

CONTENTS

Conduction and Natural Convection Heat Transfer in a Phase Change Region <i>Alan S. Kushner and William H. Walston, Jr.</i>	1
Finite Element Simulation of Two-Phase Flows in Porous Media <i>P. S. Huyakorn, G. F. Pinder, C. R. Faust, and J. W. Mercer.</i>	19
Calculation of Three-Dimensional Fluid Flow with Multiple Free Surfaces <i>M. J. Vander Vorst and R. K.-C. Chan.</i>	45
Prediction of Atmospheric Flows on Nested Grids <i>Russell L. Elsberry.</i>	67
Mathematical Modeling of Ablation Problems <i>B. Laub, K. E. Suchsland, and A. L. Murray.</i>	87
A Numerical Treatment of Sliding Interfaces and Impact <i>J. O. Hallquist.</i>	117
A Class of Signorini's Problems by Reciprocal Variational Inequalities <i>Noboru Kikuchi.</i>	135
Calculation of Mechanical Interactions Affecting Length and Diameter Changes in Nuclear Reactor Fuel Rods <i>John B. Newman.</i>	155
An Improved Numerical Method and Computer Program for Counterformal Contact Stress Problems <i>B. Paul and J. Hashemi.</i>	165
List of Related Titles	181
