

CONTENTS

PREFACE	<i>xiii</i>
ACKNOWLEDGMENT	<i>xv</i>
1 STRESS AND STRAIN: A REVIEW OF FUNDAMENTAL CONCEPTS	1
1-1 INTRODUCTION, 1	
1-2 SIMPLE STRESS, 4	
1-3 AXIAL, SHEAR, AND BEARING STRESSES: DIRECT STRESSES, 7	
1-4 COMPONENTS OF STRESS, 12	
1-5 TWO DIMENSIONAL ORTHOGONAL FORCE SYSTEMS: GENERALIZED PLANE STRESS, 15	
1-6 TORSIONAL STRESS AND STRAIN, 27	
1-7 AXIAL STRESS AND STRAIN, 32	
1-8 THERMAL STRESS AND STRAIN, 39	
1-9 NORMAL AND SHEAR STRESSES IN SIMPLE BEAMS, 43	
1-10 STRESSES IN CURVED BEAMS SUBJECTED TO PURE MOMENTS, 50	
1-11 COMBINED LOADING, 54	

1-12	<i>STRESS CONCENTRATION, 64</i>	
1-13	<i>ENDURANCE LIMIT, FATIGUE STRENGTH, AND FACTOR OF SAFETY, 82</i>	
	<i>Questions and Problems, 85</i>	
	<i>Suggested Design Projects, 104</i>	
2	<i>BEAMS AND COLUMNS: ELASTIC DEFLECTION AND BUCKLING</i>	108
2-1	<i>INTRODUCTION, 108</i>	
2-2	<i>BEAM DEFLECTIONS: THE MOMENT-AREA METHOD, 110</i>	
2-3	<i>BEAM DEFLECTIONS: THE SUPERPOSITION METHOD, 120</i>	
2-4	<i>DEFLECTION OF CURVED-END CANTILEVERS, 126</i>	
2-5	<i>DEFLECTION OF STEPPED SHAFTS, 132</i>	
2-6	<i>BEAMS AS SPRINGS, 134</i>	
2-7	<i>BUCKLING OF COLUMNS, 137</i>	
2-8	<i>DESIGN OF LONG COLUMNS LOADED BETWEEN SUPPORTS, 143</i>	
2-9	<i>ECCENTRICALLY LOADED COLUMNS: CONSERVATIVE APPROACH, 145</i>	
	<i>Questions and Problems, 149</i>	
	<i>Suggested Design Projects, 159</i>	
3	<i>CAMS AND ECCENTRICS</i>	161
3-1	<i>INTRODUCTION, 161</i>	
3-2	<i>CAM SYSTEMS, 163</i>	
3-3	<i>TERMINOLOGY, 167</i>	
3-4	<i>TYPES OF FOLLOWER MOTION, 167</i>	
3-5	<i>CHARACTERISTICS OF FOLLOWER MOTION, 172</i>	
3-6	<i>GRAPHICAL LAYOUT OF CAMS, 172</i>	
3-7	<i>CAM TABLES, 174</i>	
3-8	<i>ROLLER, OFFSET, FLAT, AND OSCILLATING FOLLOWERS; GRAPHICAL LAYOUTS, 179</i>	
3-9	<i>ECCENTRICS, 185</i>	
3-10	<i>JAMMING EFFECTS; PRESSURE ANGLE LIMITATIONS, 185</i>	
3-11	<i>GENEVA MOVEMENTS, 185</i>	
	<i>Questions and Problems, 191</i>	

