

CONTENTS

Preface vii

CHAPTER 1 / Introduction 1

CHAPTER 2 / Some Aspects of Probability Theory 6

- 2.1 Sample Space, Events, and Sigma Algebra 6
- 2.2 Axioms and Some Theorems of Probability Theory 7
- 2.3 Statistical Regularity 10
- 2.4 Random Variables 11
- 2.5 Probability Function, Probability Distribution Function, and Probability Density Function 12
- 2.6 The Probability Density Representation Extended 15
- 2.7 Jointly Distributed Random Variables 16
- 2.8 Conditional Distribution 18
- 2.9 Functions of Random Variables 20
- 2.10 Expected Values 23
- 2.11 Moments 24
- 2.12 Characteristic Functions 26
- 2.13 Conditional Expectations 30
- Exercises* 31

CHAPTER 3 / Random Processes 34

- 3.1 Definition 34
- 3.2 Specification of Random Processes 34
- 3.3 Homogeneous Random Processes 40
- 3.4 Properties of Correlation Functions 41
- 3.5 Modes of Convergence 44
- 3.6 Differentiation of a Random Process 48
- 3.7 Integration of a Random Process 52
- 3.8 Spectral Decomposition of a Random Process 54
- 3.9 Periodic Random Processes 60
- 3.10 Ergodic Theorem 62
- Exercises* 65

CHAPTER 4 / Gaussian, Poisson, and Markov Random Processes 67

- 4.4 Gaussian Distribution and Central Limit Theorem 67
- 4.2 Properties of Gaussian Random Variables 71
- 4.3 Jointly Distributed Gaussian Random Variables 73
- 4.4 Gaussian Random Processes 82
- 4.5 Poisson Processes 84
- 4.6 Random Pulses 87
- 4.7 Shot Noise and White Noise 94
- 4.8 Markov Random Processes 95
- 4.9 The Chapman-Kolmogorov-Smoluchowski Equation 96
- 4.10 Fokker-Planck Equation 99
- 4.11 Markov Processes in the Wide Sense 104
- Exercises* 108

CHAPTER 5 / Linear Structures with Single Degree of Freedom 110

- 5.1 A Review of the Deterministic Theory 110

| | | |
|------------|--|-----|
| 5.2 | System Response to Random Excitations | 115 |
| 5.3 | Weakly Stationary Excitations | 117 |
| 5.4 | Nonstationary Excitations | 129 |
| 5.5 | Joint Behavior of the Response and the Time Derivative of the Response | 142 |
| 5.6 | The Response and Its Time Derivatives Treated as Components of a Markov Vector | 143 |
| 5.7 | Direct Determination of the Conditional Means and Covariances | 150 |
| | <i>Exercises</i> | 153 |

CHAPTER 6 / Linear Structures with Finitely Many Degrees of Freedom 155

| | | |
|------------|---|-----|
| 6.1 | A General Analytical Framework | 155 |
| 6.2 | The Stiffness-coefficient Representation | 159 |
| 6.3 | The Holzer-Myklestad Representation | 169 |
| 6.4 | Response of a Flexible Airplane to Atmospheric Turbulence | 180 |
| 6.5 | Structures Constructed from Identical Interior Components | 192 |
| 6.6 | The Markov-vector Approach | 198 |
| | <i>Exercises</i> | 201 |

CHAPTER 7 / Linear Continuous Structures 203

| | | |
|------------|---|-----|
| 7.1 | A General Analytical Framework | 203 |
| 7.2 | The Normal-mode Approach | 207 |
| 7.3 | Panel Vibrations Induced by Boundary-layer Turbulence | 218 |
| 7.4 | Method of Transfer Matrices | 228 |
| 7.5 | Multispanned Panel System | 237 |
| 7.6 | The Method of Difference Equations | 248 |
| | <i>Exercises</i> | 251 |

CHAPTER 8 / Nonlinear Structures 253

| | | |
|------------|--|-----|
| 8.1 | Varieties of Nonlinear Problems | 253 |
| 8.2 | The Markov-vector Approach—Single Degree of Freedom | 262 |
| 8.3 | The Markov-vector Approach—Multiple Degrees of Freedom | 268 |
| 8.4 | The Perturbation Method | 272 |
| 8.5 | Method of Equivalent Linearization | 283 |
| 8.6 | Nonlinear Stresses | 289 |
| | <i>Exercises</i> | 291 |

CHAPTER 9 / Structural Failures Resulting from Dynamic Response and Related Topics 293

| | | |
|------------|-----------------------------|-----|
| 9.1 | Types of Structural Failure | 293 |
| 9.2 | Threshold Crossings | 293 |
| 9.3 | Peak Distribution | 299 |
| 9.4 | Envelope Distribution | 309 |
| 9.5 | First-exursion Failures | 319 |
| 9.6 | Fatigue Failures | 332 |
| | <i>Exercises</i> | 337 |

APPENDIX I / Some Well-known Probability Functions for Discrete Random Variables 339

xi / Contents

APPENDIX II / *Some Well-known Probability Density Functions
for Continuous Random Variables* 340

APPENDIX III / *Corresponding Autocorrelation Functions
and Spectral Densities of Some Weakly Stationary Random Processes* 341

APPENDIX IV / *Basic Set Operations* 342

APPENDIX V / *Dirac Delta Function* 346

Bibliography 349
