Preface ix

OPTICAL METHODS

Laser Beam Techniques for Measuring Two-Phase Boundary Motion in Boiling

S. Toda 3

Optical Sizing, with Emphasis on Simultaneous Measurements of Velocities and Sizes of Particles Embedded in Flows

G. Gouesbet 27

On the Application of Combined Optical and Electrical Measurement Techniques for the Investigation of Physical Phenomena

P. Sattler, E. Aust, and J. Vollbrandt 51

The Use of Flow Visualization and Thermometric Probes for Studies of Turbulent Transfer in a Viscous Sublayer

E. M. Khabakhpasheva, B. V. Perepelitsa, Yu M. Pshenichnikov, and E. S. Mikhailova 63

Some Recent Applications of Laser Tomography in Combustion

L. Boyer, G. Searby, and J. Quinard 73

The Use of the Modified Shadow Method for the Study of Stationary Thermal Processes

O. G. Martynenko and N. I. Lemesh 83

Visualization of Natural Convection Flow Using Aluminum Particles

D. Saha, P. K. Vijayan, and V. Venkat Raj 91

Natural Convection in Solar Houses: A Study by Holographic Interferometry

Ch. Durou and A. Cordier 103

Time-resolved Concentration Measurements Using Rayleigh Scattering Correlation Technique

J. Haumann and A. Leipertz 111

Optical Diagnostics of Two-Phase Flows with Liquid Jets

I. T. Aladyev, V. I. Kabakov, and E. P. Zimin 123

The Calculation of IR Radiation Transfer in Combustion Gases Containing CO₂ and CO for Temperature and Concentration Measurements

S. I. Kryuchkov, N. N. Kudryavtsev, S. S. Novikov, and R. I. Soloukhin 139

The Determination of Convective Heat Transfer by the Measurement of Mass Transfer Using a New Optical Technique

D. B. Utton and M. A. Sheppard 155

Experience with Infrared Measurements in Mixed Air-Steam and Water Droplets Flow
F. Sakka and J. Vollbrandt **167**

Experimental Investigation on the Performances of a Transonic Turbine Blade Cascade for Varying Incidence Angles
G. Benvenuto and F. Pittaluga **179**

On Optical Pyrometry Measurement of a Nonisothermal Medium Temperature
I. Mikk **193**

Study of Infra-Red Spectrophotometry of the Evolution on the Temperature in the Length of a Flame
J. Crabol **199**

RECENT DEVELOPMENT IN HEAT AND MASS TRANSFER MEASUREMENT

Mass Transfer System for Simulating Heat Transfer Processes
R. J. Goldstein **215**

Measurement of Thermal-Hydraulic Parameters in Liquid-Metal-Cooled Fast Breeder Reactors
J. I. Sackett **231**

High Temperature Measurement
K. Maglič **259**

Simultaneous Measurement of the Thermal Properties of Phase-Change Material and Complex Liquids using a Nonlinear Thermocinetic Model
P. Carre and D. Delaunay **279**

Measuring of Air Humidity and Calibration of Psychrometers
S. Petelin, J. Renar, B. Gašperšič, and A. Poredoš **295**

A Method for Determining of Species Recombination Constant in a Boundary Layer
O. V. Dobrotcheev and V. P. Motulevitch **303**

Stagnation Pressure Measurement in High Temperature Jet Flow Using Flying Pitot-Probe
P. Stefanović, S. Oka, P. Pavlović, J. Jovanović, and M. Matović **307**

Experimental Determination of Convective Heat Losses inside an Isothermal Cubic Cavity Opened on One Face
M. Pavlović and F. Penot **317**

Measuring Techniques for Determination of Local Mass and Heat Transfer in Industrial Scale
V. Kottke and K. G. Schmidt **325**

Electrochemical Measuring Technique in Gas-Liquid Flow, Friction and Wall Turbulence Description in Bubble Flow

M. Souhar and G. Cognet **337**

Local Heat Transfer Measurements

A. Šlančiauskas and J. Žiugžda **353**

CTA Measurements in Turbulent Flows in the Presence of Heat Transfer

B. S. Petukhov and A. F. Poliakov **361**

Frequency Response of Fine Wire Thermocouples and Cold Wires over a Large Temperature Range in Airflows

C. Petit, P. Gajan, P. Paranthoen, and L. C. Lecordier **373**

High Frequency Temperature Fluctuations Measurements with a Constant Current Thermoanemometer

A. I. Leontiev, E. V. Shishov, P. S. Roganov, and V. P. Zabolotsky **385**

Experimental Study of Free Convection in a Room Model Using a Collector Storage Wall

P. Calvet and P. Millan **393**

Pulse Heating Method for Specific Heat and Electrical Resistivity Measurement in the Range 300 to 1400 K

A. Dobrosavljević and K. Maglič **411**

Some Problems and Original Solutions Related to Thermal Radiation Properties Measurement

J.-F. Sacadura **421**

Emission of Thermal Radiation from Solids and Fluids—Application to Solar Absorbers, Pyrometry, and Thermal Exchangers

P. Hervé and P. Masclet **431**

Methods for Experimental Study of Heat Transfer in the Working Fluid of MHD-Generators

I. A. Vasilieva **441**

Computer Package and Data Acquisition Instrumentation for Coincidence Analysis of Events

Z. Marinšek and M. Tomšič **453**

POWER ENGINEERING MEASUREMENT

Research and Operational Measurements on Modern Power Station Boilers—A Selective Survey

B. Chojnowski **465**

Reactor Safety Measurement Techniques

N. Kondich and G. D. McPherson **491**

Heat Transfer and Mass Flow Measurement during Blowdown of a 36 Rod Bundle

Ch. Chauliac **507**

Probes for Local Velocity and Turbulent Heat Flux Measurements in Liquid Metals

T. von Weissenfluh and B. Sigg **523**

Measurements of the Transient Steam in the Speed Range of $Ma = 0.6$ by Means of a Drag-Body Type Sensor

H. Rinck **533**

Problems of Measurement Techniques in Nuclear Safety Research

L. Szabados, I. Trosztel, and P. Windberg **545**

Index **557**