4	SPRINGS	197
4-1	INTRODUCTION, 197	
4-2	HOOKE'S IDEALIZED HELICAL SPRING, 198	
4-3	SERIES, PARALLEL, AND MIXED SYSTEMS, 200	
4-4	HELICAL COMPRESSION AND EXTENSION SPRINGS, 205	
4-5	HELICAL COMPRESSION SPRINGS: STRESS CONCENTRATION FACTORS AND DESIGN CONSIDERATIONS, 208	
4-6	HELICAL TORSION SPRINGS, 210	
4-7	LEAF SPRINGS, 214	
4-8	CONSTANT-FORCE EXTENSION SPRINGS, 216	
4-9	CONSTANT-FORCE SPRINGS—MOUNTING DESIGN, 223	
4-10	DYNAMIC LOADING, 226	
4-11	VIBRATION ISOLATION, 228	
4-12	PHYSICAL AND MECHANICAL PROPERTIES OF SPRING MATERIALS, 231 <i>Questions and Problems, 239</i> <i>Suggested Design Projects, 245</i>	
5	FASTENING, JOINING, AND SEALING	247
5-1	INTRODUCTION, 247	
5-2	NOMENCLATURE OF BOLTS, NUTS, AND SCREWS, 248	
5-3	THREAD FORMS AND FITS, 250	
5-4	BOLT AND SCREW DETAILS, 250	
5-5	BOLT STRESSES, 250	
5-6	JOINT DESIGN—GENERAL CONSIDERATIONS, 265	
5-7	ECCENTRIC LOADING, 266	
5-8	RIVETED CONNECTIONS, 268	
5-9	MULTIPLE CONNECTORS, 269	
5-10	WELDED CONNECTIONS, 273	
5-11	SEALS, 277	
5-12	STATIC SEALING, 279	
5-13	DYNAMIC SEALS, 281	
5-14	O-RINGS, 281	
5-15	DESIGN OF O-RING GLANDS, 284	
5-16	EXCLUSION SEALS, 286	
5-17	LABYRINTH SEALS, 287	

- 5-18 *MECHANICAL END-FACE SEALS, 288*
- 5-19 *OTHER SEALS AND APPLICATIONS, 289*
Questions and Problems, 290
Suggested Design Projects, 296

6 BELT AND CHAIN DRIVES 299

- 6-1 *INTRODUCTION, 299*
- 6-2 *FLAT BELTS—BASIC RELATIONSHIP, 301*
- 6-3 *CONTACT ANGLES—ANGLE OF WRAP, 306*
- 6-4 *CALCULATION OF CONTACT ANGLE AND BELT LENGTH, 308*
- 6-5 *FLOATING IDLERS AND PRESSURES, 310*
- 6-6 *FLAT BELT SERVICE FACTORS AND DESIGN HORSEPOWER, 312*
- 6-7 *DRIVE CONFIGURATIONS, 312*
- 6-8 *BELT DESIGNATIONS, 316*
- 6-9 *PULLEY CONSIDERATIONS, 317*
- 6-10 *V-BELT DRIVES, 318*
- 6-11 *BELT STANDARDS, 319*
- 6-12 *BELT TENSIONING, 332*
- 6-13 *CHAIN DRIVES, 334*
- 6-14 *SPROCKET NOMENCLATURE, 334*
- 6-15 *STANDARD ROLLER CHAINS, 337*
- 6-16 *DESIGN PRACTICE, 337*
Questions and Problems, 349
Suggested Design Projects, 357

7 GEARS 361

- 7-1 *INTRODUCTION, 361*
- 7-2 *INVOLUTE GEOMETRY, 363*
- 7-3 *FORCES IN GEARS, 371*
- 7-4 *THE STRENGTH OF GEAR TEETH, 374*
- 7-5 *HELICAL GEARS, 379*
- 7-6 *BEVEL GEARS, 382*
- 7-7 *THE SPIROID GEAR, 384*
- 7-8 *WORM DRIVES, 384*
- 7-9 *GEAR LUBRICATION, 388*
- 7-10 *GEAR TRAINS, 389*
- 7-11 *THE PLANETARY OR EPICYCLIC GEAR TRAIN, 393*

