

CONTENTS OF VOLUME 2

Contents of Volume 1	xv
<u>III. Environmental Effects on Fracture and Fatigue</u>	
The influence of corrosion fatigue and air fatigue cracks in a 13%Cr turbine blade steel J. Congleton and T.P. Wilks	795
Simultaneous evolution of microcracks and electrochemical reactions during corrosion fatigue T. Magnin	803
Environmental effects on high temperature fatigue crack growth behaviour of nickel base superalloys F. Gabrielli, G. Vimercati and V. Lupinc	811
The retardation of incipient stress corrosion crack growth in smooth specimens under low frequency cyclic loading J. Yu and R.N. Parkins	819
Effect of carbon segregation at grain boundary of intergranular stress corrosion cracking of carbon steel in "ethanolamine + CO ₂ " environment X.J. Wu, X.D. Chen, G.H. Li, H.F. Zhang and S.H. Tong	827
Stress corrosion cracking of Fe-Ni-Cr alloys in NaOH solutions at 350°C J. Le Coze, M. Bonningue, D. Hocquellet and J. Fraczkiewicz	833
The relation of cracking characteristics of 40CrNiMoA steel in water to its microstructure Z.R. Yang, P.Y. Xu and J. Huang	841
Stress corrosion in glass reinforced plastic and its relationship to loading mode L. Golaski and A. Figiel	847

Softening and hardening due to hydrogen in iron and iron based alloys J.J. Du, O. Mao and X. Wang	855
On the role of the process zone in hydrogen assisted cracking A. Neimitz and E.C. Aifantis	861
Relationship between hydrogen-induced underbead cracking and rolling direction sulphide Y. Tian, L.J. Zhuang and Z.C. Luo	871
Effects of microstructure on SCC behavior of low alloy ultra-high strength steels R.G. Wu and G.F. Li	877
Creep-rupture performance of superalloys in high-pressure hydrogen environment S. Bhattacharyya	883
Role of hydrogen in stress corrosion cracking of austenitic stainless steel in boiling 42% MgCl ₂ solution L.J. Qiao, W.Y. Chu and C.M. Hsiao	893
Effect of gaseous charging with hydrogen on the ductility of type 304L stainless steel D. Hardie and J.J.F. Butler	899
The effect of high-pressure charging with hydrogen on mechanical properties of an austenitic steel Y.Y. Li, L.M. Ma and G.J. Liang	907
<u>IV. High Temperature Deformation and Failure</u>	
Deformation and creep of textured HCP metals K. Linga Murty	915
A study of creep rupture in copper by the measurements of internal friction Q.P. Kong and Y. Dai	923
The role of hydrogen in creep of pure iron S.W. Nam and S.J. Kim	929
Micromechanics models for creep deformation of two-phase alloys M. Tanaka, T. Sakaki and H. Iizuka	935
A new asymptotic field parameter C_M^* used for describing creep crack growth rule H.F. Sun and Y. Liu	943
The consequences of ordering on negative creep and flow of nickel based alloys A. Marucco and B. Nath	949
The effect of small amounts of Mg and Zr on creep crack growth behavior of a Ni-base superalloy E.C. Guo and F.Q. Xu	957

Creep behavior of a rapidly solidified PM aluminum alloy M. Otsuka, Y. Abe and R. Horiuchi	963
Variable load creep behaviour at 550, 650, and 750°C of type 316 stainless steel having different grain size V. Lupinc, V. Pagani and F. Gabrielli	969
Creep crack growth in an iron-nickel base superalloy S.F. Wu and Q.P. Kong	977
The effects of temperature and creep damage on creep crack growth in HK40 steel S.J. Zhu, P.E. Li, Y.S. Yu, J.S. Zhang and Z.B. Cao	983
High temperature cyclic behaviour of superalloy MA 6000 A. Hynnä, V. -T. Kuokkala, T. Lepistö, T. Mäntylä and P. Kettunen	989
A physical model of cyclic creep deformation in terms of the effective stress S.W. Nam and W.L. Bradley	997
Effect of hold time in high temperature low cycle fatigue V.M. Radhakrishnan	1005
Influence of hold times on the high temperature fatigue crack propagation rate A. Plumtree and M-T. Yu	1013
Life prediction for low-cycle fatigue under creep-fatigue interaction K-T. Rie and R-M. Schmidt	1021
Exposure time considerations in high temperature low cycle fatigue S. Kalluri, S.S. Manson and G.R. Balford	1029
Notch effect on high temperature fatigue-creep properties of a carbide strengthened iron-base disc alloy X.S. Xie, X.Q. Sun, L. Gao, G.L. Chen, F.Y. Chang and Z.M. Yuan	1037
25 CDV 4.11 steel creep-fatigue damage at 500 and 550°C B. Abdouli, S. Bayard and E. Plenard	1043
Creep fatigue interaction under high frequency loading P.M. Lesne and G. Cailletaud	1053
Effect of high cyclic loading on low cycle fatigue crack propagation and its micromorphology for an Fe-Ni base alloy B.L. Tu, K.M. Niu, Z.A. Wang and M.G. Yan	1063
Estimation of creep damage in creep-fatigue condition H. Iizuka and M. Tanaka	1071
The influence of cyclic temperature oscillations on precipitation and hot ductility of a C-Mn-Nb-Al steel D.N. Crowther, J.M. Stewart and B. Mintz	1079

