

Table of Contents

Author's Preface	9
Chapter 1 Introduction	
1.1 Historical introduction	11
1.2 Design	12
1.3 Computer aided design	15
Chapter 2 The Digital Computer as a Design Aid	
2.1 The computer	21
2.2 Using the computer as a designer's aid	23
2.2.1 Using the computer as a calculator	24
2.2.2 The computer as a data bank	25
2.2.3 Using the computer as a draughting aid	25
2.3 Existing CAD techniques	25
2.3.1 Processing techniques	25
2.3.2 Graphical input and output devices	27
Chapter 3 Interactive CAD Systems	
3.1 A refreshed graphic display system	39
3.2 An interactive CAD system based on a storage tube display and digitiser	42
Chapter 4 A Computer-Aided Design System: The Software	
4.1 The requirements for a general CAD system	50
4.2 The general CAD system (GCADS)	51
4.2.1 Graphic functions	51
4.2.2 Utility functions	51

4.2.3	Filing facilities	52
4.2.4	Editors	52
4.3	Software design and organisation	52
4.3.1	Organisation of program and data	52
4.3.2	System modules	57
4.4	Data storage	68
4.5	Communication with application oriented systems.	74

Chapter 5 Operation of the GCADS Draughting System

5.1	Setting up the system.	77
5.2	Graphic input	78
5.3	Use of the menu system and cursor.	80
5.3.1	Data input – buttons 1,2	80
5.3.2	Windowing – button 4	81
5.3.3	Angular control – button 6.	81
5.3.4	Finding – button 7	82
5.3.5	Drive mode – button 8.	82
5.3.6	Floating assignment – button 5	82
5.4	Levels	82
5.5	Filing and display	83
5.6	Macros	85
5.7	Editors	86
5.7.1	Point editor	86
5.7.2	Line editor.	87
5.7.3	Symbol and macro editor	87
5.7.4	Level editor	87
5.8	Miscellaneous facilities	88
5.8.1	Continuous mode	88
5.8.2	Plotting	88
5.8.3	Debug	88
5.8.4	Curve fit	88
5.9	Three-dimensional display facilities.	89
5.9.1	Viewing the workspace.	89
5.9.2	Perspective and isometric viewing	89
5.9.3	Joystick.	90
5.10	The user area of the menu.	90

Chapter 6 Using the Draughting System

6.1	Construction of macros	91
6.2	Construction of layouts	93
6.3	Annotating the drawing	98

6.4	Plotting the drawing	99
6.5	Material take-off	99
Chapter 7 Transformation Systems		
7.1	Display	101
7.2	Windowing and clipping	102
7.3	2-D transformations	104
7.4	Three-dimensional transformations	107
7.5	Linear transformations	108
7.6	Display files for three-dimensional data	111
7.7	Visualisation of three-dimensional data	112
7.8	Eye co-ordinates system	115
7.9	Joystick function	121
7.9.1	Distortion	123
Chapter 8 Application of CAD Techniques to Finite Element Data Preparation		
8.1	Automatic mesh generation	131
8.2	The finite element method	132
8.3	A general finite element mesh generating system GFEMGS	133
8.4	An application of GFEMGS.	136
8.5	Results presentation.	140
Chapter 9 The Application of Interactive CAD Techniques to Machining Processes		
9.1	Introduction.	149
9.2	The CAD/CAM system	152
9.3	System software	153
9.3.1	CAD software.	153
9.3.2	CAM software.	157
9.4	The future of CAD/CAM	159
Chapter 10 The Implications in Industry		
10.1	The savings in costs	163
10.2	Integration	163
10.3	Future technical advances	164
10.4	The Trade Union view	165
10.5	The Employer's view	166
	Index	169
