

LIST OF CONTENTS

Preface	ix
Welcome and Opening	1
P.J. van Westen, Director of the CEC JRC, Petten Establishment.	
The Impact of the High Temperature Ceramics in Industrial Growth in the Community.	4
A.A. van Rhijn, Deputy Director General, CEC, Directorate General: Internal Market and Industrial Affairs.	
Session 1: Mechanical/Structural Features.	
Chairman: M.K. Halpin, Institute of Industrial Research and Standards, Dublin, Irl.	
Ceramics for Future Automotive Power Plants.	10
P. Walzer, Volkswagen A.G., Wolfsburg, FRG.	
Non Oxide Ceramics (Silicon Carbide, Silicon Nitride, Sialon).	23
E. Gugel, Annawerk GmbH, Rödental, FRG.	
Transformation-Toughened Ceramics (TTC).	51
N. Claussen, Max-Planck-Institut für Metallforschung, Stuttgart, FRG.	
Cracking Resistance of Alumina-Based Polyphase Ceramics.	87
H. Le Doussal, G. Bisson, Société Française de Céramique, Paris, F.	
Mechanical Properties and Engineering Design with Ceramics.	98
R.W. Davidge, AERE Harwell, U.K.	
Engineering of Refractory Structures.	120
G.C. Padgett, F.T. Palin, British Ceramic Research Association, Stoke-on-Trent, U.K.	
Joining of Ceramics for High Temperature Applications.	138
M. Erz, H.W. Hennicke, Technische Universität, Clausthal, FRG.	
Nondestructive Testing of Ceramics.	157
K. Goebbels, H. Reiter, Fraunhofer-Institut für zerstörungsfreie Prüfverfahren, Saarbrücken, FRG.	
Session 2: Thermal/Physical Features.	
Chairman: P. Popper, British Ceramic Research Association, Stoke-on-Trent, U.K.	
On the Use of Ceramics in Diesel Engines.	178
B. Palm, Saab-Scania, Södertälje, S.	
Recuperative Ceramic Heat Exchanger.	208
S. Schindler, A. Krauth, Rosenthal Technik A.G., Selb, FRG.	

SiSiC - A Material for High Temperature Ceramic Heat Exchangers. R. Röttenbacher, G. Willmann, Dornier System GmbH, Friedrichshafen, FRG.	231
MHD Systems. L.H.Th. Rietjens, Eindhoven University of Technology, Eindhoven, NL.	250
Session 3: Chemical Features.	
Chairman: H. Hausner, Technische Universität, Berlin, FRG.	
Refractories in Coal Gasification Plants. R. Dürrfeld, Ruhrkohle, Oel und Gas GmbH, Bottrop, FRG.	263
Refractories for Coal Gasification. The State-of-the-Art in the U.S. C.R. Kennedy, P.E. Schlett, Exxon Research and Engineering Co., Florham Park, N.J., U.S.A.	283
Refractories Problems in Coal Gasifiers. J.P. Kiehl, Lafarge Refractaires, Venissieux, F.	318
Thermodynamic Aspects of the Application of Ceramics/Refractories in Advanced Energy Technologies. A. Muan, Pennsylvania State University, University Park, Pennsylvania, U.S.A.	348
Inorganic, Porous Membranes Preparation, Structure and Potential Applications. K. Keizer, A.F.M. Leenaars, A.J. Burggraaf, T.H. Twente, Enschede, NL.	367
Session 4: Electrical and Electronics Features.	
Chairman: C. Palmonari, Centro Ceramico, Bologna, I.	
Ceramic Materials for Electrochemical Energy Conversion Devices. B.C.H. Steele, Imperial College, London, U.K.	386
Beta-Alumina for Sodium-Sulphur Batteries. A. Wicker, Laboratoires de Marcoussis, Compagnie Générale d'Electricité, Marcoussis, F.	413
Ceramics for Sensors and Monitors. P. McGeehin, D.E. Williams, AERE, Harwell, U.K.	422
Sensors, Thin Films, Electrodes. O. de Pous, Battelle, Geneva, Ch.	469
Production of Zirconia Fibers from Sol-Gels for Water Electrolysis Application. E. Leroy, C. Robin-Brosse, J.P. Torre, Lafarge Réfractaires, Trappes, F.	501
Final session:	
Chairman: A. Baudran, Société Française de Céramique, Paris, F.	
Ceramic Fabrication. R.J. Brook, University of Leeds, U.K.	518

Panel Discussion	526
Panel Members: A. Majdic, Forschungsinstitut der Feuerfest-Industrie, Bonn, FRG. R. Metselaar, University of Technology, Eindhoven, NL A. Mocellin, Ecole Polytechnique Fédérale de Lausanne, CH, P. Popper, British Ceramic Research Association, Stoke-on-Trent, U.K.	
Post-Colloquium Workshop Conclusions	534
List of Participants	537
