

# CONTENTS OF VOLUME 1

Contents of Volume 2	xxvii
<u>Invited Papers</u>	
Mechanistic and continuum aspects of toughness in heterogeneous polymers A.S. Argon, R.E. Cohen and O.S. Gebilioglu	3
Unique contributions to understanding fatigue fracture from studies of cyclic deformation C. Laird and F.L. Liang	15
A new concept and energetical model of fracture using acoustic emission L.I. Maslov	27
Study of the process zone at the crack tip (behavior of the voids at the crack tip of aluminum alloy specimen) H. Miyamoto, K. Machida, H. Okaysu and T. Kawazoe	39
Predicting the growth of small and large cracks using a crack-closure model J.C. Newman Jr., E.P. Phillips and M.H. Swain	51
Fatigue analysis for variable amplitude loading: fundamental aspects and engineering applications H. Nowack and R. Marissen	61
Global and local approaches of creep crack initiation and growth A. Pineau	75
Engineering problems and engineering solutions of stress corrosion cracking M.O. Speidel	87
Quantifying creep-corrosion interaction D.M.R. Taplin, M.C. Pandey, N.G. Taylor and R.C. Hurst	99

XX

Simplified design of composite materials S.W. Tsai, I. Susuki and J.M. Patterson	117
Electrochemical reactions and corrosion fatigue crack growth R.P. Wei	129
Elucidation of the mechanism of HIC and SCC with the aid of stress analyses and fracture mechanics C.M. Hsiao	141
<u>I. Material Aspects of Fracture in Engineering Practice</u>	
Constitutive equations and cavity growth rate for a porous plastic medium T. Guennouni and D. François	155
Influence of the microstructure on the mechanical properties of the dual phase steels analysed by finite element method (FEM) Z.H. Li, Y.L. Wang, J.H. Luo and Z.B. Kuang	163
Crack initiation from the interface of superficial inclusions M.H. Ambroise, T. Bretheau and A. Zaoui	169
Limits to sheet metal formability and the prediction of wrinkling failures K.W. Neale	177
A stress field of a damage material near crack tip Q.H. Tang and T.C. Wang	183
Micromechanics of the embrittlement of crystal interfaces J.S. Wang, P.M. Anderson and J.R. Rice	191
Tests and analysis on the ductile fracture of axisymmetric specimens X.X. Xia, G.Y. Yang, Y.S. Hong and G.C. Li	199
Damage distribution around a blunted crack tip under large-scale yielding B.X. Yang, W.H. Tai and F. Nagota	205
The criterion of critical void growth rate and its applications C.Q. Zheng, L. Zhou and J.M. Liu	213
Singularity fields and fracture criterion for mode-III crack growing unsteadily in power-law anisotropic hardening materials Y. Dai, J.C. Jiang and K.C. Hwang	219
A method for calculating stress intensity factors for cracks in infinite bodies under hertzian contact loads using FEM P. Dillström	225
Stress field near the root of a blunted crack under plane stress state H. Pan	233

Macroscopic fracture criteria for structural materials under multiaxial loading G.S. Pisarenko and A.A. Lebedyev	239
Dugdale model solution for compact specimen X.R. Wu and W. Zhao	243
Fracture characteristic of spring steel under combined mode loading Y.S. Zhao	249
Investigation on the relation between load and plastic displacement of cracked specimen T. Zhuang and H.W. Liu	255
Prediction of $K_{IC}$ from S-N tests J.C. Balthazar and J.C. Radon	263
Ductile crack initiation and growth in austenitic stainless steels: influence of cyclic strain hardening P. Balladon and J. Heritier	269
The J-integral and tearing modulus for stable crack growth due to nonproportionally applied loads B. Klase'n and S. Kaiser	277
Fracture toughness and microstructure of Fe-Cr-C-B hardfacing alloys H. Berns, A. Fischer and W. Theisen	285
Fracture toughness and rolling contact fatigue life of GCr15 steels made by different metallurgical processes Z.H. Lai, M.G. Zeng, W.Q. Du, C.X. Ma, J.X. Zhao, Z.R. Liu, D.F. Cui, L.J. Yuan and W.X. Ai	295
The response of two HSLA steels to multistage compression G. Nadkarni, F. Wang and J.G. Lenard	301
Influence of notch tip state of stress on the fracture characteristics of a HSLA steel V.R. Ranganath, A.N. Kumar and R.K. Pandey	309
An experimental study of unstable fracture point of surface crack and determination of $K_{Ie}$ Y.X. Wu	317
Inhomogeneous deformation of grains and roughening of free surface of polycrystalline iron during compressive plastic deformation T. Abe, S. Nagaki and T. Nishiyama	325
The role of stress triaxiality and microstructure in ductile fracture of low carbon cast steel M.U. Biel and L.S. Golaski	333
Microstructure and fracture of isothermally quenched 40CrMnSiMoV steel D.M. Chen, G.L. Hu and M.K. Kang	341

