

# Contents

<b>Preface</b> .....	v
<b>Part I: Artificial Intelligence, Database, and Programming Language Overviews</b> .....	1
1. An Overview of Knowledge Representation <i>John Mylopoulos and Hector J. Levesque</i> .....	3
2. On the Development of Data Models <i>Michael L. Brodie</i> .....	19
3. The Impact of Modelling and Abstraction Concerns on Modern Programming Languages <i>Mary Shaw</i> .....	49
Discussion.....	79
<b>Part II: Perspectives from Artificial Intelligence</b> .....	85
4. Generalization/Specialization as a Basis for Software Specification <i>Alexander Borgida, John Mylopoulos, and         Harry K.T. Wong</i> .....	87
Discussion.....	115

5.	Some Remarks on the Semantics of Representation Languages	
	<i>David J. Israel and Ronald J. Brachman</i> .....	119
	Discussion.....	143
6.	Open Systems	
	<i>Carl Hewitt and Peter de Jong</i> .....	147
7.	The Logic of Incomplete Knowledge Bases	
	<i>Hector J. Levesque</i> .....	165
	Discussion.....	187
8.	Towards a Logical Reconstruction of Relational Database Theory	
	<i>Raymond Reiter</i> .....	191
	Discussion.....	234
9.	A Formal Representation for Plans in the Programmer's Apprentice	
	<i>Charles Rich</i> .....	239
	Discussion.....	270
<b>Part III: Perspectives from Databases</b> .....		<b>275</b>
10.	On the Design and Specification of Database Transactions	
	<i>Michael L. Brodie and Dzenan Ridjanovic</i> .....	277
	Discussion.....	307
11.	A Unified Model and Methodology for Conceptual Database Design	
	<i>Roger King and Dennis McLeod</i> .....	313
	Discussion.....	328
12.	Adding Semantic Knowledge to a Relational Database System	
	<i>Michael Stonebraker</i> .....	333
	Discussion.....	354

**Part IV: Perspectives from Programming Languages.....357**

13. The Functional Data Model and its Uses for  
Interaction with Databases  
*Peter Buneman and Rishiyur Nikhil.....359*  
Discussion.....381

14. Types in the Programming Language Ada  
*Bernd Krieg-Brueckner .....385*  
Discussion.....409

15. Data Selection, Sharing, and Access Control in a  
Relational Scenario  
*Manuel Mall, Manuel Reimer, and  
Joachim W. Schmidt .....411*  
Discussion.....437

16. Types, Algebras and Modelling  
*Stephen N. Zilles.....441*

**Part V: Concluding Remarks from Three Perspectives.....451**

17. An Artificial Intelligence Perspective  
*Carl Hewitt.....453*

18. A Database Perspective  
*Michael Stonebraker.....457*

19. A Programming Language Perspective  
*Stephen N. Zilles.....459*

**References .....461**

**Authors and Symposium Participants .....501**

**Index .....503**
