<i>Preface</i> . . . . .	v
--------------------------	---

<i>List of Contributors</i> . . . . .	x
---------------------------------------	---

### **Session I: Developments in NDE Methods for Components other than the Reactor Pressure Vessel**

1. MINAC: Portable, High Energy Radiographic Source; Experience and Applications . . . . .	3
M. LAPIDES	
2. Large-Scale Absolute Dent Evaluation Campaign . . . . .	13
S. ROTHSTEIN and S. W. GLASS	
3. Automatic Denting Analysis of Steam Generator Tubing . . . . .	23
CHRISTINE L. BRADSHAW	
4. Examination of Coiled Steam-Generator Tubes by the Multifrequency Eddy Current Method . . . . .	35
M. PIGEON and R. SAGLIO	
5. Ultrasonic Examination for Shrunk-On Disk of Turbine Rotor . . . . .	45
Y. ITABASHI, K. OHMATSU and M. GOTOH	

### **Session II: Developments in Signal Processing and Data Handling**

6. Results of a Physics Review of the Adaptive Learning Network Methodology . . . . .	63
M. BEHRAVESH and G. J. DAU	

7.	An Overall Review of Developments in RPV Ultrasonic Inspection Techniques, Signal Processing and Data Handling in the UK . . . . .	73
	P. J. HIGHMORE and W. E. GARDNER	
8.	Methods of Signal Processing for the Determination of the Dimensions of Objects Using Focusing Ultrasonic Probes . . . . .	99
	Y. SERRUYS, F. JOFFRE, L. PARADIS and R. SAGLIO	
 <b>Session III: Developments in NDE for RPV and Piping Applications</b>		
9.	Some Recent Application Developments in Ultrasonic Methods for Pressure Vessels . . . . .	115
	J. M. FARLEY and B. J. DIKSTRA	
10.	Effectiveness Demonstrations for Under Clad Crack Detection . . . . .	133
	F. L. BECKER	
11.	Results from a Trainable UT Instrument—ALN 4060 . . . . .	143
	M. BEHRAVESH	
12.	Automatic Data Acquisition and Analysis Hardware in USA . . . . .	153
	J. R. QUINN	
13.	MIR: An In-Service Inspection Device for Superphenix 1 Vessels . . . . .	179
	M. ASTY, R. SAGLIO, B. LERAT, M. ROULÉ and J. VIARD	
14.	Background to Recent US Pipe Inspection Work . . . . .	191
	G. J. DAU	
15.	Status of Intergranular Stress Corrosion Crack Depth Sizing . . . . .	195
	G. J. DAU and M. BEHRAVESH	
16.	Example of a Practical Demonstration of In-Plant Inspection Methodology (BWR Pipework): the Demonstration Process . . . . .	205
	M. BEHRAVESH and G. J. DAU	
17.	Further Analysis of Data Generated in the EPRI Round Robin on IGSCC Sizing . . . . .	213
	T. G. LAMBERT	
18.	Procedures for the Ultrasonic Examination of Austenitic and Austenitic/Ferritic Transition Welds . . . . .	221
	J. M. FARLEY and J. L. THOMSON	

**Session IV: Aspects of Designing Reliability Trials**

19. Statistical Design of NDE Qualification Tests . . . . .	245
J. R. QUINN	
20. The Manufacture of Test Specimens for Round-Robin Tests . . . . .	267
B. WATKINS	
21. Theoretical Work in Relation to Reliability: Time-of-Flight Diffraction . . . . .	279
J. A. G. TEMPLE	
22. The UKAEA Defect Detection Trials. . . . .	305
B. WATKINS and R. A. MURGATROYD	
23. NDE Reliability Assessment . . . . .	323
S. R. DOCTOR	
24. Reliability Assessment Activities for Non-Destructive Examination and Structural Integrity for Reactor Components in Japan. . . . .	337
Y. ANDO	

**Session V: Other Matters**

25. Acoustic Emission Monitoring of a Nuclear Reactor End Shield for Leak Detection . . . . .	357
C. R. L. MURTHY, A. K. RAO, V. K. SETH and A. KRISHNAN	
26. Status of Continuous UT Monitoring . . . . .	369
M. FLEMING and J. HUMPHRIES	
27. The Sizewell B Inquiry: Non-Destructive Examination Aspects . . . . .	381
B. EDMONDSON	
28. The NDE Validation and Demonstration Testing Process . . . . .	389
R. M. STONE	

**Session VI: Panel Discussion**

NDE's Role in Structural Integrity. . . . .	397
---	-----

<i>Index</i> . . . . .	427
------------------------	-----