Ductile fracture in mild steel under tensile stress Z.R. He and L. Zheng	349
Further investigation on macro- and micro-characteristics of 2.25 Cr-1Mo steels with and without RE additions Y.S. Hong, W.R. Tyson, B. Faucher and M. Shehata	357
A TEM study on the nature of strengthening and toughening in a matrix steel 65Cr4W3Mo2VNb G.H. Huang, N.S. Cao and K. Cui	365
Influence of morphology of ferrite in microstructure on fracture behaviour of low-carbon steel at low temperature Z. Huang, M. Yao and Y.L. Fan	373
On nature of particle emission during fracture of solids L.I. Maslov and V.V. Sukharevsky	379
Effect of dynamic strain aging and neutron irradiation on mechanical and fracture characteristics of ferritic steels K.L. Murty and Y.H. Jung	387
The texture dependence of stretcher-strain markings and fracture paths in a polycrystalline AlMg-alloy E. Pink, H.P. Stüwe and J. Krol	395
Fracture toughness of cold worked austenitic steels P.J. Uggowitzer, M.O. Speidel and E. Werner	401
The microstructure control parameter of ductile-brittle transition temperature (DBTT) of steels S.K. Wang, Y. Zhao, C.N. Chen and Q.P. Zhong	411
Mechanical properties and aging behavior of nitrogen alloyed austenitic steels E. Werner, P. Uggowitzer and M.O. Speidel	419
A study of mechanism of overage behaviour in a Cr-Mo-V steel Z.Y. Zhao and B.W. Zhong	429
In situ fracture experiments in a spheroidized low carbon steel Y.Z. Zhang, S.J. Dai, H.C. Zou and P.F. Miao	437
Material toughness and flaw size influence on pressure vessel fracture behaviour M. Teodorescu and B.R. Irimescu	445
Application of J-integral approach to the safety and reliability assessment of a pressure vessel containing a nozzle corner crack A. Jovanovic, A.C. Lucia and S. Sedmak	453
Effect of hydrostatic pressure on high temperature failure in superplastic aluminum alloys A.H. Chokshi, J.E. Franklin and A.K. Mukherjee	461
Post yield crack growth analysis in full-scale pressure vessel test S. Sedmak, B. Petrovski and V. Ogarevic	469

Case histories on surgical implants and their causes J. Pirs	477
Shear modulus estimation of the adhesive in a double-lap bonded joint Y. Gilibert, M.L.L. Klein and A. Rigolot	485
Toughness of composite laminates M.R. Sabayo	493
Oxide-dispersion-strengthened aluminium A.M. Elsheikh	503
<u>II. Fatigue Criteria and Material Characterization</u>	
On the development of unusually high fatigue crack propagation resistance in steels: role of crack tip shielding in duplex microstructures J.K. Shang and R.O. Ritchie	511
The fatigue fracture mechanism map for ferrite-martensite duplex phase microstructure in the near-threshold region Z.Z. Hu, Y.J. Zong, Z.F. Guo and M.J. Tu	521
High-cycle fatigue properties of powder-metallurgical iron parts B. Weiss, R. Stickler and G. Jangg	527
The fatigue crack growth process in Al-2%Cu alloy single crystal S. Lin, R.F. Lin, Y.G. Yao and J.M. Siao	537
Cyclic deformation of niobium single crystals T.L. Lin, J.S. Wu and X.F. Chen	543
X-ray examination of fatigue fracture surfaces of nodular cast iron Y. Hirose, Y. Yajima and K. Tanaka	551
Fatigue crack growth in high-rate regime for a medium strength steel N.E. Atanasiu and B.R. Irimescu	559
Crack growth propagation model for cyclic loading K. Golos	567
An experimental study of the closure behavior of short and long cracks X. Su and W.N. Sharpe, Jr.	573
Fatigue crack growth in early stage of surface cracks initiated from notches Y.Z. Lu, D.L. Li and J.C. Wang	581
Scatter and size effect at fatigue loading K. Heckel	587
Growth behaviour of a physically small fatigue crack in LY12 aluminum alloy W.Z. Jiang, C.S. Wang and X. Peng	595

