDUM A	
COMPETITIVE ASSESSMENT OF U.S. ADVANCED CERAMICS INDUSTRY	
EXECUTIVE SUMMARY	452
1. INTRODUCTION	461
Conventional Ceramics	461
Advanced Ceramics	462
The Ceramic Production Process.	464
Advanced Ceramic Materials—Inputs	466
Properties of Advanced Ceramics—Outputs and Potential Markets.	467
Advanced Ceramic Businesses	469
Firms and Firm Segments	471
2. PERFORMANCE MEASURES OF THE ADVANCED CERAMICS INDUSTRY	476
Shipments and Trade	476
Research and Development	482
3. RECENT INTERNATIONAL COMPETITIVENESS OF THE U.S. ADVANCED CERAMICS INDUSTRY	486
Electronic Components Business	486

Engineering Products Business	487
Summary	488
4. TRENDS AND FORCES INFLUENCING THE FUTURE INTERNATIONAL COMPETITIVENESS OF THE U.S. ADVANCED CERAMICS INDUSTRY	489
Future Market Demand for Advanced Ceramics.	489
Future Technology Developments	500
5. FOREIGN ADVANCED CERAMICS INDUSTRIES AND FOREIGN GOVERNMENTS' ROLE IN PROMOTING THEIR DOMESTIC ADVANCED CERAMICS INDUSTRIES	506
Japan's Position in Advanced Ceramics	506
Western Europe's Position in Advanced Ceramics.	516
6. ASSESSMENT OF THE INTERNATIONAL COMPETITIVENESS OF THE ADVANCED CERAMICS INDUSTRY	518
Electronic Components	518
Engineering Products	518
7. IMPLICATIONS OF ASSESSMENT OF U.S. POSITION IN ADVANCED CERAMIC ENGINEERING PRODUCTS.	525
Domestic Economic and International Trade Implications.	525
Military/National Security Implications	526
8. POLICY OPTIONS TO STRENGTHEN THE COMPETITIVE POSITION OF THE U.S. ADVANCED ENGINEERING CERAMICS INDUSTRY	530
Technology Push Options	530
Market Pull Options.	532
A Final Point	534
APPENDIX A: ADVANCED CERAMICS MATERIALS	535
Bauxite	535
Aluminum Oxide (Alumina)	535
Aluminum Silicate.	537
Silicon Carbide	537
Silicon Nitride	538
Zirconia.	539
Titanates	540
Ceramics Composites	540
APPENDIX B: APPLIED RESEARCH AND PRODUCT DEVELOPMENT.	544
Heat Engine Applications	544
Vehicular Engines	544
Selected Engine Parts	544
New Vehicular Engine Designs	545
Adiabatic Diesel Engine	546

Gas Turbine Engine	547
Stationary Engines.	549
Aircraft Turbine Engines.	551
Research	551
Cutting Tools	553
Background	553
Technical Trends.	555
Workpiece Composition	555
Workpiece Geometry	556
Cutting Speed.	556
Machine Tools	556
Research	557
Wear Part Applications	558
Bearings.	558
Seals	559
Nozzles	560
Electronic Components	561
Background	561
Capacitors	562
Cost	564
Size	565
Speed	565
Integrated Circuit Packaging	566
Speed	568
Size	569
Cost	569
Other Electronic Applications	570
Resistors	570
Sensors	571
Magnetic Components	572
 APPENDIX C: TECHNOLOGY AND RESEARCH NEEDED IN	
CERAMIC PROCESSING	574
Processing Technologies	574
Research Required.	575
Powdered Synthesis and Processing.	576
Microstructure Development	576
Data Base Research	578
Ceramic Forms Research.	578
Production Techniques Research	579
Quality Control Research	579
 APPENDIX D: THE INTERNATIONAL TRADE FRAMEWORK	581
General Agreement on Tariffs and Trade (GATT)	582
Non-Tariff Measures.	583
U.S. High Technology Initiatives	583
Organization for Economic Cooperation and Development (OECD)	584
Impact of Foreign Government Policies on Advanced Ceramics	584

Trade Policy Options	587
--------------------------------	-----

BIBLIOGRAPHY	589
-------------------------------	------------

ADDENDUM B
COMPETITIVE ASSESSMENT OF JAPANESE
ADVANCED CERAMICS INDUSTRY

ACKNOWLEDGMENTS.	594
---------------------------------	------------

1. INTRODUCTION	595
Objectives	596
Japan's Commitment to High-Technology Ceramics	598
Origin and Rationale of the Commitment.	598
Extent of the Commitment	599

2. CONCLUSIONS AND RECOMMENDATIONS	602
---	------------

3. JAPANESE GOVERNMENT COORDINATION AND	
MANAGEMENT OF HIGH-TECHNOLOGY CERAMICS PROGRAMS	604
Ministry of International Trade and Industry	607
National Laboratories.	609
Ministry of Education: Universities	611
Council for Science and Technology	614
Ceramics Associations and Societies	614

4. JAPANESE INDUSTRIAL HIGH-TECHNOLOGY CERAMICS	
ACTIVITY.	615
Business-Government Relationships	615
Market Demand for High-Technology Ceramics.	615
Market Strategies: "Thin Markets".	618
Japanese Companies Involved in Ceramics Research and	
Development	620
Ceramics for Automotive Applications	621
General Observations on Industry Activity	623

5. TECHNICAL STATUS OF HIGH-TECHNOLOGY CERAMICS IN	
JAPAN	625
Technical Goals and Their Relationship to Economic	
Considerations	625
Investment in Industrial Ceramics Processing Facilities	626
Examples of Japanese Advances in Ceramics.	627
Japanese Patent Position.	631

6. OPPORTUNITIES FOR COOPERATION	632
Mutually Beneficial Areas of Cooperation	632
Establishment of Standards	633
Economic Data	633

Scientific and Technical Literature	633
Interaction Between U.S. and Japanese Ceramic Societies	634
Individual Interactions Between U.S. and Japanese Ceramists.	634
Other Types of Cooperative Ventures	635
 BIBLIOGRAPHY	 637
 CURRICULA VITAE OF COMMITTEE MEMBERS	 638
