

## TABLE OF CONTENTS

	Page
<b>Chapter VIII Formal Calculus .....</b>	<b>1</b>
1. Various Meanings of the Term "Convergence" .....	1
2. Series Analogous to the Stirling Series .....	2
3. Calculation of the Series .....	4
<b>Chapter IX Methods of Newcomb and Lindstedt .....</b>	<b>13</b>
1. Historical Background .....	13
2. Discussion of the Method .....	14
3. Various Forms of Series .....	20
4. Direct Calculation of the Series .....	23
5. Comparison with the Newcomb Method .....	29
<b>Chapter X Application to the Study of Secular Variations .....</b>	<b>32</b>
1. Discussion of the Question .....	32
2. New Change of Variables .....	33
3. Application of the Method of Chapter IX .....	37
<b>Chapter XI Application to the Three-Body Problem .....</b>	<b>40</b>
1. Difficulty of the Problem .....	40
2. Extension of the Method of Chapter IX to Certain Singular Cases .....	41
3. Application to the Three-Body Problem .....	47
4. Change of Variables .....	48
5. Case of Plane Orbits .....	50
6. Study of a Particular Integral .....	56
7. Form of the Expansions .....	58
8. General Case of the Three-Body Problem .....	60
<b>Chapter XII Application to Orbits .....</b>	<b>64</b>
1. Discussion of the Difficulties Involved .....	64
2. Solution of the Difficulty .....	71
<b>Chapter XIII Divergence of the Lindstedt Series .....</b>	<b>82</b>
1. Discussion of the Series (3) .....	82
2. Discussion of the Series (2) .....	86
3. Comparison with the Old Methods .....	91
<b>Chapter XIV Direct Calculation of the Series .....</b>	<b>97</b>
1. Application to the Three-Body Problem .....	109

	Page
2. Diverse Properties .....	118
3. Noteworthy Particular Cases .....	130
4. Conclusions .....	135
<b>Chapter XV Other Methods of Direct Calculus .....</b>	<b>137</b>
1. Problem of Section 125 .....	137
2. Another Example .....	140
3. Problem of Section 134 .....	147
4. Three-Body Problem .....	155
<b>Chapter XVI Gyldén Methods .....</b>	<b>176</b>
1. Reduction of the Equations .....	184
2. Intermediate Orbit .....	192
3. Absolute Orbit .....	194
<b>Chapter XVII Case of the Linear Equations .....</b>	<b>197</b>
1. Study of the Gyldén Equation .....	197
2. Jacobi Method .....	214
3. Gyldén Method .....	217
4. Bruns Method .....	219
5. Lindstedt Method .....	221
6. Hill Method .....	225
7. Application of the Hadamard Theorem .....	230
8. Miscellaneous Remarks .....	238
9. Extension of the Preceding Results .....	239
<b>Chapter XVIII Case of Nonlinear Equations .....</b>	<b>243</b>
1. Equations with Second Member .....	243
2. Equation of the Evection .....	246
3. Variational Equation .....	262
4. Summary .....	268
5. Generalization of Periodic Solutions .....	268
<b>Chapter XIX Bohlin Methods .....</b>	<b>272</b>
1. Delaunay Method .....	272
2. Bohlin Method .....	296
3. Case of Libration .....	304
4. Limiting Case .....	316
5. Correlation with the Series of Section 125 .....	330
6. Divergence of the Series .....	334
<b>Chapter XX Bohlin Series .....</b>	<b>340</b>
1. Case of Libration .....	344
2. Limiting Case .....	349

	Page
3. Comparison with the Series of Section 127 .....	361
Chapter XII Extension of the Bohlin Method .....	369
1. Extension to the Problem of Section 134 .....	369
2. Extension to the Three-Body Problem .....	377
3. Discussion of the Series .....	380
4. Second Method .....	384
5. Case of Libration .....	388
6. Divergence of the Series .....	391
References .....	413