Sulphidation and crack propagation in Superni 600 K.J.L. Iyer, S. Ramakrishna Iyer and V.M. Radhakrishnan	601
Intra- and intergranular cyclic deformation and the associated cracking in pure aluminium Z.G. Wang and Y.B. Xia	609
A model for the unloading stiffness change during the first fatigue stages of pure polycrystalline aluminium A. Hamel, R. Fougères, A. Vincent and P.F. Gobin	615
Secondary cyclic hardening and dislocation arrangements in pure Al polycrystals Y.B. Xia, Z.G. Wang and R.H. Wang	623
An investigation on the mechanism of fatigue crack propagation in various microstructures for a TC6 (Ti-6Al-2.5Mo-2Cr-0.5Fe-0.3Si) titanium alloy C.H. Tao and S.Q. Zhang	629
Multiaxial fatigue damage D. Socie	637
Multiaxial low-cycle fatigue behavior of thin-walled tubes with circular holes J.W. Tang, C. Wang, J.G. Yu, J.G. Wang and D.L. Jin	645
A damage mechanics approach to crack initiation in polycrystalline copper under multiaxial low cycle fatigue T. Inoue, T. Hoshide, T. Yoshikawa and Y. Kimura	651
Fatigue crack growth in notched AISI 316 stainless steel plates under biaxial loading S.T. Xiao and M.W. Brown	659
Effect of spectrum loading on fatigue crack growth in the threshold-regime S.E. Stanzl and E.K. Tscheegg	665
Effect of proportional overloading on the life of low cycle fatigue crack initiation of strain-concentrated member M.H. Lee, Z.J. Wang, A.H. Zhou and F.F. Wu	671
Fatigue damage accumulation in copper specimens under variable load conditions R. Pascual and E. Manríquez	677
Memory behaviour of stress amplitude responses and fatigue damage model of a hot-rolled low carbon steel X.D. Niu	685
Sensitivity study on a stochastic fatigue crack growth model under stationary random loading A. Tsurui, H. Ishikawa, A. Utsumi and H. Tanaka	691
The effect of stress ratio on the crack propagation life distribution under random loading H. Ishikawa, A. Tsurui, A. Utsumi and H. Tanaka	699

The effects of overloads and their interaction on a mild steel T.H. Topper, L. Wang and M.T. Yu	707
Fatigue strength of welded joints subjected to spectrum loading A.F. Blom	717
Strength of welded joint materials to static and low cycle loading under strain aging conditions M.A. Daunys and S.A. Dauniené	727
Fatigue properties of 316 LN austenitic steel at cryogenic temperatures C. Prioul, C.A.V. de A. Rodrigues and D. François	735
Study of rolling contact fatigue in 12Cr-Mo-V steel Y.S. Lu, S.P. Yang, M.K. Kang and Y.S. Wu	743
Effect of residual stress and overloading on initiation and fatigue crack propagation mechanisms B.V. Boytsov, G.N. Kravtchenko and J.V. Petukhov	749
Ion treatment to enhance fatigue resistance R. Krishnamurthy and H.V. Somasundar	757
Some mechanical properties relevant to non-linear elasticity materials E. Plenard and C. Fromont	765
Increasing fatigue strength and other properties of steels by means of ion implantation A.V. Fyodorov, E.V. Vasilyeva and S.M. Savicheva	773
Effect of previous cyclic loading on yield and tensile strengths of a mild steel T. Bui-Quoc, M. Elghorba and A. Biron	777
Behavior of pulse loaded plates at large deformations V.B. Yudaev, K.Z. Khayrnassov and V.M. Favorin	785
