

Contents

Preface	vii
Nomenclature	xi
<i>Chapter 1. THE FLUIDIZED STATE</i>	<i>1</i>
I. Introduction	1
II. The Phenomenon of Fluidization	2
III. General Terminology	4
IV. Advantages and Limitations of the Technique of Fluidization	7
References	9
<i>Chapter 2. GAS-FLUIDIZED BED BEHAVIOUR</i>	<i>11</i>
I. Introduction	11
II. General Behaviour of Bubbling Beds and its Fundamental Description	16
III. Bubble Behaviour	20
IV. Bubble Induced Particle Circulation	44
V. Bed Pressure Drop	65
VI. Minimum Fluidizing Velocity	68
VII. Bed Expansion	76
VIII. Distributor Design	80
References	92
<i>Chapter 3. SOLIDS TRANSPORT</i>	<i>101</i>
I. The Flow of Fluidized Solids	101
II. Solids Transfer	130
III. Particle Entrainment and Elutriation	134
References	140
<i>Chapter 4. HEAT TRANSFER MECHANISMS</i>	<i>145</i>
I. Introduction	145
II. Gas/Solid Heat Transfer	147

III. Bed/Surface Heat Transfer	155
IV. Situations Involving Radiant Heat Transfer	215
V. Heat Transfer to Liquid-Fluidized Systems	223
References	224

Chapter 5. HEAT TRANSFER TO IMMERSSED SURFACES IN FLUIDIZED AND

PACKED FLUIDIZED BEDS	229
I. Introduction	229
II. Bed/Wall Heat Transfer	240
III. Heat Transfer to Immersed Surfaces	245
IV. Mechanically Stirred Systems	263
V. Constrained Flow of Solids past the Heat Transfer Surface	266
VI. Packed Fluidized Bed Heat Transfer	271
VII. Heat Transfer in Flowing Gas/Solid Suspensions	273
References	274
Author Index	279
Subject Index	291