Questions and Problems, 395
Suggested Design Project, 400

8	SHAFTS, COUPLINGS, AND CLUTCHES	402
8-1	SHAFTS, 402	
8-2	BEARING LOADS, 403	
8-3	STRESSES IN SHAFTS, 405	
8-4	CRITICAL SPEEDS OF SHAFTS, 407	
8-5	FASTENERS FOR TORQUE TRANSMISSION, 408	
8-6	FASTENERS WITH LOW TORQUE CAPACITY, 409	
8-7	KEYS AND KEYWAYS, 411	
8-8	SPLIT TAPER BUSHINGS, 413	
8-9	SPLINES, 413	
8-10	SHAFT COUPLINGS, 414	
8-11	FLANGED COUPLINGS, 415	
8-12	FLEXIBLE COUPLINGS, 416	
8-13	UNIVERSAL JOINTS, 418	
8-14	CLUTCHES, 418	
8-15	POSITIVE ENGAGEMENT CLUTCHES, 419	
8-16	FRICTION CLUTCHES, 419	
8-17	CENTRIFUGAL CLUTCHES, 422	
8-18	ELECTRIC CLUTCHES, 423	
8-19	THE HYDRAULIC COUPLING, 425	
8-20	SELECTION OF CLUTCHES, 426	
8-21	HEAT GENERATION IN BRAKES AND CLUTCHES, 428	
8-22	THE SHOE BRAKE, 430	
8-23	THE BAND BRAKE, 433	
8-24	THE DISK BRAKE, 434	
	<i>Questions and Problems, 434</i>	
9	BEARINGS	441
9-1	INTRODUCTION, 441	
9-2	DECIDING ON THE TYPE OF BEARING, 443	
9-3	FRICTION IN BEARINGS, 443	
9-4	LUBRICATION, 444	
9-5	SLEEVE BEARING CHARACTERISTICS, 445	
9-6	OPERATING CONDITIONS FOR SLEEVE BEARINGS, 446	
9-7	BEARING MATERIALS, 448	
9-8	BALL AND ROLLER BEARINGS, 449	

9-9	<i>LUBRICATION FOR ANTIFRICTION BEARINGS, 451</i>	
9-10	<i>BEARING SEALS AND SHIELDS, 452</i>	
9-11	<i>TYPES OF ANTIFRICTION BEARINGS, 453</i>	
9-12	<i>MOUNTING ARRANGEMENTS, 456</i>	
9-13	<i>BEARING CAPACITY, 460</i>	
9-14	<i>BEARING CLEARANCE AND PRELOADING, 463</i>	
9-15	<i>HANDLING OF ANTIFRICTION BEARINGS, 464</i> <i>Questions and Problems, 465</i> <i>Suggested Design Project, 467</i>	
10	<i>MACHINERY ALLOYS AND THEIR PERFORMANCE</i>	469
10-1	<i>MACHINE DESIGN AND THE DESIGNER, 469</i>	
10-2	<i>DEVELOPING THE DESIGN, 470</i>	
10-3	<i>AIR CYLINDER AND PISTON, 471</i>	
10-4	<i>DESIGN OF THE PERFORATOR, 472</i>	
10-5	<i>JOINING PIN AND PISTON, 473</i>	
10-6	<i>DESIGN DECISIONS, 474</i>	
10-7	<i>PLAIN CARBON STEELS, 474</i>	
10-8	<i>THE AISI—SAE MACHINERY STEELS, 476</i>	
10-9	<i>STAINLESS MACHINERY STEELS, 477</i>	
10-10	<i>EFFECT OF ALLOY ADDITIONS TO STEEL, 478</i>	
10-11	<i>ALUMINUM ALLOYS, 478</i>	
10-12	<i>BRASSES AND BRONZES, 479</i>	
10-13	<i>THE PLASTICS, 480</i>	
10-14	<i>FATIGUE FAILURES, 483</i>	
10-15	<i>WEAR, 485</i> <i>Questions and Problems, 487</i> <i>Suggested Design Project, 488</i>	
<i>Appendices</i>		
1	<i>THE SI SYSTEM</i>	490
2	<i>PROPERTIES OF PURE METALS AND ALLOYS</i>	495
3	<i>ANSWERS TO SELECTED QUESTIONS AND PROBLEMS</i>	497
	<i>INDEX</i>	506