Investigation on the thermal shock behaviour of high temperature alloys H. Drzeniek and E. Lugscheider	1087
Specific strain work as a measure of material damage under creep and thermal cycling A. Krajczyk and R. Zuchowski	1095
Crack propagation of varying-temperature low-cycle fatigue simulating thermal fatigue R. Ohtani, T. Kitamura and N. Tada	1101
Detection of material degradation on CrMo steel during service operation by a chemical etching test F. Nogata, K. Seo, H. Takahashi, T. Shoji, Lu You Sho, K. Kawano, S.H. Chung and B.X. Yang	1109
Component thermal loads evaluation and life analysis for high temperature application P. Agatonovic and M. Dogigli	1115
A theory of creep analysis of plate bending structure and its application to the bulging in continuously cast slabs A. Yoshii and S. Kihara	1123
Steady state analysis of temperature and stress incorporating solidification during continuous casting process Z. Wang and T. Inoue	1131
Time-dependent fatigue crack propagation in Inconel 718 superalloys K.M. Chang	1139
An investigation on the strengthening of Inconel 718 superalloy by thermal mechanical treatments C.Q. Zhang, R.W Zhang and M.G. Yan	1149
High temperature creep damage under biaxial loading: Inco 718 and 316 (17-12 SPH) steels P. Delobelle, P. Trivaudey and C. Oytana	1157
Influence on microstructure on high temperature low cycle fatigue life in P/M René 95 Z.M. Fu, P. Au, D. Morphy, A.K. Koul and J.P. Immarigeon	1165
The effect of straining phase on biaxial fatigue life at 550°C in type 304 stainless steel K. Kuwabara, A. Nitta and T. Ogata	1173
Non proportional loading tests, tensile-torsion ratchetting, at elevated temperature, of a 17-12SPH austenitic stainless steel (316L) P. Delobelle, C. L'excellent and C. Oytana	1181
Effect of Nb, V, Ti and S additions on high temperature ductility behaviour of high purity iron G.A. Osinkolu, P. Yi and A. Kobylanski	1189

Slip deformation and fracture of a directionally solidified superalloy W.Q. Yin, W. Gao, G.Q. Zhu and Z.Q. Hu	1197
<u>V. Mechanical Properties and Engineering Applications of Composite and Non-Metallic Materials</u>	
Further damages of transverse cracks occurring in the cross-ply composite H. Ohira, T. Shono and N. Uda	1205
Micro-mechanical analysis of the knee-point on tension stress-strain curve of composites Y.P. Fei, Y.D. Xue and H.Y. Shen	1213
Influence of sequence of plies on the damage of cross-ply laminates Z.P. Lu, S.Z. Bai and C.Q. Chen	1219
Methods of prediction of polymer composite material performance under cold climate conditions V.N. Bulmanis, Yu. S. Urzhumtsev and I.N. Chersky	1225
The compression fatigue resistance of a carbon/epoxy composite plate containing a hole D. Lai and C. Bathais	1231
Creep behaviour of polymer-based materials S.N. Lu and C.C Xie	1239
Hysteretic heating of polyamides - an analytical approach B. Echaliier and P. Bluet	1245
Deformation of SiC/Al composites Y. Flom and R.J. Arsenault	1253
Ductility improvement in particle-reinforced aluminum composites: a ductile-fracture model based on void nucleation and growth I-H. Lin	1261
Pressure induced ageing of polymers I. Emri and W.G. Knauss	1265
Study on high temperature strength; K_{IC} and creep fracture of structural ceramics Z.D. Guan and W.J. Liu	1277
X-ray diffraction study on fracture surface of bluntly notched specimens of alumina ceramics T. Mishima, Y. Nanayama, Y. Hirose and K. Tanaka	1283
The elastic-plastic fracture toughness of doped zircon material at high temperature Y.L. Liu and R.Z. Wang	1291

Relationships between fracture toughness and microstructures of WC-Co cemented carbide alloys Y.X. Liu and S.H. Zhang	1297
Evaluating mechanical properties of Si_3N_4 with microstrength method Z.Z. Jin, Z.W. Liu and J.R. Ma	1305
Infrared thermographic detection of failure processes in concrete M.P. Luong	1311
The crack growth of electro-stress corrosion for beta- Al_2O_3 solid electrolyte Q.C. Zhang and S.Z. Lin	1321
Test of linear elastic fracture properties and fracture toughness of concrete D.Y. Xu, B.L. Feng and X.L. Fu	1329
Fracture toughness studies on oceanic engineering cement concrete Z.H. Luo, G.L. Li, Q.F. Tian, H.Y. Wu, X.T. Zeng, Q.F. Du, N.H. Hu, Y.X. Liang and T.S. Chen	1335
Fracture toughness analysis and estimation of surface energy of several glasses Y.M. Jiang, J.J. Cheng, W. Zhang and W.L. Xue	1341
Recovery of high temperature creep damage of polycrystalline Al_2O_3 S.K. Teh	1347

APPENDIX

The behaviour of short fatigue cracks and their initiation K.J.Miller	1357
Mechanisms and controlling factors in creep fracture W.D.Nix	1383
Crack tip shielding in fatigue R.O.Ritchie	1399
On the fracture phenomenon of modified and non-modified Al-Si alloys Nabil Fat-Halla	1419
An analysis of notch sensitivity of thermomechanically treated Al-Cu-Pb alloy V.Sijacki-Zeravcic, A.Sedmak, S.Sedmak and M.Radulovic	1427
Fabrication of very high fiber volume fraction composites K.H.G.Ashbee and L.R.Cornwell	1435
Author Index	1443
Subject Index	1447
