

# CONTENTS

**Preface 9**

**Chapter 1**

**Introduction and Survey 13**

Why This Book Might Interest You 13

In Pursuit of a Unified Picture of the Universe 15

Dissection or Construction 16

Do Biological Structures Contradict Fundamental Natural  
Laws? 18

**Chapter 2**

**Is Disorder Progressive? The Thermal Death of the World 25**

The One-Way Street of Nature 25

What Is Disorder? 26

Energy—Progressively Devalued 30

**Chapter 3**

**Crystals—Orderly but Inanimate Structures 33**

Superconductivity and Magnetism. Order in the Microworld  
Produces Strength in the Macroworld 35

Phase Transitions: From Disorder to Order—or the Other Way  
Around 39

**Patterns of Liquids, Aspects of Clouds, and Geological Formations 43**

Scale of Motion Patterns 55

**Chapter 5**

**Let There Be Light—Laser Light 61**

There Are Different Kinds of Light 61

Self-organization in the Laser 65

The Laser—an Open System with a Phase Transition 68

**Chapter 6**

**Chemical Patterns 73**

Arranged Marriages, Chemical Style 73

Chemical Clocks 74

Chemical Waves and Spirals 76

A New Shared Principle 77

**Chapter 7**

**Biological Evolution. The Fittest Survives 81**

Competition among the Biomolecules 84

**Chapter 8**

**To Survive without Being the Fittest: Specialize, and Create Your Own Ecological Niche 87**

**Chapter 9**

**How Do Biological Organisms Originate? Heredity through Molecules 95**

Model Examples of Biological Formation 99

Macropatterns on a Molecular Basis 103

**Chapter 10**

**Conflicts Are Sometimes Inevitable 109**

Test Your Own State of Mind 111

Life Is Full of Conflicts 113

Conflict Displacement in the Social Field 115

**Chapter 11**

**Chaos, Coincidence, and the Mechanistic World Picture 119**

Predestination or Accident? 119

Predestination and Accident! 120

Fruit-Sorting Machines: Planned Chaos	123
The North Was Not Always North	124
Chaos in Synergetics: A Contradiction in Terms?	125
Is the Weather Predictable, or Does the Weatherman Always Leave Himself a Loophole?	127
Can Plasmas Be Tamed? Chaos in Nuclear Fusion as Well?	128

## Chapter 12

### **Synergetic Effects in the Economy** 133

Two Ice-Cream Vendors on the Beach Want to Do Business. But How?	135
Why Do Cities Grow and Grow?	136
Business Management: Do What Your Rivals Do?	138
Economic Boom and Slump—the Two Sides of the Coin	140
Are Technological Innovations Always the Driving Force of the Economy?	140
Abrupt, Collective Changes in Economic Life	147
Economics Is Not as Simple as Adam Smith Thought	149
State Control: Curse or Blessing?	150
Economic Chaos Through Ill-Considered Controls	152
Does Peace Become More Secure through Closer Economic Ties?	152
Synergetic Laws Benefit Mankind	153

## Chapter 13

### **Are Revolutions Predictable?** 155

Public Opinion as Order Parameter	155
Can People Be Influenced?	159
Change of Opinion: How and by What Means?	162
The Mass Media: Order Parameter under Selective Pressure	163
The Simplification of the World	166
Television—Its Enormous Power of Influence	168
Government and Public Opinion	169
Dictatorships	171
Public Opinion and Minorities	173
Revolutions	173
Can General Principles of Action Be Stated?	177
Some Reflections on Bureaucracy	178

**Do Hallucinations Prove Theories of Brain Function? 181**

Does the “Grandmother Cell” Exist? 182

Excitation Patterns in the Brain—Hypotheses and  
Experiments 187

Thinking in Blocks 189

Body and Mind 191

Does the Brain Grow According to a Plan? 192

**Chapter 15**

**The Emancipation of the Computer: Hope or Nightmare? 195**

The *Wunderkind* of the Twentieth Century 195

Programming 197

Computer Networks 199

Pattern Recognition 201

Perception 205

The Underworld of the Computer 208

Logical Processes—Independent of the Substance 214

Can Computers Be Capricious? 217

Do Not Abandon Thinking 219

**Chapter 16**

**The Dynamics of Scientific Perception; or, The Rivalry among  
Scientists 221**

Competition among Scientific Journals 230

Synergetics about Synergetics 231

**Chapter 17**

**Summing Up 235**

A New Principle 235

Bridges from Inanimate to Animate Nature 237

Life between Fire and Ice 238

One More Characteristic of Life? 239

Limits of Perception 239

**References and Notes 242**

**Index 249**
