

CONTENTS

<i>Preface</i>	v
<i>Nomenclature</i>	xi
Chapter 1. Introduction	1
1-1. Dimensions and units	1
1-2. The different modes of heat transfer	7
1-3. Thermal conductivity, film, and over-all heat-transfer coefficients	8
1-4. Parallel flow, counterflow, crossflow	13
PART A HEAT CONDUCTION	
Chapter 2. Theory of Heat Conduction and the Heat-conduction Equation	25
2-1. Concept of heat conduction	25
2-2. The fundamental law of heat conduction	27
2-3. The heat-conduction equation	30
Heat-conduction equation for isotropic materials	30
Heat-conduction equation for nonisotropic materials	32
Chapter 3. Steady Heat Conduction	36
3-1. Simple conduction equation solutions for steady conditions	36
3-2. Heat convection from bounding surfaces	38
3-3. Critical thickness of insulation	39
3-4. The thin rod	39
3-5. Finned heating surfaces	43
3-6. The wall with heat sources	58
3-7. The buried cable	60
3-8. Two-dimensional steady heat conduction	64
Chapter 4. Unsteady Heat Conduction	76
4-1. Transient heat conduction	76
4-2. Periodic heat conduction	97
Chapter 5. Heat Conduction with Moving Boundaries	110
5-1. Heat conduction in melting or solidification	110
5-2. Moving heat sources	113
PART B HEAT TRANSFER BY CONVECTION	
The various types of heat transfer	121
Chapter 6. Flow along Surfaces and in Channels	124
6-1. Boundary layer and turbulence	124
6-2. The momentum equation of the boundary layer	131

6-3. The laminar-flow boundary-layer equation	134
6-4. The plane plate in longitudinal flow	138
6-5. Pressure gradients along a surface	148
6-6. Exact solutions of the laminar boundary-layer equations for a flat plate	150
6-7. The flow in a tube	153
6-8. The cylinder in crossflow	160
6-9. Flow around rotationally symmetric objects	163
Chapter 7. Forced Convection in Laminar Flow	167
7-1. The heat-flow equation of the boundary layer	167
7-2. Laminar boundary-layer energy equation	169
7-3. The plane plate in longitudinal flow	173
7-4. The plane plate with arbitrarily varying wall temperature	178
7-5. Cylindrical bodies in flow normal to their axes	184
7-6. Exact solutions of the laminar-boundary-layer energy equation	187
7-7. Flow through a tube	190
Chapter 8. Forced Convection in Turbulent Flow	201
8-1. Analogy between momentum and heat transfer	201
8-2. Flow in a tube	206
8-3. The plane plate in longitudinal flow	215
8-4. Recent developments in the theory of turbulent heat transfer	218
Chapter 9. Forced Convection in Separated Flow	229
9-1. Dimensional analysis of heat transfer	229
9-2. Tubes and tube bundles in crossflow	239
9-3. Spheres and packed beds	248
Chapter 10. Special Heat-transfer Processes	255
10-1. Heat transfer at high velocities	255
10-2. Heat transfer in gases at high velocities	261
10-3. Heat transfer in rarefied gases	272
10-4. Heat transfer in liquid metals	298
10-5. Transpiration and film cooling	301
Chapter 11. Free Convection	311
11-1. Laminar heat transfer on a vertical plate and horizontal tube	312
11-2. Turbulent heat transfer on a vertical plate	322
11-3. Derivation of the boundary-layer equations	326
11-4. Free convection in a fluid enclosed between two plane walls	328
11-5. Mixed free and forced convection	331
Chapter 12. Condensation and Evaporation	334
12-1. Condensation	334
12-2. Evaporation	340
PART C THERMAL RADIATION	
Basic concepts	353
Chapter 13. Thermal Radiation Properties	355
13-1. The black body	360

13-2. Solids and liquid bodies	371
13-3. Gases	381
Chapter 14. Heat Exchange by Radiation	395
14-1. Black bodies	395
14-2. Solid, liquid, and gaseous bodies	403
14-3. Radiative heat exchange inside an enclosure	407
14-4. Radiation of flames	419
14-5. The heat-transfer coefficient for radiation	422
14-6. Radiation error in temperature measurements	426
14-7. Pyrometry	429
14-8. Solar radiation	432
PART D THE TRANSFER OF MASS	
Chapter 15. Relations for Two-component Mixtures	440
15-1. Basic equations for two-component gas mixtures	440
15-2. Basic equations and s - i diagram for humid air	441
Chapter 16. Mass Transfer	449
16-1. Diffusion	449
16-2. Laminar boundary layer on a flat plate with mass and heat transfer	456
16-3. The integrated boundary-layer equations of mass transfer	463
16-4. Similarity relations for mass transfer	469
16-5. The evaporation of water into air	476
PART E HEAT EXCHANGERS	
Chapter 17. Heat-Exchanger Calculations	480
17-1. The transfer-type heat exchanger	480
17-2. The storage-type heat exchanger	482
Appendix of Property Values	493
<i>Name Index</i>	523
<i>Subject Index</i>	527
