

## CONTENTS

1.	INTRODUCTION .....	9
1.1.	Purpose and Scope .....	9
1.2.	Organization .....	10
	References .....	12
2.	REFLECTION OF LIGHT IONS FROM SOLIDS .....	12
2.1.	Introduction .....	12
2.2.	Definitions .....	12
2.3.	Experimental Methods .....	14
2.4.	Theoretical Methods .....	14
2.5.	Data for Incident Hydrogen and Helium .....	15
2.5.1.	Normal Incidence .....	15
2.5.2.	Nonnormal Incidence .....	21
2.5.3.	Energy Distribution .....	21
2.5.4.	Angular Distribution .....	24
2.5.5.	Charge States .....	25
2.6.	Discussion of Reflection of Particles with $M_2 > 4$ .....	26
2.7.	Summary .....	26
	References .....	26
3.	HYDROGEN AND HELIUM TRAPPING .....	28
3.1.	Introduction .....	28
3.2.	Hydrogen Trapping and Release .....	28
3.2.1.	General Discussion .....	28
3.2.2.	Formalism for Hydrogen Trapping and Release .....	29
3.2.3.	Metals .....	33
3.2.4.	Nonmetals .....	36
3.3.	Helium Trapping .....	37
3.3.1.	Metals .....	38
3.3.2.	Nonmetals .....	39
3.4.	Summary .....	39
	References .....	39
4.	DESORPTION .....	43
4.1.	Introduction .....	43
4.2.	Definitions .....	44
4.2.1.	Desorption Yield .....	44
4.2.2.	Desorption Cross Section .....	44
4.3.	Relevant Parameters .....	44
4.4.	Theoretical Methods .....	45
4.4.1.	Binary Collision Approximation .....	45

4.4.2.	Analytical Estimates .....	45
4.4.3.	Computer Codes .....	47
4.5.	Desorption Cross Sections .....	48
4.6.	Desorption Yields .....	51
4.7.	Desorbed Particles .....	52
4.8.	Other Desorption Mechanisms .....	53
4.9.	Conclusions .....	53
	References .....	54
5.	EVAPORATION .....	55
5.1.	Introduction .....	55
5.2.	Physical and Thermal Data .....	55
	References .....	60
6.	SPUTTERING .....	61
6.1.	Introduction .....	61
6.1.1.	Definition of Sputtering .....	61
6.1.2.	Analytical Expression of Sputtering Yields .....	62
6.2.	Sputtering Data .....	63
6.2.1.	Linear Superposition .....	63
6.2.2.	Data Needs for Plasma Models .....	63
6.2.3.	Sputtering Yield at Normal Incidence .....	64
6.2.4.	Total Yield Dependence on the Incident Angle .....	66
6.2.5.	Angular Distribution of Sputtered Particles .....	67
6.2.6.	Energy Distribution of Sputtered Atoms .....	69
6.3.	Sputtering of Compounds and Alloys .....	70
6.4.	Summary .....	71
	References .....	71
7.	CHEMICAL EFFECTS IN SPUTTERING .....	72
7.1.	Introduction .....	72
7.1.1.	Definitions .....	72
7.1.2.	Expected Occurrence of Chemical Effects .....	72
7.2.	Physico-Chemical Sputtering .....	73
7.2.1.	Oxygen .....	73
7.2.2.	Hydrogen .....	75
7.3.	Chemical Sputtering .....	75
7.3.1.	Carbon .....	75
7.3.2.	Carbides .....	80
7.3.3.	Synergistic Effects .....	81
7.4.	High-Temperature Erosion .....	82
7.5.	Summary .....	83
	References .....	83
8.	BLISTERING .....	85
8.1.	Introduction .....	85
8.2.	Helium Blistering of Metals .....	87
8.2.1.	Energy Spectrum and Incident Angle Dependence .....	87
8.2.2.	Temperature Dependence .....	87
8.2.3.	Helium Fluence Dependence .....	88

8.2.4.	Flux Dependence .....	88
8.2.5.	Blistering Characteristics .....	89
8.2.6.	Summary of Criteria for Massive Exfoliation in Metals .....	89
8.3.	Helium Blistering of Nonmetals .....	90
8.4.	Helium Blistering of a Reactor First Wall .....	90
8.5.	Hydrogen Blistering .....	91
8.5.1.	Stainless Steels .....	91
8.5.2.	Titanium .....	91
8.5.3.	Copper, Aluminum, Molybdenum, and Tungsten .....	91
8.5.4.	Nonmetals .....	92
8.6.	Synergistic Effects .....	92
8.7.	Summary .....	92
	References .....	92
9.	SECONDARY ELECTRON EMISSION .....	94
9.1.	Introduction .....	94
9.2.	Backscattering (or Reflection) of Electrons .....	95
9.2.1.	Algebraic Representation of Backscattering Coefficient .....	95
9.2.2.	Tabular Data for $\eta$ .....	96
9.2.3.	Variation of Backscattering Coefficient with Incident Angle .....	96
9.3.	Secondary Electron Emission by Electron Impact .....	96
9.3.1.	General Behaviour and Algebraic Representation of Secondary Emission Coefficients .....	97
9.3.2.	Graphical Data .....	98
9.3.3.	Variation of Secondary Electron Emission with Impact Angle .....	99
9.3.4.	Angular Distribution of Ejected Electrons .....	99
9.4.	Secondary Electron Ejection by Heavy Particle Impact .....	99
9.4.1.	Algebraic Representation of Data .....	99
9.4.2.	Experimental Data .....	99
9.5.	Summary .....	103
	References .....	104
10.	UNIPOLAR ARCING .....	105
10.1.	Introduction .....	105
10.2.	Model of Unipolar Arcing .....	105
10.3.	Arcing in Tokamaks .....	106
10.3.1.	Arc Tracks .....	106
10.3.2.	Time Dependence and Correlations to Plasma Behaviour .....	108
10.3.3.	Impurity Introduction by Arcing .....	108
10.4.	Arc Parameters .....	109
10.4.1.	Cathode Spot Parameters .....	109
10.4.2.	Erosion .....	109
10.4.3.	Arc Motion in an External Magnetic Field .....	110
10.4.4.	Surface Effects and Conditioning .....	111
10.4.5.	Cathode Drop Voltage .....	112
10.5.	Discussion .....	112
10.6.	Conclusions .....	114
	References .....	114
11.	SUMMARY .....	116
